Cognitive Radio Communications and Networks Alexander M. Wyglinski, Maziar Nekovee, Thomas Hou, 2009-11-13 Cognitive Radio Communications and Networks gives comprehensive and balanced coverage of the principles of cognitive radio communications cognitive networks and details of their implementation including the latest developments in the standards and spectrum policy Case studies end of chapter questions and descriptions of various platforms and test beds together with sample code give hands on knowledge of how cognitive radio systems can be implemented in practice Extensive treatment is given to several standards including IEEE 802.22 for TV White Spaces and IEEE 802.22.2 Written by leading people in the field both at universities and major industrial research laboratories this tutorial text gives communications engineers R D engineers researchers undergraduate and post graduate students a complete reference on the application of wireless communications and network theory for the design and implementation of cognitive radio systems and networks Each chapter is written by internationally renowned experts giving complete and balanced treatment of the fundamentals of both cognitive radio communications and cognitive networks together with implementation details Extensive treatment of the latest standards and spectrum policy developments enables the development of compliant cognitive systems Strong practical orientation through case studies and descriptions of cognitive radio platforms and testbeds shows how real world cognitive radio systems and network architectures have been built Alexander M Wyglinski is an Assistant Professor of Electrical and Computer Engineering at Worcester Polytechnic Institute WPI Director of the WPI Limerick Project Center and Director of the Wireless Innovation Laboratory WI Lab Each chapter is written by internationally renowned experts giving complete and balanced treatment of the fundamentals of both cognitive radio communications and cognitive networks together with implementation details Extensive treatment of the latest standards and spectrum policy developments enables the development of compliant

cognitive systems Strong practical orientation through case studies and descriptions of cognitive radio platforms and testbeds shows how real world cognitive radio systems and network architectures have been built

Net Neutrality:

Contributions to the Debate Jorge Pérez Martínez (Coord.), 2011-03-30 After a decade of discussion on how to guarantee an open sustainable internet and often intense debate regarding the Federal Communications Commission's 2009 public hearing on the application of the principles of net neutrality on 21st December 2010 the various elements that comprise the solution to this now famous controversy were passed This solution has not satisfied many people and nearly everyone agrees that it will not end the debate and nor will it resolve the underlying structural problems This book examines the source development and viewpoints on this issue based on contributions from leading experts from the academic and business worlds in the USA and Europe who have been involved in the debate This is a highly important book for understanding the various points of view on the very current and controversial issue of web neutrality
