**High-Rise Living in Asian Cities** Belinda Yuen, Anthony G.O.

Yeh,2011-02-02 This book is intended to fill a knowledge gap in the study of contemporary high rise living While there has been much documentation on the engineering and technological aspects of tall buildings relatively little has been written about the social and livability of high rise Much less is written about Asian cities even though Asia is the current hotbed of high rise development Even though traditional discourse of high rise housing is not always positive new forces are redefining its place in 21st century urbanity Many cities around the world are reembracing high rise in urban agenda under current narrative of sustainable development High rise is fast becoming a priority area in international research agenda The quest is for livable and sustainable high rise development Against the background of current trends globalization urbanization mixed use development and new built taller buildings in inner city areas in both developed and developing countries this book examines the software design economics estate management legal and property rights physical environment planning community development and social dimensions of high rise living Analysis is with the widely acclaimed successful high rise public housing in Hong Kong and Singapore to understand the advantages and worries of high rise living and to distill the key points and lessons in the making of a good highrise living environment Hong Kong and Singapore have been constructing high rise for more than four decades each The majority of their population has moved to live in high rise selecting to live high rise and registering consistently high residential satisfaction The height of apartment buildings in both cities continues to rise The tallest is anticipated to be 70 storey It is the contention of this book that contrary to earlier common negative discourses on public high rise living the high rise environment may yet offer urban residents a satisfying dwelling experience Leading housing academics researchers and practitioners in the two cities have contributed to this book This book presents a timely contribution to our understanding of a widening urban phenomenon that will affect a growing number of the world s population *Dr. Ambedkar and Untouchability* Christophe Jaffrelot,2005 For years Ambedkar battled alone against the

Indian political establishment including Gandhi who resisted his attempt to formalize and codify a separate identity for the Dalits Nonetheless he became law minister in the first government of independent India and more important was elected chairman of the committee which drafted the Indian Constitution Here he modified Gandhian attempts to influence the Indian polity He then distanced himself from politics and sought solace in Buddhism to which he converted in 1956 a few months before his death Jaffrelot focuses on Ambedkar s three key roles as social theorist as statesman and politician and as an advocate of conversion to Buddhism as an escape route for India s Dalits In each case he pioneered new strategies that proved effective in his lifetime and still resonate today **BOOK JACKET**

### **Rethinking Power Relations in Indonesia**

Michaela Haug,Martin Rössler,Anna-Teresa Grumblies,2016-07-15 Since colonial rule the island of Java served as Indonesia s imagined centre and prime example of development while the Outer Islands were constructed as the state s marginalised periphery Recent processes of democratisation and regional autonomy however have significantly changed the power relations that once produced the marginality of the Outer Islands This book explores processes of political economic and

cultural transformations in Indonesia emphasizing their implications for centre periphery relations from the perspective of the archipelago's margins. Structured along three central themes, the book first provides theoretical contributions to the understanding of marginality in Indonesia. The second part focuses on political transformation processes and their implications for the Outer Islands. The third section investigates the dynamics caused by economic changes on Indonesia's periphery. Chapters written by experts in the field offer examples from various regions which demonstrate how power relations between centre and periphery are getting challenged, contested and reshaped. The book fills a gap in the literature by analysing the implications of the recent transformation processes for the construction of marginality on Indonesia's Outer Islands.

*Remapping Gender, Place and Mobility* Stine Thidemann Faber, Helene Priested Nielsen, 2016-03-03

Enhancing our understanding of how people and places are affected by globalization at the level of everyday interactions within Nordic Peripheries, this book sheds light on local particularities as well as global confluences by illuminating how gender, mobility and belonging contribute to ruptures and/or stability in the lives of men and women living in and/or moving within these northern localities. Crossing disciplinary and geographical boundaries, the focus of the book is specifically on how global processes shape and influence the Nordic countries at the social level: Denmark, Norway, Sweden, Iceland, Finland as well as the Faroe Islands. The book starts from the premise that the Nordic peripheries offer an especially powerful lens on peripherality in a globalized and globalizing world because the region as a whole is traditionally perceived as relatively affluent, stable and with high levels of social equality. Yet as the different chapters in the book demonstrate with case studies that illuminate diverse gendered processes, globalization produces ruptures and new social constellations also at the rims of Nordic societies well beyond the cushioning of comprehensive social welfare regimes. By elevating the empirical findings to more general debates about the gendered effects of globalization, the book invites the reader to reflect upon not only Nordic particularities but also how insights from this part of the world can be instructive for understanding the nuances and complexities of global confluences at large.

*Intercultural Communication & Ideology* Adrian Holliday, 2010-12-10

Taking on issues normally left in the margins, *Intercultural Communication and Ideology* revises the way we think of intercultural communication by insisting that we consider its ideological component. In this brilliant and engaging book about culture and the interstices that comprise the grounds for our interactions, Adrian Holliday shows us the necessity for a cosmopolitan process that expands the basis of our intercultural work. Molefi Kete Asante, Temple University. Adrian Holliday's highly readable and thought-provoking volume is a welcome addition to the existing body of work on intercultural communication and ideology. With its comprehensive coverage of studies in the field and critical discussion of dominant theoretical paradigms, this refreshing book provides a valuable resource for both students and experienced researchers but also everyone interested in intercultural communication. An authoritative and open-minded book, the field will embrace it. Jo Angouri

University of the West of England Although communication is central to the humanities and social sciences the inter cultural level is often peculiarly left out of accounts So what is intercultural communication How does it relate to global processes and questions of identity This comprehensive book examines the main features of intercultural communication It critically examines the main positions in the field It addresses intercultural communication within the context of global politics both addressing the specific problems that derive from Western ideology and setting out an agenda for research The book investigates categories of cultural action and itemizes the machinery for the illumination of inter cultural processes Holliday shows how a dialogue between national structures and creative universal cultural skills can be carried on in new locations relating intercultural communication to theories of multiculturalism cosmopolitanism and globalization while also exploring how ideology permeates inter cultural processes and develops an alternative grammar of culture

**Challenging the State: Devolution and the Battle for Partisan Credibility** Sonia Alonso, 2012-04-26 How do state parties react to the challenge of peripheral parties demanding political power to be devolved to their culturally distinct territories Is devolution the best response to these demands Why do national governments implement devolution given the high risk that devolution will encourage peripheral parties to demand ever more devolved powers The aim of this book is to answer these questions through a comparative analysis of devolution in four European countries Belgium Italy Spain and the United Kingdom The author argues that electoral competition between state and peripheral parties pushes some state parties to prefer devolution at some particular point in time Devolution is an electoral strategy adopted in order to make it more difficult in the long term for peripheral parties to increase their electoral support by claiming the monopoly of representation of the peripheral territory and the people in it The strategy of devolution is preferred over short term tactics of convergence towards the peripheral programmatic agenda because the pro periphery tactics of state parties in unitary centralised states are not credible in the eyes of voters The price that state parties pay for making their electoral tactics credible is the entrenchment of the devolution programmatic agenda in the electoral arena The final implication of this argument is that in democratic systems devolution is not a decision to protect the state from the secessionist threat It is instead a decision by state parties to protect their needed electoral majorities Comparative Politics is a series for students teachers and researchers of political science that deals with contemporary government and politics Global in scope books in the series are characterised by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit [www.ecprnet.eu](http://www.ecprnet.eu) The Comparative Politics series is edited by Professor David M Farrell School of Politics and International Relations University College Dublin Kenneth Carty Professor of Political Science University of British Columbia and Professor Dirk Berg Schlosser Institute of Political Science Philipps University Marburg
