Economic and Financial Justification of Advanced Manufacturing Technologies Hamid R. Parsaei, W.G. Sullivan, T.R. Hanley, 2013-10-22 Competence in investment analysis is now a basic requirement for most practicing managers engineers and financial analysts in order to avoid possible serious mistakes arising from flawed or inadequate knowledge of the discipline Furthermore individuals who make decisions based on technical economics stake their professional futures in many cases on the accuracy of such evaluations The aim of this volume is to provide a balanced view of the essential components of economic and financial analysis including 1 Strategic and design issues 2 Principles of cost management systems and activity based costing and 3 Tools for developing the financial measures of investment worth with advanced topics and case studies in these three areas This volume provides a refreshing insight into the various methods that engineers managers and financial analysts may need to consider to find good alternatives for the investment of scarce resources Not only are new ventures presented but also improvements within existing facilities that include process modification product design equipment replacement and plant expansion contraction **Investment Decisions in Advanced** Manufacturing Technology Magdy G. Abdel-Kader, David Dugdale, Peter Taylor, 2018-12-20 First published in 1998 this volume was designed to lead to an operational model of Advanced Manufacturing Technology AMT decision making which incorporated the mathematics of fuzzy set theory. The rapid advancement of robotics automated technologies and software such as CAD and CAM have made such studies paramount Here analyses of a guestionnaire survey and field study of major UK manufacturing companies together provide a simulating portrayal of AMT investment decision making and have been expanded upon with a model using fuzzy set theory **Economic Evaluation of Advance Technologies** Jerome P. Lavelle, Hampton R Liggett, Hamid R. Parsaei, 2001-12-14 This text illuminates the contemporary issues and technologies related to the economic evaluation and justification of advanced technologies Included are modern tools as well as application based cases that demonstrate the use of these tools Students researchers and decision makers will benefit from Economics of Advanced Manufacturing Systems Hamid R. Parsaei, A. Mital, 2012-12-06 The this useful resource 1980s have witnessed a tremendous growth in the field of computer integrated manufacturing systems. The other major areas of development have been computer aided design computer aided manufacturing industrial robotics automated assembly cellular and modular material handling computer networking and office automation to name just a few These new technologies are generally capital intensive and do not conform to traditional cost structures. The net result is a tremendous change in the way costs should be estimated and economic analyses performed. The majority of existing engineering economy texts still profess application of traditional analysis methods But as was men tioned above it is clear that the basic trend in manufacturing industries is itself changing So it is quite obvious that the practice of traditional economic analysis methods

should change too This book is an attempt to address the various issues associated with non traditional methods for evaluation of advanced computer integrated technologies This volume consists of twenty refereed articles which are grouped into five parts Part one Economic Justification Methods consists of six articles In the first paper Soni et at present a new classification for economic justification methods for advanced automated manufacturing systems In the second Henghold and LeClair look at strengths and weaknesses of expert systems in general and more specifically an application aimed at investment justification in advanced technology The third paper by Carrasco and Lee proposes an enhanced economic methodology to improve the needs analysis conceptual design and de tailed design activities associated with technology modernization Computer Integrated Manufacturing (CIM) in Japan V. Sandoval, 2016-07-29 Presented in this book are some of the most relevant aspects of Computer Integrated Manufacturing CIM in Japan The volume compares the development of CIM in the context of Japan as well as that of Europe and the United States It includes studies of the implemented CIM systems in many companies In addition the book contains a study concerning Intelligent Manufacturing Systems IMS and the basis for preparation of the so called Future Generation of Manufacturing Systems FGMS This volume gives a better understanding of Japanese competitiveness using advanced technology People coming from the manufacturing industry managers engineers officials and researchers will find in this book a rich source of material for understanding the Planning, Design, and Analysis crucial elements in technology development and its actual and future implementation of Cellular Manufacturing Systems A.K. Kamrani, H.R. Parsaei, D.H. Liles, 1995-04-11 Leading researchers in the field of cellular manufacturing systems from academia and industry have contributed to this volume The book aims to report the latest developments and address the central issues in the design and implementation of cellular manufacturing systems Cellular Manufacturing CM is one of the major concepts used in the design of flexible manufacturing systems CM also known as group production or family programming can be described as a manufacturing technique that produces families of parts within a single line or cell of machines The first part of the book describes various techniques for design and modeling of cellular manufacturing systems The second part is concerned with performance measure and analysis followed by a section which presents the applications of artifical intelligence and computer tools in cellular manufacturing systems Flexible Manufacturing Systems: Recent Developments A. Raouf, M. Ben-Daya, 1995-02-09 Flexible Manufacturing Systems FMS involve substituting machines capable of performing a wide and redefinable variety of tasks for machines dedicated to the performance of specific tasks FMS can also be programmed to handle new products thus extending the machines life cycles Thus they represent a change from standardized goods produced by customized machines to customized goods produced by standardized machines This volume contains new and updated material in this field and will be of great interest to researchers managers and students concerned with problems related to flexible manufacturing systems Advances in Factories of the Future, CIM and Robotics M. Cotsaftis, F. Vernadat, 2013-10-22 Productivity enhancement is a major concern

for all manufacturing enterprises Productivity enhancement can be achieved in many ways and many facets of its problems have been investigated over the last decades A number of methods tools and technologies have emerged to efficiently increase productivity and rationalize management of manufacturing enterprises International experts from both academia and industry share their experiences in this collection of articles contributing to the latest advances in the many facets of productivity enhancement in manufacturing enterprises Themes and visions are detailed on factories of the future new management approaches manufacturing system integration and manufacturing information systems These technical areas can be grouped into four major sections Factories of the future Techniques and tools for automated manufacturing Robotics and Industrial applications The papers illustrate a pattern of valuable and interesting approaches to the fascinating problem of designing a new generation of robots with high enough performance capabilities to be used in an industrial context

Advances in Feature Based Manufacturing J.J. Shah,M. Mäntylä,D.S. Nau,2013-10-22 Well known researchers in all areas related to featured based manufacturing have contributed chapters to this book Some of the chapters are surveys while others review a specific technique All contributions including those from the editors were thoroughly refereed The goal of the book is to provide a comprehensive picture of the present stage of development of Features Technology from the point of view of applications in manufacturing The book is aimed at several audiences Firstly it provides the research community with an overview of the present state of the art features in manufacturing along with references in the literature Secondly the book will be useful as supporting material for a graduate level course on product modeling and realization Finally the book will also be valuable to industrial companies who are assessing the significance of features for their business

Manufacturing Decision Support Systems Hamid R. Parsaei, Thomas R. Hanley, S.S. Kolli, 2012-12-06 During the last two decades a tremendous growth in the popularity and applications of computers in manufacturing has occurred Computer aided design computer aided manufacturing flexible manufacturing systems group technology and many others are considered by many manufacturing executives as the most promising technologies and philosophies that if successfully implemented can reduce costs and enable the US manufacturing companies to become more competitive in the global market In the computer integrated manufacturing environ ment the decision processes are often more involved The decision makers are frequently required to have access to a vast amount of data to support and analyze their complex decision problems at strategic and tactical levels Decision support systems are often referred to as computer based information technologies that allow the decision makers to interactively communicate and solve the decision problems Manufacturing Decision Support Systems is intended to report the latest developments and address the central issues in this area This volume consists of 14 refereed chapters written by leading researchers from academia and industry
