## **Economics And Ethics Of Long Term Care And Disability:**

*The Economics and Ethics of Long-term Care and Disability* Sean Sullivan, Marion Ein Lewin, 1988      **Long-term Care and Access to Health Care** United States. Congress. Pepper Commission, 1990      **Gerontological Nursing** Mary M. Burke, Susan Sherman, 1993 This book makes a compelling argument for an immediate and comprehensive shift in the nursing education curriculum from an acute care to a gerontological nursing care focus It is important reading for deans and faculty in schools of nursing administrators in long term care facilities and community health agencies and for practicing nurses caring for the elderly      Improving the Measurement of Late-Life Disability in Population Surveys National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Population, Committee on National Statistics, 2009-11-29 Improving the Measurement of Late Life Disability in Population Surveys summarizes a workshop organized to draw upon recent advances to improve the measurement of physical and cognitive disability in population surveys of the elderly population The book questions whether or not the measures of activities of daily living and instrumental activities of daily living used in many population surveys are sufficient as the primary survey based indicators of late life disability If not should they be refined or should they be supplemented by other measures of disability in surveys If yes in what ways should disability measures be changed or modified to produce population estimates of late life disability and to monitor trends The book also discusses what further research is needed to advance this effort      The Second Fifty Years Institute of Medicine, Division of Health Promotion and Disease Prevention, 1992-02-01 Taking its title from the second 50 years of the human life span of about 100 years this book presents wide ranging and practical recommendations for health care providers policymakers and other sectors of society These recommendations range from setting new national policies to changing the way elderly patients are interviewed in the doctor s office and from what exercises older persons should do to how city planners should design our urban environment The bulk of this volume presents the latest research on 13 major health threats to the elderly covering prevalence impact on the older person s life cost and intervention In addition the authors provide a detailed analysis of why older people often do not receive the benefit of prevention programs      **Aging and Disabilities** James Callahan, 2019-04-11 This book helps in building a bridge between the networks The topics of aging and disabilities are multifaceted and therefore may be approached in many ways The editors have chosen to focus on four systems and areas of common ground aging developmental disabilities independent living movement and rehabilitation to investigate the emerging intersection of the two fields      The Milbank Quarterly , 1923      **Current Catalog** National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70      **Morbidity and Mortality Weekly Report** , 1989      Extending Life, Enhancing Life Institute of Medicine, Division of Health Promotion and Disease Prevention, Committee on a National Research Agenda on Aging, 1991-02-01 Americans are living longer than ever before For many though these extra years have become a bitter gift marred by dementia disability and loss of independence Extending

Life Enhancing Life sets the course toward practical solutions to these problems by specifying 15 research priorities in five key areas of investigation Basic biomedicine To understand the fundamental processes of aging Clinical To intervene against common disabilities and maladies of older persons Behavioral and social To build on past successes with behavioral and social interventions Health services delivery To seek answers to the troubling issues of insufficient delivery of health care in the face of increasing health care costs Biomedical ethics To clarify underlying ethical guidelines about life and death decisions Most important the volume firmly establishes the connection between research and its beneficial results for the quality of life for older persons      **Health Services** ,1992 Guide to aid users and producers of health services research in accessing relevant literature and sources of information Includes dictionaries directories monographs and bibliographies journals abstracts and indexes online and CD ROM databases and organizations      **Clearinghouse Review** ,1976

**Private Action and the Public Good** Walter W. Powell, Elisabeth S. Clemens, 1998-03-30 Governments around the world are turning over more of their services to private or charitable organizations as politicians and pundits celebrate participation in civic activities But can nonprofits provide more and higher quality services than governments or for profit businesses Will nonprofits really increase social connectedness and civic engagement This book a sequel to Walter W Powell s widely acclaimed The Nonprofit Sector A Research Handbook brings together an original collection of writings that explores the nature of the public good and how private nonprofit organizations relate to it The contributors to this book eminent sociologists political scientists management scholars historians and economists examine the nonprofit sector through a variety of theoretical and methodological lenses They consider the tensions between the provision of public goods and the interests of members and donors in nonprofit organizations They contrast religious and secular nonprofits as well as private and nonprofit provision of child care mental health services and health care And they explore the growing role of nonprofits in the United States France Germany and Eastern Europe the contribution of nonprofits to economic development and the forms and strategies of private action      **Ethics and Economics** ,1993      What Kind of Life? Daniel Callahan, 1995-02-01 A provocative call to rethink America s values in health care      The Long Term Care Crisis Carroll L. Estes, James H. Swan, 1993 This book examines the implementation of the prospective payment system PPS in the US for Medicare hospital reimbursement which started in 1983 The authors discuss the impact of the PPS on health care provision and conclude that rather than improving conditions for the elderly in their transition from hospital to community and decreasing escalating health costs the PPS has restructured the system with the result that the greater financial burden is placed on informal caregivers community and home health care agencies and the elderly themselves      **Cost of Injury in the United States** Dorothy P. Rice, 1989      **Last Rights** Barbara Logue, 1993-01-01 Several recent trends demographic social and economic are increasing the incidence and public support of deliberate death among the old and sick The number of elderly people is at an all time high Medical technology can prolong the lives of these men and women but it cannot keep

them independent free of pain or competent to manage their own affairs Never before have so many been so sick for so long Changes in the size and structure of the American family make long term home care almost impossible while exorbitant health costs and scarce resources limit the provision of highquality care by paid workers Researcher Barbara J Logue refers to any deliberate behavior that causes death as death control She points out that death control like birth control involves very serious and deeply personal decisions choices that ought to be made on the basis of reliable information with care and compassion without coercion She goes on to assert that like birth control death control should be performed legally and with the help of the medical community Without access to assisted deaths many frail old people are left to endure wretched deaths Some die slowly of neglect or malnutrition in nursing homes Others take their own lives sometimes by violent means while they can still act independently because they are afraid that no one will help them if they wait until they are very sick Some die alone fearful of implicating friends or relatives in their back alley euthanasia While some die too soon because they are poor uneducated or hard to manage others are overtreated and their deaths delayed because doctors and hospitals want to increase their income or fearprosecution if they help a patient die Barbara Logue describes these and many other hazards inherent in our present long term care system noting that all too often the system causes suffering instead of alleviating it After assessing the alternatives she urges that we must make compassionate death control as available as birth control We must regulate and monitor it like any other medical procedure taking steps to minimize the risks while maximizing the benefits
