Ecology And Empire Environmental History Of Settler Societies:

Ecology and Empire Tom Griffiths, Libby Robin, 1997 Ecology and Empire forged a historical partnership of great power and one which particularly in the last 500 years radically changed human and natural history across the globe This book scrutinizes European expansion from the perspectives of the so called colonized peripheries the settler societies It begins with Australia as a prism through which to consider the relations between settlers and their lands but moves well beyond this to a range of lands of empire It uses their distinctive ecologies and histories to shed new light on both the imperial and the settler environmental experience Ecology and Empire also explores the way in which the science of ecology itself was an artifact of empire drawing together the fields of imperial history and the history of science *Ecology and Empire* Tom Griffiths, Libby Robin, 1997 Reflects the growing awareness of the relationship between the expansion of empires and the environmental experience of the extra European world It provides a comparative historical approach to the impact of mankind on the ecological systems on which the settler societies were ultimately based **Humanities Research Centre** Glen St. John Barclay, Caroline Turner, 2004-05-01 A history of the HRC at the ANU but also an examination of the role and predicament of the humanities within universities and the wider community and contributes substantially to the ongoing debate on an Australian identity **Eco-Cultural Networks and the British Empire** James Beattie, Edward Melillo, Emily O'Gorman, 2014-12-18 19th century British imperial expansion dramatically shaped today's globalised world Imperialism encouraged mass migrations of people shifting flora fauna and commodities around the world and led to a series of radical environmental changes never before experienced in history Eco Cultural Networks and the British Empire explores how these networks shaped ecosystems cultures and societies throughout the British Empire and how they were themselves transformed by local and regional conditions This multi authored volume begins with a rigorous theoretical analysis of the categories of empire and imperialism Its chapters written by leading scholars in the field draw methodologically from recent studies in environmental history post colonial theory and the history of science Together these perspectives provide a comprehensive historical understanding of how the British Empire reshaped the globe during the 19th and 20th centuries This book will be an important addition to the literature on British imperialism and global ecological change *Defending The Little Desert* Libby Robin, 2015-09-08 In 1968 Sir William McDonald Victoria's Minister of Lands announced a rural settlement scheme for the Little Desert in Victoria's far north west The conservation campaign that ensued was one of unprecedented vehemence and sophistication It cost McDonald his parliamentary seat and consigned the Little Desert Settlement Scheme to oblivion The Little Desert dispute was a watershed in Australian environmental politics Suburban activists scientists amateur naturalists economists and bureaucrats banded together to oppose McDonald's ill conceived scheme It marked the beginning of a new consciousness of nature and the concept of biological diversity was voiced in the halls of parliament for the first time In *Defending the Little Desert* Libby Robin offers a sensitive account of the unlikely

coalition of forces that assembled to save the Little Desert This beautifully written account of the campaign perhaps the earliest expression of ecological consciousness in Australia will be read by all Australians interested in conservation and the environment in participatory political processes and in public science Decolonizing Nature William Adams,Martin Mulligan,2012-04-27 British imperialism was almost unparalleled in its historical and geographical reach leaving a legacy of entrenched social transformation in nations and cultures in every part of the globe Colonial annexation and government were based on an all encompassing system that integrated and controlled political economic social and ethnic relations and required a similar annexation and control of natural resources and nature itself Colonial ideologies were expressed not only in the progressive exploitation of nature but also in the emerging discourses of conservation At the start of the 21st century the conservation of nature is of undiminished importance in post colonial societies yet the legacy of colonial thinking endures What should conservation look like today and what indeed whose ideas should it be based upon Decolonizing Nature explores the influence of the colonial legacy on contemporary conservation and on ideas about the relationships between people politics and nature in countries and cultures that were once part of the British Empire It locates the historical development of the theory and practice of conservation at both the periphery and the centre firmly within the context of this legacy and considers its significance today It highlights the present and future challenges to conservationists of contemporary global neo colonialism The contributors to this volume include both academics and conservation practitioners They provide wide ranging and insightful perspectives on the need for and practical ways to achieve new forms of informed ethical engagement between people and nature Histories of the Borneo Environment Reed L. Wadley,2022-07-04 In light of the tremendous changes that have come to the island of Borneo in recent decades this volume takes a detailed historical look at the Borneo environment from native colonial and national perspectives It examines change and continuity in the economic political and social dimensions of human environment interactions Reflecting the increasingly multidisciplinary nature of environmental history the book brings together an international group of historians anthropologists geographers and social foresters all looking through a historical lens at the environment in the Malaysian states of Sabah and Sarawak and the Indonesian province of Kalimantan and Brunei Drawing on extensive archival research and fieldwork these ten original contributions encompass eleven centuries of history on Borneo examining interrelated topics that include long distance trade conservation land tenure resource access property rights perceptions of the environment migration and development policy and practice The chapters in this volume are extensively revised versions of selected papers presented at an international seminar on Environmental change in native and colonial histories of Borneo Lessons from the past prospects for the future held in Leiden under the auspices of the International Institute for Asian Studies **Environment and the Natural World: Oxford Bibliographies Online Research Guide** Oxford University Press,2010-06-01 This ebook is a selective guide designed to help scholars and students of the ancient world find reliable sources of information by directing them to the best available

