## **From Pyramid To Pillar Population Change And Social Security In Europe:**

From Pyramid to Pillar International Labour Office,1989 Unders gelse af hvordan de ldre i Europa med den gede levealder vil p virke fremtidens socialv sen      From Pyramid to Pillar International Labour Office,1989 The social security systems developed over the years in most European countries are under threat The population of Europe is ageing in that the number of elderly people is growing steadily while the birth rate has declined drastically This means that the so called population pyramid is now taking on the form of a pillar as the apex of the pyramid is filled out by the older age groups The result is that a smaller working age population will have to support a greater number of retired persons This topical and thought provoking study to which eminent European specialists have contributed      **Women and Social Security** Anne-Marie Brocas,Anne-Marie Cailloux,Virginie Oget,1990 This study examines how far men and women in equivalent employment situations enjoy equal social security rights and to what extent there is a need for specific protection of women as mothers and as workers with family responsibilities      **The Future of Europe's Population** Robert Cliquet,1993-01-01 Presents information about fertility mortality and migration in Europe to show possible future developments in population age structures and sizes      **Economic Transformation in Eastern Europe and the Distribution of Income** Anthony Barnes Atkinson,John Micklewright,1992-10 This book first published in 1992 examines the distribution of income under Communism in Eastern Europe and its implications for economic transformation      Labor Markets and Social Policy in Central and Eastern Europe N. A. Barr,1994 The Essence of Reform      Report of the Director-General International Labour Office,1992      **Stabilization and Structural Adjustment in Poland** Henryk Kierzkowski,Marek Okólski,Stanislaw H. Wellisz,2013-04-15 The Solidarity led government which came into power in Poland in Autumn 1989 faced two enormous tasks First to stabilize an economy prone to hyperflation Second to replace a crumbling command system in favour of a market mechanism in a country whose market institutions had been destroyed under forty years of communist rule This book recounts the events of this period and the course taken by the new government and analyzes the significance of this for the transition process in Poland and elsewhere      **Training for Older People** Peter C. Plett,Brenda T. Lester,Katherine L. Yocum,1991      Aging in Eastern Europe and the Former Soviet Union Victoria Averil Velkoff,Kevin G. Kinsella,United States. Bureau of the Census,1993 Discusses trends in the size and social conditions of the ageing population mainly from 1970 to 1992 with projections to 2025      *International Population Reports* ,1993      **Old Age from Antiquity to Post-Modernity** Paul Johnson,Pat Thane,2002-11-01 Based on themes such as status and welfare Old Age from Antiquity to Post Modernity examines the role of the elderly in history This empirical study represents a substantial contribution to both the historical understanding of old age in past societies as well as the discussion of the contribution of post modernism to historical scholarship      *Report of the Director-General* International Labour Office. Director-General,International Labour Organisation,1992      **The Economist** ,1854      **West European Immigration and Immigrant Policy in the New**

**Century** Anthony M. Messina, 2002-06-30 Few if any phenomena affecting Western Europe as a whole since 1945 have been more far reaching in their immediate effects or more potentially destabilizing to politics and society over the long term than the accumulative experience of immigration Messina and his contributors analyze why the major immigrant receiving states of Western Europe historically permitted and often abetted relatively high levels of postwar migration and they assess how contemporary governments attempt to govern immigration flows and manage the domestic social and political fallout which it inevitably yields The central purpose of the volume is to address these questions within the context of the decision making logics that have demonstratively governed postwar migration to Western Europe in each of its three distinct but interrelated waves or phases labor migration family migration and humanitarian or forced migration Messina demonstrates that postwar migration to Western Europe in all of its phases has been governed by a set of mutually reinforcing and mostly compatible logics Of these the economic the humanitarian and the political the political has predominated over time and is likely to continue doing so into the indefinite future A major cross disciplinary analysis that will appeal to political scientists sociologists and general researchers and scholars of ethnicity race relations and comparative public policy Pensions in Development Roger Charlton, Roddy McKinnon, 2018-03-29 This title was first published in 2001 Challenging conventional approaches to the delivery of sustainable social protection to the elderly in developing countries DCs and assessing their implications this work discusses the appropriateness of the public management of funded systems in DCs with relatively large formal sectors The combination of social assistance approaches to social protection for the elderly facilitates the formation of an original unbiased pensions in development approach Arguing for expeditious implementation of non contributory tax or aid financed universal old age pensions provision in all DCs and advocating industry flexibility and inclusivity the book provides a treatment of a growing issue in worldwide development **Population, Family, and Welfare** Hein G. Moors, Rossella Palomba, 1995 Family formation and fertility in practically all European countries has been subject to dramatic changes over the last 20 years What are the attitudes of Europeans towards current demographic trends Are new values goals in life and everyday needs still compatible with raising children What policies might influence current population trends Based on a comparative survey of nine European countries Austria Belgium former Czechoslovakia Germany Hungary Italy The Netherlands Spain and Switzerland this volume provides a new perspective on the impact of population related social policies by linking them to emerging values attitudes and norms in the field of family formation and parenthood The analysis demonstrates that common trends like the decline in fertility do not imply a convergence of values and lifestyles nor the presence of similar social pressures The impact of social policies is related to the phase of the family cycle the social and economic situation of the couple as well as emerging values and norms with respect to family and parenthood in a specific national context This book argues for the revision of the assumption that generally observed demographic trends all have similar causes and ask for similar policies It will be an indispensable reference tool for both

researchers and policy makers      *Sociology of Families* Cheryl Albers, 1999-03-11 A comprehensive selection of readings provided to support David Newman's book of the same name      **Modelling in Health Care Finance** Michael Cichon, 1999 In straightforward non technical language the book demystifies the modelling process and provides step by step guidance demonstrating how managers and policy makers can best make use of models in the formation of health policy goals the identification of options and the analysis and implementation of results      *Fiscal Implications of an Aging Population* Dieter Bös, Sijbren Cnossen, 2012-12-06 Serious research into the causes and implications of an aging population is a relatively recent phenomenon Though several relevant issues of aging have received considerable attention in public and political discussions especially in European countries and in Japan the economics profession is somewhat lacking behind This is particularly true for the theoretical underpinnings of the economics of population aging Until now the aging debate is primarily led by institutionalists The present book with its analytical and econometric studies on fiscal implications of population aging is an important step in the process of theoretical analysis of aging It is of interest both for population economists and demographers and for public economists providing a bridge between these areas of research
