From the Hill Rose Houk,1991 From the Hill Rose Houk,2000-01-01 **Literature 1991, Part 2** Astronomisches Rechen-Institut,2013-06-29 Astronomy and Astrophysics Abstracts appearing twice a year has become one of the fundamental publications in the fields of astronomy astrophysics and neighbouring sciences It is the most important English language abstracting journal in the mentioned branches The abstracts are classified under more than a hundred subject categories thus permitting a quick survey of the whole extended material The AAA is a valuable and important publication for all students and scientists working in the fields of astronomy and related sciences As such it represents a necessary ingredient of any astronomical library all over the world **The Explorers of Mars Hill** William Lowell Putnam,1994 *Flagstaff* John G. DeGraff, III,2011 On July 4 1876 members of the Second Boston Party made camp at Antelope Spring on their way to California To celebrate the country's centennial the men prepared a ponderosa pine tree by stripping it of its branches and creating a flagpole With the arrival of the Atlantic and Pacific Railroad in 1882 this flag staff was once again discovered The area was growing in population so it became necessary to establish a post office Many names were proposed for the new town such as Antelope City and Flagpole but the name Flag Staff fit best As an oasis in the middle of the southwest desert Flagstaff has been a hub for many attractions surrounding the city prompting visitors to send news of their experiences via a picture postcard Many of the cards in this volume have messages and postmarks that help show a glimpse of what life was like in Arizona's High Country **Lowell Observatory** Kevin Schindler,2016-02-01 Atop a mesa one mile west of downtown Flagstaff Arizona sits Lowell Observatory an astronomical research facility steeped in tradition Percival Lowell scion of a Boston Brahmin family initially established his observatory in 1894 to study the possibility of intelligent life on Mars Lowell widely popularized his controversial theories sparking debate among both the scientific community and lay public In the following years the observatory's astronomers made several discoveries that dramatically altered our understanding of space including Clyde Tombaugh's discovery of Pluto in 1930 and V M Slipher's detection of the expanding nature of the universe in 1912 Decades later Apollo astronauts visited as part of their training to fly to the moon These stories and others offer a glimpse of the scientific discovery community pride and personal triumph that define Lowell Observatory *The Lowells of Massachusetts* Nina Sankovitch,2024-06-04 A stirring saga of a New England family Sankovitch has made a compelling contribution to Massachusetts and American history Roger Lowenstein The Wall Street Journal The Lowells of Massachusetts were a remarkable family They were settlers in the New World in the 1600s revolutionaries creating a new nation in the 1700s merchants and manufacturers building prosperity in the 1800s and scientists and artists flourishing in the 1900s For the first time Nina Sankovitch tells the story of this fascinating and powerful dynasty in The Lowells of Massachusetts Though not without scoundrels and certainly no strangers to controversy the family boasted some of the most astonishing individuals in America's history Percival Lowell the patriarch who arrived in America in the seventeenth century to plant the

roots of the family tree Reverend John Lowell the preacher Judge John Lowell a member of the Continental Congress Francis Cabot Lowell manufacturer and some say founder of the Industrial Revolution in the US James Russell Lowell American Romantic poet Lawrence Lowell one of Harvard's longest serving and most controversial presidents and Amy Lowell the twentieth century poet who lived openly in a Boston Marriage with the actress Ada Dwyer Russell The Lowells realized the promise of America as the land of opportunity by uniting Puritan values of hard work community service and individual responsibility with a deep seated optimism that became a well known family trait Long before the Kennedys put their stamp on Massachusetts the Lowells claimed the bedrock By the final pages of this volume one feels deeply attached to the individual Lowells while also exhilarated at having experienced this grand sweep of American history Charlotte Gordon The Washington Post

A Tale of Two Passes William L. Putnam, 2008-04-01 A Tale of Two Passes An Inquiry into Certain Alpine Literature Light Technology Publishing's newest title is devoted to treasuring the history of Mont Cenis and the Great Saint Bernard passages Both of these passes were prominently and frequently used by the Romans in establishing and maintaining their empire It is surmised that Hannibal and his troops found elephant friendly passages through the Mont Cenis corridor Both passes were adorned with hospices shelters near their crest and both now have been by passed by modern tunnels Despite these similarities their historic prominence derives from distinctly different events and factors

The Martians David Baron, 2025-08-26 Long before NASA began contemplating a visit to our neighboring world a turn of the century Mars craze invaded the public's imagination here thrillingly retold in David Baron's The Martians There Is Life on the Planet Mars New York Times December 9 1906 This New York Times headline was no joke In the early 1900s many Americans actually believed we had discovered intelligent life on Mars as best selling science writer David Baron chronicles in The Martians his truly bizarre tale of a nation swept up in Mars mania At the center of Baron's historical drama is Percival Lowell the Boston Brahmin and Harvard scion who observed canals etched into the surface of Mars Lowell devised a grand theory that the red planet was home to a utopian society that had built gargantuan ditches to funnel precious meltwater from the polar icecaps to desert farms and oasis cities The public fell in love with the ambitious amateur astronomer who shared his findings in speeches and wildly popular books While at first people treated the Martians whimsically Martians headlining Broadway shows biologists speculating whether they were winged or gilled the discussion quickly became serious Inventor Nikola Tesla announced he had received radio signals from Mars Alexander Graham Bell agreed there was no escape from the conviction that intelligent beings inhabited the planet Martian excitement reached its zenith when Lowell financed an expedition to photograph Mars from Chile's Atacama Desert resulting in what newspapers hailed as proof of the Martian canals existence Triumph quickly yielded to tragedy Those wild claims and highly speculative photographs emboldened Lowell's critics whose withering attacks gathered steam and eventually wrecked the man and his theory but not the fervor he had started Although Lowell would die discredited and delusional in 1916 the Mars frenzy spurred a nascent literary genre called science fiction

and the world's sense of its place in the universe would never be the same Today the red planet maintains its grip on the public's imagination Many see Mars as civilization's destiny the first step toward our becoming an interplanetary species but as David Baron demonstrates this tendency to project our hopes onto the world next door is hardly new The Martians is a scintillating and necessary reminder that while we look to Mars for answers what we often find are mirrors of ourselves

Arizona History,2017 **News from Mars** Joshua Nall,2019-08-13 Mass media in the late nineteenth century was full of news from Mars In the wake of Giovanni Schiaparelli's 1877 discovery of enigmatic dark straight lines on the red planet astronomers and the public at large vigorously debated the possibility that it might be inhabited As rivalling scientific practitioners looked to marshal allies and sway public opinion through newspapers periodicals popular books exhibitions and encyclopaedias they exposed disagreements over how the discipline of astronomy should be organized and how it should establish acceptable conventions of discourse News from Mars provides a new account of this extraordinary episode in the history of astronomy revealing how major transformations in astronomical practice across Britain and America were inextricably tied up with popular scientific culture and a transatlantic news economy that enabled knowledge to travel As

Joshua Nall argues astronomers were journalists too eliding practice with communication in consequential ways As writers and editors they played a pivotal role in the emergence of a new astronomy dedicated to the study of the physical constitution and life history of celestial objects blurring harsh distinctions between those who produced esoteric knowledge and those who disseminated it
