domains through various mechanisms largely related to claims of legitimacy The study is grounded in new institutional theory and the interview and case study data provide a richness and depth in showing the dynamics of reform attempts Professor Lawrence J Saha Australian National University Canberra This book discusses the dynamics of educational decentralisation in post reform Indonesia Taking sociology s new institutionalism approach and drawing upon data from documents and interviews with strategic informants the book investigates how institutional legitimacy of educational decentralisation was garnered manipulated and then contested Besides analysing global institutional pressures which influenced the national adoption of decentralisation reform and the central government s attempts to restore its legitimacy the book also offers comparative case studies of education governance in two local districts to highlight how this reform is responded to at the local level

The African Journal of Finance and Management , 2003 *Eliminating Human Poverty* Santosh Mehrotra, Enrique Delamonica, 2008-02-29 This book focuses on the provision of basic social services in particular access to education health and water supplies as the central building blocks of any human development strategy The authors concentrate on how these basic social services can be financed and

delivered more effectively to achieve the internationally agreed Millennium Development Goals Their analysis which departs from the dominant macro economic paradigm deploys the results of broad ranging research they led at UNICEF and UNDP investigating the record on basic social services of some 30 developing countries In seeking to learn from these new data they develop an analytical argument around two potential synergies at the macro level between poverty reduction human development and economic growth and at the micro level between interventions to provide basic social services Policymakers they argue can integrate macro economic and social policy Fiscal monetary and other macro economic policies can be compatible with social sector requirements They make the case that policymakers have more flexibility than is usually presented by orthodox writers and international financial institutions and that if policymakers engaged in alternative macro economic and growth oriented policies this could lead to the expansion of human capabilities and the fulfillment of human rights This book explores some of these policy options The book also argues that more than just additional aid is needed Specific strategic shifts in the areas of aid policy decentralized governance health and education policy and the private public mix in service provision are a prerequisite to achieve the goals of human development The combination of governance reforms and fiscal and macro economic policies outlined in this book can eliminate human poverty in the span of a generation
