From Subjects to Subjectivities Deborah L. Tolman, Mary Brydon-Miller, 2001 From Subject to Subjectivities profiles the recent debates about the role of qualitative and participatory methods in psychology a discipline which has traditionally seen itself as a form of positivistic science Contributors explain how fundamentally different views of the nature of reality and of scientific theory have shaped these debates and how psychology is being transformed through the use of these methods At the heart of the book are 10 exemplars of interpretive and participatory action research which describe the rationale for and process of using these methods in actual cases They also articulate some of the challenges psychologists may face in adopting them offering insights into how these complications can be successfully negotiated Relevant beyond psychology the models provided can be used within the context of a wide array of social science disciplines from sociology and anthropology to women s studies and public health The contributors represent a veritable who s who of qualitative scholars including Lyn Mikel Brown Larry Davidson Michelle Fine Louise Kidder M Brinton Lykes Jeanne Marecek Abigail Stewart and Niobe Way No previous book has examined qualitative and participatory methods specifically within the context of psychology From Subjects to Subjectivities provides a unique and badly needed resource for those interested in learning about the practice of these methods in the field The Handbook of Social Research Ethics Donna M. Introduction to

Conflict Resolution Sara Cobb, Sarah Federman, Alison Castel, 2019-07-02 The field of conflict resolution has evolved dramatically during the relatively short duration of the discipline s existence Each generation of scholars has struggled with the major puzzles of their era providing theories and solutions that meet the needs of the time only to be pushed forward by new insights and at times totally upended by a changing world This introductory course text explores the genealogy of the field of conflict resolution by examining three different epochs of the field each one tied to the historical context and events of the day In each of these epochs scholars and practitioners worked to understand and address the conflicts that the world was facing at that time This book provides a framework that students will carry with them far into their careers enriching their contributions and strengthening their voices Rather than a didactic approach to the field students will develop their critical analytical skills through an inductive inquiry Students will broaden their vocabulary grapple with argumentation and develop critical reading skills Feminism and Method Nancy A. Naples, 2013-10-16 Naples draws on different research topics such as welfare poverty sexual identity and sexual abuse to illustrate some of the most salient dilemmas of feminist research the debate over objectivity the paradox of discourse the dilemma of standpoint and the challenges of activist research By linking important feminist theoretical debates with case studies Naples illustrates the strategies she developed for resolving the challenges posed be postmodern Third World postcolonial and queer studies Project-Based Second and Foreign Language Education Gulbahar H.