The Oxford Handbook of Environmental History Andrew C. Isenberg, 2017 The Oxford Handbook of Environmental History draws on a wealth of new scholarship to offer diverse perspectives on the state of the field

Climate in Motion Deborah R. Coen, 2018-07-19 Today predicting the impact of human activities on the earth's climate hinges on tracking interactions among phenomena of radically different dimensions from the molecular to the planetary Climate in Motion shows that this multiscale multicausal framework emerged well before computers and satellites Extending the history of modern climate science back into the nineteenth century Deborah R Coen uncovers its roots in the politics of empire building in central and eastern Europe She argues that essential elements of the modern understanding of climate arose as a means of thinking across scales in a state the multinational Habsburg Monarchy a patchwork of medieval kingdoms and modern laws where such thinking was a political imperative Led by Julius Hann in Vienna Habsburg scientists were the first to investigate precisely how local winds and storms might be related to the general circulation of the earth's atmosphere as a whole Linking Habsburg climatology to the political and artistic experiments of late imperial Austria Coen grounds the seemingly esoteric science of the atmosphere in the everyday experiences of an earlier era of globalization Climate in Motion presents the history of modern climate science as a history of scaling that is the embodied work of moving between different frameworks for measuring the world In this way it offers a critical historical perspective on the concepts of scale that structure thinking about the climate crisis today and the range of possibilities for responding to it

Green Development W. M. Adams, 2003-09-02 This revised and updated new edition retains the clear and powerful argument which characterized the original It gives a valuable analysis of the theory and practice of sustainable development and suggests that at the start of the new millennium we should think radically about the challenge of sustainability Fully revised this latest edition includes further reading chapter outlines chapter summaries and new discussion topics and explores the roots of sustainable development thinking and its evolution in the last three decades of the twentieth century the dominant ideas within mainstream sustainable development the nature and diversity of alternative ideas about sustainability the problems of environmental degradation and the environmental impacts of development strategies for building sustainability

in development from above and below Offering a synthesis of theoretical ideas on sustainability based on the industrialized economies of the North and the practical applied ideas in the South which tend to ignore First World theory this important text gives a clear discussion of theory and extensive practical insights drawn from Africa Latin America and Asia **The Scots in South Africa** John M. MacKenzie, 2013-07-19 The description of South Africa as a rainbow nation has always been taken to embrace the black brown and white peoples who constitute its population But each of these groups can be subdivided and in the white case the Scots have made one of the most distinctive contributions to the country's history Now available in paperback this book is a full length study of their role from the eighteenth to twentieth centuries It highlights the interaction of Scots with African peoples the manner in which missions and schools were credited with producing Black Scotsmen and the ways in which they pursued many distinctive policies It also deals with the interweaving of issues of gender class and race as well as with the means by which Scots clung to their ethnicity through founding various social and cultural societies This book offers a major contribution to both Scottish and South African history and in the process illuminates a significant field of the Scottish Diaspora that has so far received little attention **The Interwar World**

