The Economic Effects of Restrictions on Government Budget Deficits Christian Ghiglino, Karl Shell, 1998 In overlapping generations economies with perfect financial markets and lumpsum taxation restrictions on the government budget deficits do not limit the set of achievable allocations For economies in which tax instruments are distortionary and limited in number deficits are irrelevant only in the unrealistic case in which the number of tax instruments is large relative to the number of policy goals In particular if the government can use only anonymous consumption taxes then achieving the prescribed deficits without changing the equilibrium allocation will typically be impossible when the number of consumers exceeds the number of commodities A similar result holds if consumer credit is exogenously restricted Surprisingly in this case distortionary taxes may be more likely than lump sum taxes to lead to the irrelevance of government deficits Journal of Economic Literature Classification Numbers D51 D91 E32 Keywords Balanced Budget Balanced Budget Amendment Burden of the Public Debt Comparative Statics Consumption Taxes Credit Restrictions Distortionary Taxes Economic Policy Government Budget Deficit Maastricht Treaty Optimal Taxation Overlapping Generations Modernizing Government Budget Administration Public Administration Service, 1962 **Handbook of Public Budgeting** Jack Rabin, 1992-02-26 The Handbook is organized around two major themes the budget process and budgeting fundamentals Each chapter is a bibliographical treatise providing an in depth overview of a major subfield of the discipline The first section of the volume on the budget process presents background theories history **Economics, Politics and Budgets** C.
