The Founding of Institutional Economics Warren Samuels, 2002-01-08 Institutional economics has been a major part of economic thought for the whole of the twentieth century and today remains crucial to an understanding of the development of heterodox economics. The two principal publications that founded the school were Veblen's *The Theory of the Leisure Class* and Commons's *A Sociological View of Sovereignty* both published in 1899. As a tribute to these two seminal works Warren Samuels has assembled an exceptionally prestigious international group of scholars to produce this landmark volume celebrating the centenary. The chapters assess the work of Veblen and Commons and their influence on the school of institutional economics from a variety of theoretical perspectives. The contributions on Veblen appraise his anthropological analysis of consumption habits of American households from sociological, linguistic and feminist points of view. Conversely the essays on Commons's work focus on the concepts of property, power and the relationship between legality and economics.

This book will be vital reading for historians of economic thought, economic methodologists as well as those economists with an interest in the overall development of their discipline. **Economics in**

Russia Joachim Zweynert, 2016-04-29 The history of Russian economic ideas from the sixteenth century to contemporary times is a fascinating, tumultuous yet neglected topic among Western scholars. Whilst over the last 15 years increasing amounts of work have been done on the subject, co-operation between Russian and Western researchers in this field leaves much to be desired. In order to improve this situation this volume unites Russian and non-Russian researchers together to provide an overview of the current state of the topic and to give a stimulus for further research. Bringing together scholars from the UK, Germany, Japan, Australia, Finland and Russia, the collection puts forward differing yet complimentary perspectives on the long-term history of Russian economic ideas. Offering a broad collection of articles covering the period from the seventeenth to the twentieth centuries, authors have approached the subject from diverse theoretical angles. Contributions in the tradition of Blaug and Schumpeter focusing on economic analysis in a narrower sense and contributions that in line with authors like Pribram or Perlman, McCann deal with economic thought in the context of history and culture are all represented. In terms of content the editors have encouraged approaches that represent different economic traditions in order to encourage a diversity of opinions on the national development of Russian economics. As such the volume offers a broad and very relevant assessment of the subject for both historians and economists alike. *Classics and Moderns in*
