**Assessing the Benefits of Public Research within an Economic Framework: The Case of USDA's Agricultural Research Service** , 2010 **Improving Data to Analyze Food and Nutrition Policies** National Research Council, Division

of Behavioral and Social Sciences and Education, Committee on National Statistics, Panel on Enhancing the Data Infrastructure in Support of Food and Nutrition Programs, Research, and Decision Making, 2005-10-18 Several changes in the United States over the past two decades have implications for diet nutrition and food safety including patterns of food consumption that have produced an increase in overweight and obese Americans and threats to food safety from pathogens and bioterrorism The changes raise a number of critical policy and research questions How do differences in food prices and availability or in households time resources for shopping and food preparation affect what people consume and where they eat How do factors outside of the household such as the availability of stores and restaurants food preparation technology and food marketing and labeling policies affect what people are consuming What effects have food assistance programs had on the nutritional quality of diets and the health of those served by the programs Where do people buy and consume food and how does food preparation affect food safety To address these and related questions the Economic Research Service ERS of the U S Department of Agriculture USDA asked the Committee on National Statistics to convene a panel of experts to provide advice for improving the data infrastructure on food consumption and nutrition The panel was charged to review data needs to support research and decision making for food and nutrition policies and programs in USDA and to assess the adequacy of the current data infrastructure and recommend enhancements to improve it The primary basis for the panel s deliberations given limited resources was a workshop on Enhancing the Data Infrastructure in Support of Food and Nutrition Programs Research and Decision Making which the panel convened on May 27 28 2004 This report is based on the discussions at the workshop and the deliberations of the panel The report outlines key data that are needed to better address questions related to food consumption diet and health discusses the available data and some limitations of those data and offers recommendations for improvements in those data The panel was charged to consider USDA data needs for policy making and the focus of the report is on those needs

**Human Ecology** Daniel G. Bates, Judith Tucker, 2010-03-29 This book arose from the need to develop accessible research based case study material which addresses contemporary issues and problems in the rapidly evolving field of human ecology Academic political and indeed public interest in the environmental sciences is on the rise This is no doubt spurred by media coverage of climate change and global warming and attendant natural disasters such as unusual drought and flood conditions toxic dust storms pollution of air and water and the like But there is also a growing intellectual awareness of the social causes of anthropogenic environmental impacts political vectors in determining conservation outcomes and the role of local representations of ecological knowledge in resource management and sustainable yield production This is reflected in the rapid increase of ecology courses being taught at leading universities in the fast growing developing countries much as was the case a decade or two ago in Europe and North America The research presented here is all taken from recent issues of Human Ecology An Interdisciplinary Journal Since the journal itself is a leading forum for contemporary research the articles we have selected represent a cross section of work which brings the perspectives of human

ecology to bear on current problems being faced around the world The chapters are organized in such a way to facilitate the use of this volume either to teach a course or to introduce an informed reader to the field *Direct and Indirect Human Contributions to Terrestrial Carbon Fluxes* National Research Council, Division on Earth and Life Studies, Board on Agriculture and Natural Resources, Stephanie Johnson, Rob Coppock, 2004-07-30 Human induced climate change is an important environmental issue worldwide as scientific studies increasingly demonstrate that human activities are changing the Earth's climate Even if dramatic reductions in emissions were made today some human induced changes are likely to persist beyond the 21st century The Kyoto Protocol calls for emissions reporting that separates out management induced changes in greenhouse gases from those changes caused by indirect human effects e g carbon dioxide fertilization nitrogen deposition or precipitation changes natural effects and past practices on forested agricultural lands This book summarizes a September 2003 workshop where leaders from academia government and industry came together to discuss the current state of scientific understanding on quantifying direct human induced change in terrestrial carbon stocks and related changes in greenhouse gas emissions and distinguishing these changes from those caused by indirect and natural effects *Routledge International Handbook of Food Studies* Ken Albala, 2013-05-07 Over the past decade there has been a remarkable flowering of interest in food and nutrition both within the popular media and in academia Scholars are increasingly using foodways food systems and eating habits as a new unit of analysis within their own disciplines and students are rushing into classes and formal degree programs focused on food Introduced by the editor and including original articles by over thirty leading food scholars from around the world the Routledge International Handbook of Food Studies offers students scholars and all those interested in food related research a one stop easy to use reference guide Each article includes a brief history of food research within a discipline or on a particular topic a discussion of research methodologies and ideological or theoretical positions resources for research including archives grants and fellowship opportunities as well as suggestions for further study Each entry also explains the logistics of succeeding as a student and professional in food studies This clear direct Handbook will appeal to those hoping to start a career in academic food studies as well as those hoping to shift their research to a food related project Strongly interdisciplinary this work will be of interest to students and scholars throughout the social sciences and humanities **U. S. Public Agricultural Research** David Schimmelpfening, 2010-02 Over the years proposals have recommended shifting the focus of public ag res from applied to basic research and giving higher priority to peer reviewed competitively funded grants The public ag res system in the U S is a Fed State partnership with most res conducted at State institutions In recent years State funds have declined USDA funds have remained fairly steady but funding from other Fed agencies and the private sector has increased Along with shifts in funding sources the proportion of basic res being undertaken within the public ag research system has declined This report focuses on the way public ag res is funded in the U S and how changes in funding sources over the last 25 years reflect changes in the type of res pursued
