By focusing on four areas: 1. agriculture and livestock, 2. consumption, poverty and inequality, 3. financial services, employment and corporate governance, and 4. economic integration, international trade and foreign direct investment (FDI), this book presents a series of empirical studies that examine important contemporary economic issues facing Africa. The book incorporates a range of methodological approaches with some chapters providing case study analyses while others embrace more traditional forms of econometric testing. **A Directory of Institutional Resources Supported by Section 211 D Grants** United States.
