Verne, 2013-12-24 Jules Verne was an incredible visionary His two stories regarding the first attempts by man to leave the surface of the Earth travel across a vast distance and visit our satellite were incredible for the time in which they were written But even more so in that Verne predicted that Florida in the United States would be the point of takeoff and that three men would take part in the journey There are many other surprises in store for the reader and though Verne was incorrect on a few details it is almost as if he had visited his future and witnessed the events This is a combination of the two stories detailing the trip and the return to our planet Eighty illustrations accompany the text This is a fine translation of Verne's original French writings with only minor interference by several editors over the years to standardize spellings and correct a few obvious typos From the Earth to the Moon and Round the Moon Jules Jules Verne, 2016-06-23 How is this

Having been fired out of the giant Columbiad space gun the Baltimore Gun Club's bullet shaped projectile along with its three passengers Barbicane, Nicholl and Michel Ardan begins the five day trip to the Moon. A few minutes into the journey a small bright asteroid passes within a few hundred yards of them but does not collide with the projectile. The asteroid had been captured by the Earth's gravity and had become a second moon. The three travelers undergo a series of adventures and misadventures during the rest of the journey including disposing of the body of a dog out a window suffering intoxication by gases and making calculations leading them briefly to believe that they are to fall back to Earth. During the latter part of the voyage it becomes apparent that the gravitational force of their earlier encounter with the asteroid has caused the projectile to deviate from its course.
