Developing Ecological Consciousness Christopher Uhl, 2003-12-09 A second edition of this textbook is now available. Developing Ecological Consciousness offers an ecology based wonder filled initiation to the Universe and the Planet Earth. It examines the ways in which humans are damaging the Earth and their own bodies and spirits. The book presents paradigms, values and tools essential for both planetary and personal transformation.

Developing Ecological Consciousness Christopher Uhl, 2020-01-09 Developing Ecological Consciousness is a unique environmental studies textbook. Rather than working through a list of environmental problems, it aims to help students become aware of the awe and wonder of our planet, understand some of the challenges facing it, and explore possibilities for action and change. This text is invaluable for courses in a variety of disciplines including environmental studies, biology, sociology, and political science.

Learning Toward an Ecological Consciousness E. O'Sullivan, 2017-02-15 Transformative learning involves experiencing a deep structural shift in the basic premises of thought, feelings, and actions. It is a shift of consciousness that dramatically and permanently alters our way of being in the world. Such a shift involves our understanding of ourselves and our self-locations, our relationships with other humans and with the natural world, our understanding of relations of power in interlocking structures of class, race, and gender, our body-awarenesses, our visions of alternative approaches to living, and our sense of possibilities for social justice and peace and personal joy. The editors of this collection make several challenges to the existing field of transformative learning: the first is to theoreticians who have attempted to describe the nature of transformative learning without regard to the content of transformative learning. The editors argue that transformative learning theory cannot be constructed in a content-neutral or context-free way. Their second challenge, which assumes the importance of content for transformative learning, is to educators as practitioners. The editors argue that transformative learning requires new educational practices consistent with the content. Arts-based research and arts-based teaching/learning practices are one example of such new educational practices. Education for the soul or spiritual practices such as meditation or modified martial arts or indigenous peoples' forms of teaching/learning is another example. Each article in the collection presents a possible model of these new practices.

Ecological Film Theory and Psychoanalysis Robert Geal,2021-07-12 This book applies ecolinguistics and psychoanalysis to explore how films fictionalising environmental disasters provide spectacular warnings against the dangers of environmental apocalypse while highlighting that even these apparently environmentally friendly films can still facilitate problematic real world changes in how people treat the environment Ecological Film Theory and Psychoanalysis argues that these films exploit cinema s inherent Cartesian grammar to construct texts in which not only small groups of protagonist survivors but also vicarious spectators pleasurably transcend the fictionalised destruction The ideological nature of the lifeboats on which these survivors escape moreover is accompanied by additional elements that constitute contemporary Cartesian subjectivity such as class and gender binaries restored nuclear families individual as opposed to social responsibilities for disasters and so on The book conducts extensive analyses of these processes before considering alternative forms of filmmaking that might avoid the dangers of this existing form of storytelling The book s new ecosophy and film theory establishes that Cartesian subjectivity is an environmentally destructive symptom that everyday linguistic activities like watching films reinforce This book will be of great interest to students and scholars of film studies literary studies specifically ecocriticism cultural studies ecolinguistics and ecosophy Ecology and Democracy Freya Mathews,2017-06-28 What is the optimal political framework for environmental reform reform on a scale commensurate with the global ecological crisis How adequate are liberal forms of parliamentary democracy to face the challenges posed These are the questions pondered by the contributors to this volume *Learning Toward an Ecological Consciousness* Edmund O'Sullivan,Marilyn M. Taylor,2004-01-17 In their latest book Edmund O Sullivan and Marilyn Taylor highlight the pedagogical practices that foster transformation from our current way of thinking about our place in the world to an underlying ecological way of seeing and acting Learning Towards Ecological Consciousness offers the reader a selection of transformative practices that demonstrate in specific contexts the complex journey and contextual conditions that move us forward towards a deeper realization that we are part of the world around us holding a greater promise for deeper ecological awareness To this end thirteen chapters offer a rich array of practices in diverse life settings educational environments communities and workplaces and personal relationships Contributors and their material represent a range of cultures work setting and professions The aspect of O Sullivan and Taylor s new book that distinguishes it from other books in the field is its exploration of how consciousness can be transformed through practices experience and action *Ecology and the Sacred* Roy A.
