## **Ecology And Conservation Of Tasmanian Sphagnum Peatlands:**

**Ecology and Conservation of Tasmanian Sphagnum Peatlands** Jennie Whinam, 1989-01-01     Vegetation of Australian Riverine Landscapes Samantha Capon, Cassandra James, Michael Reid, 2016-04 Vegetation communities in Australia's riverine landscapes are ecologically, economically and culturally significant. They are also among the most threatened ecosystems on the continent and have been dramatically altered as a result of human activities and climate change. *Vegetation of Australian Riverine Landscapes* brings together for the first time the results of the substantial amount of research that has been conducted over the last few decades into the biology, ecology and management of these important plant communities in Australia. The book is divided into four sections. The first section provides context with respect to the spatial and temporal dimensions of riverine landscapes in Australia. The second section examines key groups of riverine plants while the third section provides an overview of riverine vegetation in five major regions of Australia including patterns, significant threats and management. The final section explores critical issues associated with the conservation and management of riverine plants and vegetation including water management, salinity, fire and restoration. *Vegetation of Australian Riverine Landscapes* highlights the incredible diversity and dynamic nature of riverine vegetation across Australia and will be an excellent reference for researchers, academics and environmental consultants.     *To Preserve Biodiversity (Readings from Conservation Biology)* David Ehrenfeld, 2009-07-01 This new series of readings from *Conservation Biology* gives easy access to some of the finest papers ever published in a range of important fields. *Readings in Conservation Biology* can make course preparation easy. It provides a ready-made collection of the best, most representative papers available in a format students can use. *Readings* will also be invaluable for researchers and academics needing an update in a specific subject area.     Journal of the Adelaide Botanic Gardens Adelaide Botanic Garden, 1989     **Vegetation of Tasmania** James B. Reid, 1999 *Blackstone's Civil Practice* provides authoritative expert description and analysis of the process of civil litigation in the county courts and in the High Court. This 2003 edition is up to date to mid-December 2002. It deals with all relevant cases newly reported since the 2002 edition. Cases concerning service, the new costs provisions and appeal procedures have been particularly significant to date but all areas of civil practice will be affected. The work provides the texts of all changes to the Civil Procedure Rules and practice directions, fees orders and relevant statutes together with the text of the new court guides for the Admiralty and Commercial Courts and the Patents Court. It sets out the law on civil procedure in 78 narrative chapters which follow the course of proceedings from pre-action protocols to enforcement of judgments.     Conservation Biology in Australia T. R. New, 2006 An introductory textbook for conservation biology that explains the issues facing Australia's unique environments and biota and the measures needed to protect them.     Australian Journal of Botany, 2001     Journal of the Royal Society of Western Australia Royal Society of Western Australia, 2005     **Altered Ecologies** Simon Haberle, Janelle Stevenson, Matthew Prebble, 2010-11-01 Like a star chart, this volume orientates the reader to the key issues

and debates in Pacific and Australasian biogeography palaeoecology and human ecology A feature of this collection is the diversity of approaches ranging from interpretation of the biogeographic significance of plant and animal distributional patterns pollen analysis from peats and lake sediments to discern Quaternary climate change explanation of the patterns of faunal extinction events the interplay of fire on landscape evolution and models of the environmental consequences of human settlement patterns The diversity of approaches geographic scope and academic rigor are a fitting tribute to the enormous contributions of Geoff Hope As made apparent in this volume Hope pioneered multidisciplinary understanding of the history and impacts of human cultures in the Australia Pacific region arguably the globe s premier model systems for understanding the consequences of humans colonization on ecological systems The distinguished scholars who have contributed to this volume also demonstrate Hope s enduring contribution as an inspirational research leader collaborator and mentor Terra Australis leave no doubt that history matters not only for land management but more importantly in alerting settler and indigenous societies alike to their past ecological impacts and future environmental trajectories **A Conservation**
