Ecology, Law and Economics Nicholas Mercurio, Franklin A. López, Kristian P. Preston, 1994 This volume integrates the essentials of ecology with law and economics The authors evaluate the conventional remedies of environmental economics in the light of integrated perspective and look to alternative remedies for environmental problems Economic Dimensions in International Law Jagdeep S. Bhandari, Alan O. Sykes, 1997 Each of the chapters was presented at a conference in the spring of 1995 sponsored by Duquesne University and George Mason University Pref **Environmental Health Perspectives**, 1993 **Contingent Valuation** R. Carson, 2012-01-01 This major reference work the first of its kind provides a comprehensive and authoritative introduction to the large and growing literature on contingent valuation It includes entries on over 7 500 contingent valuation papers and studies from over 130 countries covering both the published and grey literatures This book provides an interpretive historical account of the development of contingent valuation the most commonly used approach to placing a value on goods not normally sold in the marketplace The major fields catalogued here include culture the environment and health application This bibliography is an ideal starting point for researchers wanting to find other studies that have valued goods or used techniques similar to those they are interested in For those wanting to conduct meta analyses the book will serve as an invaluable guide to source material For those wanting to conduct meta analyses the book will serve as an invaluable guide to source material In addition to the print edition we offer access for purchasers of the book to a website providing the contents of as a searchable Word document and in a variety of standard bibliographic database forms Contingent Valuation is an indispensable reference source for researchers scholars and policymakers concerned with survey approaches to the problem of environmental valuation **Resource and Environmental Economics** Anthony C. Fisher, 1981-11-30 This book presents the major themes of the economic literature on natural resources and the environment It is designed to bring the reader in part with the aid of a unified model of optimal resource use to the frontiers of the discipline using only elementary mathematical models Features special to exhaustible and renewable resources including the problems posed by market imperfections are treated as extensions of the basic model The theoretical discussion is enriched with examples and applications including a systematic investigation of the behaviour of resource reserves costs prices and substitution possibilities Substantial attention to environmental as well as extractive resources is a distinctive aspect of this book The author describes methods of estimating the environmental costs of resource development and other projects and presents some key empirical findings Policy instruments to protect the environment such as taxes subsidies marketable permits and direct controls are carefully analysed from a welfare theoretic point of view Bibliography of Agriculture, 1973 **Environmental Economics for Sustainable Growth** Anil Markandya, 2002 Written by individuals who have been involved in the Political Economy of the Environment program of the World Bank Institute this volume presents the economic tools used by the program to choose between policy and decision making

processes at macro sector and project levels for development programs The aim of the work is to integrate economy wide policies with the analytical tools for monetary valuation of environmental impacts After studying the relationship between policies laws regulations and the environment revealed and stated preference valuation methods are explored in terms of natural resources and the health impact of air pollution Annotation copyrighted by Book News Inc Portland OR

Encyclopedia of Energy, Natural Resource, and Environmental Economics ,2013-03-29 Every decision about energy involves its price and cost The price of gasoline and the cost of buying from foreign producers the price of nuclear and hydroelectricity and the costs to our ecosystems the price of electricity from coal fired plants and the cost to the atmosphere Giving life to inventions lifestyle changes geopolitical shifts and things in between energy economics is of high interest to Academia Corporations and Governments For economists energy economics is one of three subdisciplines which taken together compose an economic approach to the exploitation and preservation of natural resources energy economics which focuses on energy related subjects such as renewable energy hydropower nuclear power and the political economy of energy resource economics which covers subjects in land and water use such as mining fisheries agriculture and forests environmental economics which takes a broader view of natural resources through economic concepts such as risk valuation regulation and distribution Although the three are closely related they are not often presented as an integrated whole This Encyclopedia has done just that by unifying these fields into a high quality and unique overview The only reference work that codifies the relationships among the three subdisciplines energy economics resource economics and environmental economics Understanding these relationships just became simpler Nobel Prize Winning Editor in Chief joint recipient 2007 Peace Prize Jason Shogren has demonstrated excellent team work again by coordinating and steering his Editorial Board to produce a cohesive work that guides the user seamlessly through the diverse topics This work contains in equal parts information from and about business academic and government perspectives and is intended to serve as a tool for unifying and systematizing research and analysis in business universities and government **APAIS 1991: Australian public affairs information service** , Choice ,1996 **APAIS 1992: Australian public affairs information service** ,

