Research in Economic History Christopher Hanes, Susan Wolcott, 2013-01-30 Volume 29 contains articles on the economic history of Europe and the U S including Understanding Aging During the Epidemiologic Transition by Suchit Arora Estimating French Regional Income Departmental Per Capita Gross Value Added 1872 1911 by Paul Caruana Galizia Improve and Sit

The Transition to Capitalism in Modern France Xavier Lafrance, Stephen Miller, 2023-11-03 Historians since the 1960s argue that the French economy performed as well as did any economy in Europe during the eighteenth and nineteenth centuries thanks to the opportunities for profit available on the market especially the large consumer market in Paris Whatever economic weaknesses existed did not stem from the social structure but from exogenous forces such as wars the lack of natural resources or slow demographic growth This book challenges the foregoing consensus by showing that the French economy performed poorly relative to its rivals because of noncapitalist social relations Specifically peasants and artisans controlled lands and workshops in autonomous communities and did not have to improve labor productivity to survive Merchants and manufacturers cornered markets instead of being subject to the market s competitive imperatives Thus distinctive features of capitalism primitive accumulation the dispossession of peasants and artisans and the competitive obligation faced by merchants and manufacturers to reinvest profits in order to keep the profits did not prevail until the state imposed them in a process lasting for a century after the 1850s For this reason it was not until the 1960s that France caught up to and in some cases surpassed its economic rivals

A Social History of France 1780-1914 Peter McPhee, 2017-03-03 This volume provides a lively and authoritative synthesis of recent work on the social history of France and is now thoroughly updated to cover the long nineteenth century from 1789 1914 Peter McPhee offers both a readable narrative and a distinctive coherent argument about this remarkable century and explores key themes such as Peasant interaction with the environment The changing experience of work and leisure The nature of crime and protest Changing demographic patterns and family structures The religious practices of workers and peasants The ideology and internal repercussions of colonisation At the core of this social history is the exercise and experience of social relations of power not only because in these years there were four periods of protracted upheaval but also because the history of the workplace of relations between women and men adults and children is all about human interaction Stimulating and enjoyable to read this indispensable introduction to nineteenth century France will help readers to make sense of the often bewildering story of these years while giving them a better understanding of what it meant to be an inhabitant of France during that turbulent time

Big Business and Industrial Conflict in Nineteenth-Century France Lenard R. Berlanstein, 2023-11-15 Founded in 1855 the Parisian Gas Company PGC quickly developed into one of France s greatest industrial enterprises an exemplar of the new industrial capitalism that was beginning to transform the French economy The PGC supplied at least half the coal gas consumed in France through the 1870s and became the city s single largest employer of clerical and factory labor Representing a new

form and scale of capitalistic endeavor the firm's history illuminates the social tensions that accompanied the nation's industrialization and democratization To study the company over its fifty year life is to see industrializing France writ small Using previously untapped company archives Lenard R Berlanstein has written a rich and detailed study that skillfully bridges the divide between business social and labor history Founded in 1855 the Parisian Gas Company PGC quickly developed into one of France's greatest industrial enterprises an exemplar of the new industrial capitalism that was beginning to transform the French economy The PGC supplied at least half the coal

Themes in Modern European History 1780-1830 Pamela Pilbeam, 2012-08-21 Themes in Modern European History 1780 1830 is an authoritative and lively exploration of a period dominated by events which have shaped modern Europe In a series of articles six leading academics present some controversial conclusions the east west contrast in Europe today has more to do with responses to the French Revolution of 1789 than the Russian Revolution of 1917 the conservative Europe of 1814 was the product of the Romantic imagination not a Restoration of the old regime Spanning political social economic and demographic facets of revolutions this is an indispensable textbook for all students of the nineteenth century and for all those interested in understanding the nature of Europe today *Bibliography of European Economic and Social History* Derek Howard Aldcroft, Richard Rodger, 1984 A reference guide to the literature in English for teachers and students of modern European economic and social history The bibliography covers writings on the period 1700 to 1939 and includes most of the literature published in the 20th century and a small selection of still important earlier 19th century writings The selection is confined largely to books and articles and each entry includes date of publication publisher and place of publication in the case of books and the volume number and year of publication for articles Geographically the volume encompasses the whole of continental Europe including Turkey Distributed in the US and Canada by St Martin's Press Annotation copyright by Book News Inc Portland OR [Economic History](#) Richard S. Tedlow, 2001 This volume is a comprehensive collection of critical essays on *The Taming of the Shrew* and includes extensive discussions of the play's various printed versions and its theatrical productions Aspinall has included only those essays that offer the most influential and controversial arguments surrounding the play The issues discussed include gender authority female autonomy and unruliness courtship and marriage language and speech and performance and theatricality

