Anderson, 2023-12-18 *The Nature of Church Camp An Environmental History of Outdoor Ministry 1945-1980* by Christopher W Anderson explores the mid twentieth century history of religious camps and retreat centers to provide new insights into the history of environmentalism in the United States Ecumenical Protestantism and the ecology movement both changed the calculus of American morality after World War II Through archival material case study visits and oral histories Anderson finds that these institutions often reacted to

ecological critiques with temperate but gradual reforms However camps and outdoor ministries by virtue of their natural settings and sizable acreage soon provided a new way to explore the history of spirituality and ecology moving away from the conference campus and using nostalgia for the frontier instead to make arguments about the meaning of the American nation and the value of democracy This new way of thinking was reflected throughout the camps and enthusiastically endorsed decentralized small group camping By examining the conduct of church camps and conferences before during and after the ecological era Anderson shows how environmental stewardship became the dominant paradigm for Protestant environmentalism why that is a flawed and fractious model and why it has stalled **The Ecology Book** DK,2019-04-02
