Tied Aid and Development Aid Procurement in the Framework of EU and WTO Law Annamaria La Chimia,2014-07-18 This book is the first legal treatment of tied aid and examines in detail the compatibility of tied aid with EU and WTO law The workings of the aid projects and aid procurement systems of donor countries granting bilateral aid are fully examined through case studies from the UK Italy the EU and the US Tied aid refers to aid granted to developing countries on condition that goods and services for the aid financed projects are purchased from the donor country only The recipient country in order to receive the grant or the loan has no other choice but to fulfil the condition imposed by

the donor Economists have shown that tying aid undermines the effectiveness of aid It leads to higher costs paid for the goods and services purchased and the distortion of the nature of the aid Further tying frustrates the potential of aid to foster trade between developing countries in many of these countries public bodies and in particular aid financed projects are major potential outlets for trade between neighbouring states The importance of tied aid has been pointed out in economic literature but there is surprisingly little written on the legal aspects of tied aid practices and this book seeks to fill this major gap in the literature The book is of interest to academics in the field of EU and WTO law NGOs and practitioners working both in the field of public procurement and development policies **The Politics of South African Cricket** Jon

Gemmell,2004-03-31 Jon Gemmell analyses the relationship between sport and politics through a historical analysis of South African cricket