A Nation of Deadbeats Scott Reynolds Nelson, 2013-06-04 Pundits will argue that the 2008 financial crisis was the first crash in American history driven by consumer debt But in this spirited highly engaging account Scott Reynolds Nelson demonstrates that consumer debt has underpinned almost every major financial panic in the nation's history From William Duer's attempts to profit off the country's post Revolutionary War debt to an 1815 plan to sell English coats to Americans on credit to the debt fueled railroad expansion that precipitated the 1857 crash in each case the chain of banks brokers moneylenders and insurance companies that separated borrowers and lenders made it impossible to distinguish good loans from bad Bound up in this history are stories of national banks funded by smugglers

fistfights in Congress over the gold standard America's early dependence on British bankers and how presidential campaigns were forged in controversies over private debt An irreverent wholly accessible eye opening book *The Long Wave in the World Economy* Andrew Tylecote, 2013-09-13 Long waves are cycles of some fifty years duration in which a period of rapid expansion is followed by one of slow growth or stagnation This book provides a critical examination of long wave theory and an original explanation of long fluctuations which is highly relevant to the current crisis in the world economy *Clinical Lectures on Diseases of the Nervous System* J-M. Charcot, 2013-12-19 Originally published in 1991 as part of the Tavistock Classics in the History of Psychiatry series this re edition of J M Charcot's Clinical Lectures on Diseases of the Nervous System provides a unique opportunity to examine the work of one of the last century's most controversial and admired physicians Widely esteemed for his work in neuropathology Charcot was also an innovator in the study of hysteria making important contributions to its study in both women and men The Clinical Lectures reproduced here are especially important for two key reasons First they provide insight into Charcot's often neglected study of male hysteria especially traumatic shock as well as hysteria among children Secondly they give an opportunity to examine his clinical method and style His presentations and scholarly compilations greatly influenced an entire generation of French and other physicians interested in the study of the unconscious during the turn of the century The introduction which precedes the work places the volume in its social political and historical context It highlights the key features of the historiographical debate surrounding Charcot which ranges in scope from the social and intellectual history of the Third Republic through that of early psychoanalysis It then proceeds with an examination of the key themes both substantive and methodological underlying Charcot's researches providing both a general entrance into the history of medicine and society in this period as well as an explication du texte which carefully analyses the lectures themselves **The Political Economy of Indigo in India, 1580-1930** Ghulam A. Nadri, 2016-07-11 In *The Political Economy of Indigo in India 1580-1930 A Global Perspective* Ghulam A Nadri explores the dynamics of the indigo industry and trade from a long term perspective and examines the local and global forces that affected the potentialities of production in India and elsewhere and caused periods of boom and slump in the industry Using the commodity chains conceptual framework he examines the stages in the trajectory of indigo from production to consumption Nadri shows convincingly that the growth or decline in indigo production and trade in India was a part of the global processes of production trade and consumption and that indigo as a global commodity was embedded in the politics of empire and colonial expansion *Institutional Competition between Common Law and Civil Law* Michèle Schmiegelow, Henrik Schmiegelow, 2014-05-27 This book addresses two countervailing challenges to theory and policy in law and economics The first is the rise of legal origins theory which denies the comparative law view of convergence between common law and civil law by the assertion of an economic superiority of common law The second is the series of economic crises in the very financial markets on which that assertion was based Both trends unsettled certainties about the rule of law

and institutional economics Meeting legal origins theory in its main areas of political science sociology and economics the book extends the interdisciplinary reach to neglected aspects of comparative law legal history dynamic econometric analysis and quasi natural experiments with counterfactual evidence of different institutional regimes in divided countries These combined methodological tools make tests of the economic impact of different legal origins much more reliable This is shown for developed and newly industrialized countries as well as developing transforming and emerging countries with or without financial center advantage affected or not by financial crises The Asian financial crises and the American subprime crisis have been or could have been resolved using the resources of common law or civil law These cases and data on access to justice in Africa Asia and Latin America reveal the problem of substantive law remaining law on the books without efficient procedural rules and judicial structures The single most striking common law civil law divide is that lawyer dominated common law procedure is slower and costlier than judge managed civil law procedure Countries as diverse as the Netherlands Japan and China show functional interaction between culture and law in legal reforms Such interaction can reduce the occurrence of legal disputes as well as facilitate their resolution It can use economic crises as catalysts for legal reforms or rely on regional integration and it should replace the discredited method of legal transplants by sustained dialogue between legal advisors and all actors involved in legal reforms