Canadian Natural Resource and Environmental Policy, 2nd ed. Melody Hessing,Michael Howlett,Tracy Summerville,2011-11-01 In this new and updated edition the authors once again examine policy making in one of the most significant areas of activity in the Canadian economy natural resources and the environment and discuss the evolution of resource policies from the early era of exploitation to the present era of resource and environmental management Using an integrated political economy and policy perspective the book provides an analytic framework from which the foundation of ideological perspectives administrative structures and substantive issues are explored Departing from traditional approaches that emphasize a single discipline or perspective it offers an interdisciplinary framework with which to think through ecological political economic and social issues It also provides a multi stage analysis of policy making from agenda setting

through the evaluation process The integration of social science perspectives and the combination of theoretical and empirical work make this innovative book one of the most comprehensive analyses of Canadian natural resource and environmental policy to date Its illumination of the key elements of government policy making in this critical sector and its new outline of the evolution of the Kyoto Protocol makes it a useful textbook and resource for students of environmental and public policy policy makers and environmental organizations

Conflict and Cooperation on Trans-Boundary Water Resources Richard E. Just, Sinaia Netanyahu, 2012-12-06 This book demonstrates what the discipline of economics has to offer as support for analyzing cooperation on management of trans boundary water resources It also considers what the discipline of economics has to acquire to become a more effective contributor to trans boundary water resource management given political legal social physical scientific and ecological realities This book has its genesis in a symposium of the International Water and Resource Economics Consortium held at Annapolis Maryland April 13 16 1997 The symposium was organized by the editors and the book contains papers presented at the symposium with subsequent revisions The symposium brought together both economists and agency management personnel for the purpose of discussing not only how economic tools apply to trans boundary water management but also of identifying the obstacles to making such tools useful and informative to politicians and negotiators in public decision making roles

INTERNATIONAL VERSUS DOMESTIC TRANS BOUNDARY PROBLEMS Trans boundary water problems arise in many dimensions The two most important types of problems emphasized in this book are international and domestic interstate or interregional problems Cooperation on international problems is especially difficult because enforcement must be voluntary given the sovereignty of nations and the absence of an effective legal enforcement mechanism Agreements must be sustainable and self enforced if they are to have lasting benefits Every negotiating country must be convinced it will receive benefits before it gives its consent to cooperation In the absence of enforceable agreements trans boundary i e

Environmental Management in Development Michael E. Colby, 1990 In the past quarter century environmental management has increasingly become a concern of governments More recently the traditional split between developers and conservationists has begun to break down Conceptions of what is economically and technologically practical ecologically necessary and politically feasible are rapidly changing This report discusses the implications of five paradigms of environmental management in development The author notes that the remedial legalistic approach of environmental management is breaking down Instead interest in the more economically integrated approach of resource management has recently taken hold Several interdependent forces indicate that improving the economic management of pollution and resources may be a necessary but insufficient measure to create the conditions for sustainable development

The perception of tradeoffs between development and environmental quality persists in the present debate but its necessity is greatly exaggerated according to this paper Finally it is noted that paradigms may be impervious to evidence and institutions and societies too difficult to change Whether when and how these issues are resolved may be modern civilization's most significant test

Perspectives in International Economic Law Asif Qureshi, 2002-02-12 Economic activity Professor Qureshi insists is a visible manifestation of the human condition The laws that regulate it and develop its norms must be deeply human International economic law must be ever vigilant in its efforts to represent the economic needs of all strata of humanity It must not allow the cultural imperatives of any one group to predominate To investigate the validity of this deeply held conviction in May 2001 Professor Qureshi and the University of Manchester School of Law brought together a conference of major IEL scholars to elicit as broad a diversity of perspectives as possible This book well informed in its insight and far reaching in its implications grew out of that conference Issues and topics that arise in the course of the investigation include globalisation and its institutions the survival of the nation state the role of the International Court of Justice sustainable development developing countries and dispute settlement developing countries and trade negotiations regional integration human rights and the untouchability of IEL and the gender bias of basic IEL institutions and rules There are also clear presentations of specifically Marxist and Islamic perspectives and an analysis along lines of fairness as developed by Thomas Franck and John Rawls Perspectives in International Economic Law offers lawyers economists political scientists and policymakers a multifaceted multidisciplinary approach to one of the most vitally important human endeavours of our time While its immediate value and utility is apparent the depth of clear thinking it evinces on every page will keep it current for many years to come
