**House of Commons - Environmental Audit Committee: Energy Subsidies - HC 61** Great Britain: Parliament: House of Commons: Environmental Audit Committee, 2013-12-02 The Government is shifting the goal posts on fuel poverty so that official statistics record far fewer households as fuel poor The changes to the fuel poverty definition and target in part being made through amendments to the Energy Bill should be stopped unless the Government is prepared to make a public commitment to end fuel poverty altogether A short term bid to cut bills must not throw energy and climate change policy off course In the longer term green levies could actually keep bills down if they drive energy efficiency improvements that cut the cost of heating our homes Insulating homes and supporting green technologies is vital to help the fuel poor and cut the emissions causing climate change At the Rio 20 Summit and the G20 the Government committed itself to phasing out fossil fuel subsidies that

encourage wasteful consumption and contribute to greenhouse gas emissions The Government must set a target to reduce subsidies to harmful fossil fuels The Government should also use the Autumn Statement as an opportunity to provide a clear and comprehensive analysis of energy subsidies in the UK The report also looks at whether Government support for the new nuclear power station at Hinkley Point constitutes a subsidy and concludes that it does despite the Government's assurance otherwise The Government's policy of no public subsidy for new nuclear requires it to provide only similar support to that provided to other types of energy but even on that basis the deal for Hinkley Point C is dissimilar notably on support for decommissioning and waste

**Glass Ceilings and Dirt Floors** Christine Firer Hinze, 2015 **Playing with Fire** Yilmaz Akyüz, 2017-06-30 Starting in the early 1990s many emerging and developing economies EDEs liberalized their capital accounts allowing greater freedom for international lenders and investors to enter their markets as well as for their residents to borrow and invest in international financial markets Despite recurrent crises liberalization has continued and in fact accelerated in the new millennium Integration has been greatly facilitated by progressively looser monetary policy in the United States notably the policies that culminated in debt crises in the United States and Europe and the ultra easy monetary policy adopted in response Not only have their traditional cross border linkages been deepened and external balance sheets expanded rapidly but also foreign presence in their domestic financial markets and the presence of their nationals in foreign markets have reached unprecedented levels As a result new channels have emerged for the transmission of financial shocks from global boom bust cycles Almost all EDEs are now vulnerable irrespective of their balance of payments external debt net foreign assets and international reserve positions although these play an important role in the way such shocks could impinge on them This is a matter for concern since the multilateral system still lacks mechanisms for orderly resolution of financial crises with international dimensions Playing with Fire provides an empirical account of deeper integration of EDEs into the global financial system and discusses its implications for stability and growth focusing on the role of policies in the new millennium in both EDEs and the United States and Europe
