Toxic Sexual Politics Melina Packer, 2025-01-28 A bold expos of how the very foundation of toxicology has been contaminated by sexist and racist ideologies The first critical understanding of the field of toxicology from a feminist and antiracist perspective *Toxic Sexual Politics* asserts that the science of toxicants must be held accountable for the uneven distribution of toxic pollution along racial and sexual lines Drawing upon in depth interviews and extensive ethnographic and archival research including participant observations in toxicology classrooms conferences and laboratories Melina Packer urges environmental health advocates to place toxicant science within its masculinist militarist and eugenicist history *Toxic Sexual Politics* shows how the founding fathers of U S toxicology were ideologically aligned with the chemical industry inventing a science that could make chemicals safe as opposed to one that could adequately protect planetary health from toxicants hazards While many toxicologists today are critical of the chemical industry they continue to rely on the highly limited tools of toxicology as accurate measures of toxicity as do government regulators the courts and environmental advocates Unlike most critiques of the chemical industry and narratives of environmental health movements *Toxic Sexual Politics* refuses to take the science at face value By focusing on the sexist racist and ableist biases reinforced by toxicology Packer powerfully argues that this scientific discipline reproduces the very same white supremacist and heterosexist logics that generated environmental injustices in the first place The field of toxicology can explicitly confront chemical corporate power by building from queer feminist anti ableist and antiracist movements for environmental and reproductive justice

The Politics of Unsustainability Ingolfur Bluhdorn, Ian Welsh, 2013-10-18 Two decades after its launch by the UN Brundtland Commission the paradigm of sustainability seems to have reached its limits Whilst the concept figures more prominently in public debate and policy making than ever before the ecological footprint of advanced liberal consumer societies continues to grow and the forceful economic development of countries such as China and India reinforces concerns that the world is moving further away from rather than closer towards the ideal of sustainability Given the proven failure of ecological modernisation strategies to secure sustainability the traditional question How may our established lifestyles and socio economic practices be made more sustainable needs to be supplemented by a second equally important question How do advanced modern consumer democracies try and manage to sustain what is known to be unsustainable Put differently traditional research into the politics of sustainability needs to be supplemented by a new line of research into the politics of unsustainability Exploring the recent transformation of eco political discourses and a variety of ways in which the unfolding paradox of sustaining the unsustainable is being managed the present volume pioneers this new research agenda This book was previously published as a special issue of Environmental Politics