Specific Performance in German, French and Dutch Law in the Nineteenth Century Janwillem Oosterhuis, 2011-04-06 The current French German and Dutch Law of Contract each offer a remedy of specific performance to creditors suffering from breach of contract This book analyses the alterations to this remedy during the nineteenth century on the substantive procedural and enforcement levels Fascinatingly there is a link between changes to the remedy and the development of early human rights and the mass industrialisation of society The latter had the effect of actually converging the national remedies of specific performance in the examined systems damages and rescission became more accessible as remedies at the cost of specific performance The book demonstrates the interdependency between law and society and provides vital background information to the harmonisation of a controversial concept in the European Law of Obligations Studies in the History of Private Law vol 2 [Empires and Colonies](#) Jonathan Hart, 2014-02-06 Empires and Colonies provides a thoroughgoing and lively exploration of the expansion of the seaborne empires of western Europe from the fifteenth century and how that process of expansion affected the world including its successor the United States Whilst providing special attention to Europe the book is careful to highlight the ambivalence and contradiction of that expansion The book also illuminates connections between empires and colonies as a theme in history concentrating on culture while also discussing the rich social economic and political dimensions of the story Furthermore Empires and Colonies recognizes that whilst a study of the expansion of Europe is an important part of world history it is not a history of the world per se The focus on culture is used to assert that areas and peoples that lack great economic power at any given time also deserve attention These alternative voices of slaves indigenous peoples and critics of

empire and colonization are an important and compelling element of the book *Empires and Colonies* will be essential reading not only for students of imperial history but also for anyone interested in the makings of our modern world *The 1848 Revolutions* Peter Jones, 2013-11-14 In 1848 revolutions broke out all over Europe in France the Habsburg and German lands and the Italian peninsula This Seminar Study considers why the revolutions occurred and why they were so widespread The book offers a broad ranging investigation of the social economic and political circumstances which led to the revolutions of 1848 as well as an account of the revolutions themselves First published in 1981 and fully revised in 1991 the study has long established itself as one of the most accessible and valuable introductions to this complex subject Structures in the Stream Todd Shallat, 2010-07-22 As the Mississippi and other midwestern rivers inundated town after town during the summer of 1993 concerned and angry citizens questioned whether the very technologies and structures intended to tame the rivers did not in fact increase the severity of the floods Much of the controversy swirled around the apparent culpability of the U S Army Corps of Engineers the builder of many of the flood control systems that failed In this book Todd Shallat examines the turbulent first century of the dam and canal building Corps and follows the agency's rise from European antecedents through the boom years of river development after the American Civil War Combining extensive research with a lively style Shallat tells the story of monumental construction and engineering fiascos public service and public corruption and the rise of science and the army expert as agents of the state More than an institutional history *Structures in the Stream* offers significant insights into American society which has alternately supported the public works projects that are a legacy of our French heritage and opposed them based on the democratic individualist tradition inherited from Britain It will be important reading for a wide audience in environmental military and scientific history policy studies and American cultural history *Alabama Historian*, 1980 **The Land of France 1815-1914** Hugh D. Clout, 2017-07-06 This book first published in 1983 attempts to examine the rural change in France between 1815 and 1914 with a sustained and explicit spatial approach This volume represents a position in which space and time are meshed in an analysis of the forces underlying land use and other changes that have contributed much to the making of the French landscape In this book the shift from the rural economy towards the urban markets in this period is examined thoroughly using the vast statistical record of cadastral surveys and agricultural enquiries as well as contemporary reports and agricultural journals The detailed mapping of historical data is a major feature of the treatment As a scholarly account of a major topic in historical geography *The Land of France 1815 1914* should appear to all students and researchers with interests in historical and rural geography and economic history and especially those specialising in European studies **Capital, Race and Space, Volume I** Richard Saull, 2023-05-15 In this first volume of *Capital Race and Space* Richard Saull offers an international historical sociology of the European far right from its origins in the 1848 revolutions to fascism Providing a distinct and original explanation of the evolution and mutations of the far right Saull emphasizes its international causal dimensions through the prism of uneven

and combined development Focusing on the twin political and economic transformations that dominated the second half of the nineteenth century the book discusses the connections between class race and geography in the evolution of far right movements and how the crises in the development of a liberal world order were central to the advance of the far right ultimately helping to produce fascism Volumes I and II of Capital Race and Space were shortlisted for the 2024 BISA IPEG book prize for best book published in the field of IPE in 2023 and subsequently recognised by the IPEG Book Prize Committee as Highly Commended The shortlisted books represent the very best of IPE scholarship cutting across disciplinary boundaries and addressing timely topics Convergence or Divergence? Jeremy Black, 1994-04-12 Relations with Continental Europe have been a central issue in British history Several crucial questions can be identified first how similar or dissimilar was Britain to other European countries in respect of its economy and political culture secondly how far can similarity and difference be understood in terms of convergence and divergence or of roughly parallel tracks reflecting and sustaining longstanding differences thirdly did British people feel themselves to be Europeans fourthly did the British people take an informed and sympathetic interest in what was happening on the Continent or did their ignorance of Europe lead to insularity and xenophobia and fifthly to what extent was the British stage and Britain as a whole involved in the affairs of Europe diplomatically militarily economically culturally This wide ranging thoughtful and provocative study tackles these questions from the late Iron Age to the current debate about European integration It is at once an important contribution to British history and a crucial work for those seeking to understand Britain s past and present position in Europe
