

The background of the book cover is a complex, abstract collage. It features a variety of organic, painterly textures in warm tones of ochre, sienna, and terracotta, interspersed with cooler patches of sage green and deep, velvety black. The composition is layered, with some elements appearing to float or overlap others, creating a sense of depth and movement. The overall effect is reminiscent of a modern, textured tapestry or a series of overlapping photographs that have been artistically manipulated.

**Sustainability and Spirituality** John E. Carroll, 2012-02-16 This groundbreaking book explores the inherent interconnectedness of sustainability and spirituality acknowledging the dependency of one upon the other John E. Carroll contends that true ecological sustainability in contrast to the cosmetic attempts at sustainability we see around us questions our society's fundamental values and is so countercultural that it is resisted by anyone without a spiritual belief in something deeper than efficiency technology or economics Carroll draws on the work of cultural historian and geologist Thomas Berry whose eco spiritual thought underlies many of the sustainability efforts of communities described in this book including particular branches of Catholic religious orders and the loosely organized Sisters of the Earth The writings of Native Americans on spirituality and ecology are also highlighted These models for sustainability not only represent the tangible link between ecology and spirituality but also more importantly a vision of what could be

*The Good in Nature and Humanity* Stephen R. Kellert, Timothy Farnham, 2013-04-10 Scientists theologians and the spiritually inclined as well as all those concerned with humanity's increasingly widespread environmental impact are beginning to recognize that our ongoing abuse of the earth diminishes our moral as well as our material condition Many people are coming to believe that strengthening the bonds among spirituality science and the natural world offers an important key to addressing the pervasive environmental problems we face The Good in Nature and Humanity brings together 20 leading thinkers and writers including Ursula Goodenough Lynn Margulis Dorion Sagan Carl Safina David Petersen Wendell Berry Terry Tempest Williams and Barry Lopez to examine the divide between faith and reason and to seek

a means for developing an environmental ethic that will help us confront two of our most imperiling crises global environmental destruction and an impoverished spirituality The book explores the ways in which science spirit and religion can guide the experience and understanding of our ongoing relationship with the natural world and examines how the integration of science and spirituality can equip us to make wiser choices in using and managing the natural environment The book also provides compelling stories that offer a narrative understanding of the relations among science spirit and nature Grounded in the premise that neither science nor religion can by itself resolve the prevailing malaise of environmental and moral decline contributors seek viable approaches to averting environmental catastrophe and more positively to achieving a more harmonious relationship with the natural world By bridging the gap between the rational and the religious through the concern of each for understanding the human relation to creation *The Good in Nature and Humanity* offers an important means for pursuing the quest for a more secure and meaningful world      *A Theology of Land* Christopher Gerard Sexton, 2019-07-01 On the face of things the spirituality of Australia's Aboriginals is hard to reconcile with a spirituality of Christian theology with its human centrism apt to a Son of God in Man made flesh in Jesus Christ Nevertheless this author Christopher Sexton a Sydney based lawyer drew on his deep Catholic theological beliefs and intense dialogue with Aboriginal elders to find a surprisingly common ground and in abundance The creation stories of each lay emphasis on humanity's stewardship for the search and its mystical riches Here is a book by a Christian lawyer who consulted widely and deeply with our First People's He found more in common between our distinct spiritualities than might be expected Proving once again that listening deeply to each other will often yield common ground      **Teaching Buddhism** Todd Lewis, Gary Delaney DeAngelis, 2017 Buddhist studies is a rapidly changing field of research constantly transforming and adapting to new scholarship This creates a problem for instructors both in a university setting and in monastic schools as they try to develop a curriculum based on a body of scholarship that continually shifts in focus and expands to new areas *Teaching Buddhism* establishes a dialogue between the community of instructors of Buddhism and leading scholars in the field who are updating revising and correcting earlier understandings of Buddhist traditions Each chapter presents new ideas within a particular theme of Buddhist studies and explores how courses can be enhanced with these insights Contributors in the first section focus on the typical approaches figures and traditions in undergraduate courses such as the role of philosophy in Buddhism Nagarjuna Yogacara Buddhism tantric traditions and Zen Buddhism They describe the impact of recent developments like new studies in the cognitive sciences on scholarship in those areas Part Two examines how political engagement and ritual practice have shaped the tradition throughout its history Focus then shifts to the issues facing instructors of Buddhism dilemmas for the scholar practitioner in the academic and monastic classroom the tradition's possible roles in teaching feminism and diversity and how to present the tradition in the context of a world religions course In the final section contributors offer stories of their own experiences teaching paying particular attention to the ways in which American

