Research Division,1928 An International Perspective on Economic Education William B. Walstad,2012-12-06 Economics is taught in some form in the secondary schools of nations throughout the world The subject is rarely taught in elementary schools and while economics courses are offered in universities the majority of students end their formal education with secondary school Thus the best opportunity for the economic education of the youth of a nation occurs in secondary schools This book examines economic education at this critical level of the educational system The teaching of economics in secondary schools varies across countries These differences occur because of history the structure of education and other national factors At the same time there are common elements in the economic education of many countries especially in content coverage This contrast between the common features and the uniqueness of economic education in secondary schools of major industrial nations exemplifies the international perspective presented in this book The international perspective is developed in the six sections of the volume The first section discusses why nations should include economics in school curricula and presents a framework for teaching economics that should have global appeal Dissension and consensus on economic issues among North American and European economists are examined in the second section The third section surveys the U S research literature on precollege economic education and assesses the current state of economics instruction in U S schools The economics curricula and educational practices in seven other nations the U K Canada Japan Germany Austria Korea and Australia are described in the fourth and fifth sections The fifth section also presents international comparisons of economic understanding based on national testing in six of those nations The sixth and final section explores the role of economic education in centrally planned economies and its effects on the transition to a market economy using Russia Bulgaria and China as case studies **Circular - Office of Education** United States. Division of Field Studies,1926 **Home Economics in the Public Secondary Schools** United States. Education Office,1962 *Misc* ,1943 The Economic Impact of Government Policy on China's Private Higher Education Sector Xiaoying Ma,2021-02-03 This book provides an overview of the growth of the private higher education sector in China and in addition provides an analysis of some of the key drivers of this growth and impediments to it What is new about the book is that it combines the results of a series of interviews with work that is more quantitative in nature The book is of use to not only those engaged in academic research but also those who more generally wish to know more about an educational sector that is growing in importance The most obvious factors promoting expansion of this sector have been the growth in per capita incomes higher levels of participation in secondary school education the strong growth in demand for graduates and the inability of the public sector to keep pace with demand All of these factors intermingled with the involvement of government regulation This regulation however is not uniform across all of China given the different provincial government departments of education that are also involved in dealing with private higher education institutions In particular this book looks at the way in which the Chinese government s regulatory framework both national and provincial influenced the development of the sector and the way in which it operates especially the private higher education component of that sector The analysis undertaken finds that there is a link between regulation and the private higher education sector growth and a link between the funding of the government sector The more intense regulation was and the

more funds provided to the state sector the less scope there was for the private sector to expand Growth of the private sector therefore did not just depend upon rising demand for higher education overall but also to a fair degree of tolerance on the part of government Much of this work in subsequent years has been supported by the further changes that have been undertaken in the Chinese higher education sector Over the years the growth of the Chinese higher education sector has stabilised as has the private segment of this sector
