From Ranks To Riches:

From Ranks to Riches John L. Begley, 1999 Rich States, Poor States: ALEC-Laffer State Economic Competitiveness Index, 4th Edition , *The New Rank and File* Staughton Lynd, Alice Lynd, 2018-08-06 Much has changed for workers in the years since Staughton and Alice Lynd's classic *Rank and File Personal Histories* by Working Class Organizers was first published in 1973. *The New Rank and File* presents interviews with working class organizers of the 1970s, 1980s and 1990s who face the challenges of a new economy with the same determination and creativity shown by those profiled in the earlier book. Reflecting the increasing globalization of labor practices and problems, *The New Rank and File* contains oral histories of workers in Guatemala, Palestine, Nicaragua, Mexico, and Canada, as well as the United States. In their narratives, rank and file workers from many different industries and workplaces reveal the specific incidents and pervasive injustices that triggered their activism. They discuss the frustrations they faced in attempting to effect change through traditional means and the ways in which they have learned to advocate through innovation. In an incisive introduction, the Lynds set forth their distinctive perspective on the labor movement with a focus on solidarity, unionism, making decisions on the assumption that we all may be leaders at one time or another rather than relying on static hierarchies. Their insights, along with true stories told in the organizers' own words, contain much to inspire a new generation of workers and activists. Ragin, 2008-08-14 *Configurational Comparative Methods* paves the way for an innovative approach to empirical scientific work through a strategy that integrates key strengths of both qualitative case-oriented and quantitative variable-oriented approaches. This first of its kind text is ideally suited for small N or intermediate N research situations which both mainstream qualitative and quantitative methods find difficult to address. Benoît Rihoux and Charles C. Ragin, along with their contributing authors, offer both a basic comparative research design overview and a technical and hands-on review of Crisp Set QCA, csQCA, Multi-Value QCA, mvQCA, and Fuzzy Set QCA, fsQCA. Key Features: Discusses existing applications in many different fields and disciplines along with state-of-the-art coverage of the strengths and limitations of these techniques. Demonstrates further inventive ways of using QCA techniques. Provides advice on how to develop a comparative research design, case and variable selection, as well as a specific technique called MSDO. MSDO: most similar different outcome, most different same outcome. Shows how to perform the technical operations linked to three specific QCA techniques: csQCA, mvQCA, and fsQCA. Includes a glossary, an extensive bibliography, and a detailed list of good practices at every stage of the research process. Intended Audience: A must for any
