

FRONTERAS DE VENEZUELA

Hermann González Oropeza y Manuel Doris Ríos, autores de esta entrega, consideran que toda Historia de las Fronteras venezolanas debería comenzar preguntándose cómo se llegó a fraguar la unidad territorial que vino a ser nuestro país. Tan importante es este aspecto que resulta en verdad un abuso histórico usar el término "Venezuela", para abarcar territorios que ni siquiera eran designados con ese nombre cuando hablamos de una Venezuela pre-colombina o de una Venezuela colonial.

Venezuela en su territorio y en sus hombres no se integró en una entidad nacional, sino como término de un largo proceso, originado en lo que hemos denominado las capitulaciones genésicas. Lo que hoy llamamos el "territorio venezolano" no fue un todo integrado sino para finales del siglo XVIII y esa integración tuvo que asimilarse y cristalizarse durante el periodo republicano. Este es uno de los aspectos más fundamentales de su historia que los autores lo analizan, como una necesidad de tenerlo en mente para la cabal comprensión de Venezuela.

Una vez independiente, Venezuela vivió entre 1830-1860 momentos de serios problemas fronterizos, pues debió atender a la configuración de sus fronteras con Colombia, Brasil, Holanda y Guayana Británica. A partir de 1861, nuestro país basó toda su diplomacia en la búsqueda del Arbitraje como solución frente a Colombia y Guayana Británica. Las dolorosas consecuencias de estos laudos, traducidas luego en las demarcaciones subsiguientes, sacrificaron los derechos de una Venezuela mayor.

The Spanish Coastal Systems Juan A. Morales, 2018-09-03 This monograph presents the state of art of the geologic knowledge about the Spanish coast obtained through scientific research in the last 30 years. From a general point of view, coasts are the most quickly changing systems of the Earth. This is critical since many human resources such as the main part of economic and social activities are located in the coastal areas. Especially in the case of Spain, these coasts include cities, wide industrial areas, including harbor complexes, important ecologic systems and our main economic resource, tourism. Understanding the dynamic functioning of each element of this coast is vital for correct future coastal management so as to solve problems derived from bad plans developed in the last decades of the twentieth century. This is a valuable text for advanced graduate students and coastal researchers which connects the specific dynamic functioning of the main Spanish coastal environments and their relationships with human activities
