Economic Geology Geotectonics:

Economic Geology and Geotectonics Donald Harvey Tarling, 1981 *The Economic Geology of the Non-metallic Minerals* James Furman Kemp, 1903 **Economic Geology**, 1923 *Introduction to Ore-Forming Processes* Laurence Robb, 2013-05-03 *Introduction to Ore Forming Processes* is the first senior undergraduate postgraduate textbook to focus specifically on the multiplicity of geological processes that result in the formation of mineral deposits. It opens with an overview of magmatic ore forming processes, moves systematically through hydrothermal and sedimentary metallogenic environments, covering as it does the entire gamut of mineral deposit types including the fossil fuels and supergene ores. The final chapter relates metallogeny to global tectonics by examining the distribution of mineral deposits in space and time. Boxed examples of world famous ore deposits are featured throughout, providing context and relevance to the process oriented descriptions of ore genesis. Brings the discipline of economic geology back into the realm of conventional mainstream earth science by emphasizing the fact that mineral deposits are simply one of the many natural wonders of geological process and evolution.