Andrew Denning, Heidi J.S. Tworek, 2023-08-29 The Interwar World collects an international group of over 50 contributors to discuss analyze and interpret this crucial period in twentieth century history A comprehensive understanding of the interwar era has been limited by Euro American approaches and strict adherence to the temporal limits of the world wars The volume's contributors challenge the era's accepted temporal and geographic framings by privileging global processes and interactions Each contribution takes a global thematic approach integrating world regions into a shared narrative Three central questions frame the chapters First when was the interwar Viewed globally the years 1918 and 1939 are arbitrary limits and the volume explicitly engages with the artificiality of the temporal framework while closely examining the specific dynamics of the 1920s and 1930s Second where was the interwar Contributors use global history methodologies and training in varied world regions to decenter Euro American frameworks engaging directly with the usefulness of the interwar as both an era and an analytical category Third how global was the interwar Authors trace accelerating connections in areas such as public health and mass culture counterbalanced by processes of economic protectionism exclusive nationalism and limits to migration By approaching the era thematically the volume disaggregates and interrogates the meaning of the global in this era As a comprehensive guide this volume offers overviews of key themes of the interwar period for undergraduates while offering up to date historiographical insights for postgraduates and scholars interested in this pivotal period in global history

Pathways to the Present Mansel G. Blackford, 2018-03-31 Ranging from the Hawaiian Archipelago to the Aleutian Islands from Silicon Valley to Guam Pathways to the Present is a thoroughly researched and concisely argued account of economic and environmental change in the postwar American Pacific Following a brief survey of the history of the Pacific the author takes the Hawaiian Islands as the center of American activities in the region and looks at interactions among native

Hawaiian developmental military and environmental issues in the archipelago after World War II He then turns to land and water use problems that have intersected with more nebulous quality of life concerns to generate policy controversies in the Seattle region and the San Francisco Bay area especially Silicon Valley Economic expansion and environmentalism in Alaska are examined through the lens of changes occurring along the Aleutians From there the study considers Hiroshima after its destruction by the atomic bomb in 1945 looking at residents desire to combine urban planning concepts The author investigates the effort to remake Hiroshima as a high tech city in the 1990s an attempt inspired by the perceived success of Silicon Valley and postwar planning on Okinawa where American influences were particularly strong The final chapter takes into account issues raised on Guam regarding the growth of tourism and the use of the island for military purposes and links these to developments in the Philippines to the west and American Samoa to the south

Healing the Land and the Nation Sandra M. Sufian, 2008-11-15 A novel inquiry into the sociopolitical dimensions of public medicine Healing the Land and the Nation traces the relationships between disease hygiene politics geography and nationalism in British Mandatory Palestine between the world wars Taking up the case of malaria control in Jewish held lands Sandra Sufian illustrates how efforts to thwart the disease were intimately tied to the project of Zionist nation building especially the movement's efforts to repurpose and improve its lands The project of eradicating malaria also took on a metaphorical dimension erasing anti-Semitic stereotypes of the parasitic Diaspora Jew and creating strong healthy Jews in Palestine Sufian shows that in reclaiming the land and the health of its people in Palestine Zionists expressed key ideological and political elements of their nation building project Taking its title from a Jewish public health mantra Healing the Land and the Nation situates antimalarial medicine and politics within larger colonial histories By analyzing the science alongside the politics of Jewish settlement Sufian addresses contested questions of social organization and the effects of land reclamation upon the indigenous Palestinian population in a decidedly innovative way The book will be of great interest to scholars of the Middle East Jewish studies and environmental history as well as to those studying colonialism nationalism and public health and medicine

Rethinking Invasion Ecologies from the Environmental Humanities Jodi Frawley, Iain McCalman, 2014-02-24 Research from a humanist perspective has much to offer in interrogating the social and cultural ramifications of invasion ecologies The impossibility of securing national boundaries against accidental transfer and the unpredictable climatic changes of our time have introduced new dimensions and hazards to this old issue Written by a team of international scholars this book allows us to rethink the

impact on national regional or local ecologies of the deliberate or accidental introduction of foreign species plant and animal Modern environmental approaches that treat nature with naive realism or mobilize it as a moral absolute unaware or unwilling to accept that it is informed by specific cultural and temporal values are doomed to fail Instead this book shows that we need to understand the complex interactions of ecologies and societies in the past present and future over the Anthropocene in order to address problems of the global environmental crisis It demonstrates how humanistic methods and disciplines can be used to bring fresh clarity and perspective on this long vexed aspect of environmental thought and practice Students and researchers in environmental studies invasion ecology conservation biology environmental ethics environmental history and environmental policy will welcome this major contribution to environmental humanities