culture has impacted them They discuss the development of courses on American Buddhism using course material on the family and children the history and trajectory of a Buddhist Christian dialog and Buddhist bioethics environmentalism economic development and social justice In synthesizing this vast and varied body of research the contributors in this volume have provided an invaluable service to the field     Environmental Anthropology Today Helen Kopnina,Eleanor Shoreman-Ouimet,2011-08-05 This collection offers a wide ranging consideration of the field which illustrates how environmental anthropology can increase our understanding and help find solutions to environmental problems     Faith in America Charles H. Lippy,2006-09-30 Over the last 25 years there has been much talk of the presumed decline in religious participation in America In addition from the 1960s on surveys that mark the influence of religion in American life have shown a mixed response Many suggest that religion is losing influence in the culture as a whole others indicate that while organized religion may be experiencing challenges spirituality is on the upswing At the same time however there have been signs that religious life in the U S is extraordinarily healthy But religion in America has changed to be sure in a number of ways And it has changed us and our culture in return This timely set looks at the major forces that are changing the shape of religion in American life With an influx of immigrants from Asia Latin America and other regions the diversity of religion has grown to include Buddhism Hinduism Islam and other faiths Latin American and African American communities have experienced changes in the ways they practice their faith and in turn influence American culture in general Women have entered the clergy in record numbers and the push for allowing women and gays to enter the clergy in religions that limit or prohibit their roles is on the increase In addition gay couples are leading the same sex marriage movement and other social issues such as abortion stem cell research end of life care etc are still being debated Interest over how people actually live out their religion or spirituality has mushroomed in recent decades thanks in part to the information revolution and popular culture What folks do when they gather together to worship and where they come together has changed dramatically with the advent of the Internet and the role of sports in American life So much has changed and faith in America has become more important than ever as part of our culture our way of life and the way we relate to each other and the world around us The essays found in these pages shed light on our understanding of these transformations and help us comprehend the enormous role of religion in our society and in our world     Convergent Knowing Simon Appolloni,2018-11-16 Global environmental destruction growing inequality and the persistent poverty afflicting the majority of humans on the planet challenge Christian theorists theologians and ethicists in their pursuit of an ethical vision that is both environmentally sustainable and just for all of creation Too often their visions which start with traditional understandings of the Christian faith prevalent approaches to science or current ethical models are inadequate In Convergent Knowing Simon Appolloni proposes a new framework for ethical deliberation in which the epistemological lines between religion and science are somewhat blurred This framework opens up avenues to explore new paradigms for Christianity science and liberation while addressing interrelated questions

not always manifest within the religion science and ethics debates what kind of ethics what kind of science and what kind of Christianity do we need today and tomorrow when the liberation of countless subjects of creation is at stake Exploring and analyzing the work of Rosemary Radford Ruether Leonardo Boff Diarmuid O Murchu and Thomas Berry four Christian ethical thinkers who have borrowed from the natural sciences to unite a liberationist agenda with an environmental ethic

Convergent Knowing assists Christian thinkers struggling to integrate science environment liberation and their faith **The Greening of Faith** John E. Carroll,Paul Brockelman,2016-10-04 The recent release of Pope Francis s much discussed encyclical on the environment Laudato Si On Care for Our Common Home has reinforced environmental issues as also moral and spiritual issues This anthology twenty years ahead of the encyclical but very much in line with its agenda offers essays by fifteen philosophers theologians and environmentalists who argue for a response to ecology that recognizes the tools of science but includes a more spiritual approach one with a more humanistic holistic view based on inherent reverence toward the natural world Writers whose orientations range from Buddhism to evangelical Christianity to Catholicism to Native American beliefs explore ways to achieve this paradigm shift and suggest that the environment is not only a spiritual issue but the spiritual issue of our time *Encountering Life in the Universe* Chris Impey,Anna H. Marques,2016-06-13 This book aims to examine sustainability and spirituality philosophically with ethics as the balancing force The goal is to reveal the important intersection between sustainability and spirituality by using spirituality as the

invisible guiding hand in the quest for sustainability The editors and contributors examine old social and economics dilemmas from a new perspective in order to provide alternative approaches to economic and social development The enclosed contributions cover a broad range of topics such as sustainable development and human happiness contemporary spirituality environmental ethics and responsibility and corporate social responsibility In addition the title features real world case studies and discussion questions that inspire self reflection and theoretical and empirical deliberation in academic courses and business seminars Contemporary approaches to economic and social development have failed to address humankind's abiding need for spiritual growth For material development to be sustainable spiritual advancement must be seen as an integral part of the human development algorithm While the policy makers and governments can play their respective role each one of us has to consciously adopt spirituality and sustainability as a way of life This book will rely on the spiritual power of individuals to heal themselves and the environment Featuring interdisciplinary perspectives in areas such as science marine biology environmental policy cultural studies psychology philosophy ecological economics and ethics this book will provide extensive insights into the complimentary fields of spirituality sustainability and ethics

**Science and Religion** John F. Haught, 1995 Has science made religion intellectually implausible Does it rule out the existence of a personal God In an age of science can we really believe that the universe has a purpose And finally doesn't religion hold much of the blame for the present ecological crisis These questions form the nucleus of today's debate between science and religion This book is a guide for that debate identifying the questions isolating the issues and pointing to ways the questions can be resolved There are four possible ways says John F Haught that we can view the relationship between religion and science First they can stand in complete opposition the conflict position Or we can believe they are so different that conflict is impossible the contrast position A third approach holds that while science and religion are distinct each has important implications for the other A fourth way views them as different but mutually supportive

Gratitude for the Wild Nathaniel Van Yperen, 2019-06-17 Since the passage of the Wilderness Act of 1964 a hotly contested debate over the value of wilderness reveals cultural anxieties about an American society that has spurned limits Gratitude for the Wild explores how the wild known in wilderness raises our tolerance for mystery in the recognition of our limits and in the celebration of a God loved world that exceeds our grasping The idea of wilderness introduces questions about the balance between utility and appreciation and between enjoyment and restraint Wilderness is a nexus of competing and contested accounts of responsibility In conversation with the work of Doug Peacock Terry Tempest Williams James Gustafson and Martin Luther King Jr Nathaniel Van Yperen offers an original argument for how wilderness can evoke a vision of a good life in which creaturely limits are accepted in gratitude even in the face of ambiguity and mystery Through the theme of gratitude the book refocuses attention on the role of affection and testimony in ecological ethics and Christian ethics

 contributions on methodology in the academic study of religion of the development of his thinking over time and of his  
 intellectual commitment to a science of religion The work is divided into three parts The first part identifies pertinent  
 connections between religion religious studies and science and why reductionism in the academic study of religion when

 debates in the academic study of religion with particular reference to the place of belief understanding and meaning in the

 resistance can be overcome Finally two new essays are included a critique on The Preconceptions of a Science of Religion by
