Economics for the Common Good Jean Tirole, 2019-05-14 When Jean Tirole won the 2014 Nobel Prize in Economics he
suddenly found himself being stopped in the street by complete strangers and asked to comment on issues of the day no
matter how distant from his own areas of research His transformation from academic economist to public intellectual
prompted him to reflect further on the role economists and their discipline play in society The result is Economics for the
Common Good a passionate manifesto for a world in which economics far from being a dismal science is a positive force for
the common good Economists are rewarded for writing technical papers in scholarly journals not joining in public debates
But Tirole says we urgently need economists to engage with the many challenges facing society helping to identify our key
objectives and the tools needed to meet them To show how economics can help us realize the common good Tirole shares his
insights on a broad array of questions affecting our everyday lives and the future of our society including global warming
unemployment the post 2008 global financial order the euro crisis the digital revolution innovation and the proper balance
between the free market and regulation Providing a rich account of how economics can benefit everyone Economics for the
