Economy Of Early Renaissance Europe 13:

The Economy of Early Renaissance Europe, 1300-1460 Harry A. Miskimin, 1975-09-05 Harry A Miskimin examines the economic structure of early Renaissance Europe in 1300 1460 **Coordination, Cooperation, and Control** Randall G. Holcombe, 2020-07-23 There are two ways people coordinate their actions through cooperation exercised by economic power and through control exercised by political power When economic and political power are held by the same people the result is stagnation when those who hold economic power are not the same people who hold political power the result is progress This book presents the ways in which economic power and political power can be separated and how they can remain so by analyzing the nature of power and the differences between economic and political power The book then discusses the history of economic and political power including hunter gatherer societies agrarian societies and modern commercial and industrial societies This background lends insight into why political and economic power were typically held by the same people and why recently those without political power have been able to acquire economic power Incentives play a key role in understanding how those two types of power can become separated and why there is always a tendency for them to recombine But ideas also play a crucial role including the influence of the Enlightenment on the progress that has occurred in the last several hundred years *The Age of Reform, 1250-1550* Steven Ozment, 2020-08-25 Celebrating the fortieth anniversary of this seminal book this new edition includes an illuminating foreword by Carlos Eire and Ronald K Rittges The seeds of the swift and sweeping religious movement that reshaped European thought in the 1500s were sown in the late Middle Ages In this book Steven Ozment traces the growth and dissemination of dissenting intellectual trends through three centuries to their explosive burgeoning in the Reformations both Protestant and Catholic of the sixteenth century He elucidates with great clarity the complex philosophical and theological issues that inspired antagonistic schools traditions and movements from Aquinas to Calvin This masterly synthesis of the intellectual and religious history of the period illuminates the impact of late medieval ideas on early modern society With a new foreword by Carlos Eire and Ronald K Rittgers this modern classic is ripe for rediscovery by a new generation of students and scholars **Views from the Edge** Negin Yavari, Lawrence G. Potter, Jean-Marc Ran Oppenheim, 2004-11-24 These essays were written by colleagues and former students of Richard Bulliet the preeminent Middle East scholar whose most important contribution remains his extraordinary imagination in the service of history The hallmark of the book then is innovative scholarship in all periods of Islamic history Its authors share a commitment to asking original historiographical questions with an overall orientation toward issues in social history **The European Reformation** Euan Cameron, 2012-03-01 Since its first appearance in 1991 The European Reformation has offered a clear integrated and coherent analysis and explanation of how Christianity in Western and Central Europe from Iceland to Hungary from the Baltic to the Pyrenees splintered into separate Protestant and Catholic identities and movements Catholic Christianity at the end of the Middle Ages was not at all a uniformly decadent or

corrupt institution it showed clear signs of cultural vigour and inventiveness. However it was vulnerable to a particular kind of criticism if ever its claims to mediate the grace of God to believers were challenged. Martin Luther proposed a radically new insight into how God forgives human sin. In this new theological vision rituals did not purify people, priests did not need to be set apart from the ordinary community, the church needed no longer to be an international body. For a critical Reformation moment this idea caught fire in the spiritual, political and community life of much of Europe. Lay people seized hold of the instruments of spiritual authority and transformed religion into something simpler, more local, more rooted in their own community. So were born the many cultures, liturgies, musical traditions and prayer lives of the countries of Protestant Europe. This new edition embraces and responds to developments in scholarship over the past twenty years. Substantially rewritten and updated with both a thorough revision of the text and fully updated references and bibliography, it nevertheless preserves the distinctive features of the original, including its clearly thought-out integration of theological ideas and political cultures, helping to bridge the gap between theological and social history, and the use of helpful charts and tables that made the original so easy to use. *A History of Credit and Power in the Western World* Scott B. MacDonald, Albert L.

Gastmann, 2001. The end of the Cold War put the planet on a new track, abruptly replacing the familiar world of bipolarity, red phones and intercontinental ballistic missiles with the strange new world of the Internet, e-commerce and Palm Pilots. The New World Order was defined by the first U.S.-led war against Iraq, bloody ethnic strife in Bosnia and Rwanda, and religious turmoil in Central Asia. This evolving global system, however, overlooked the powerful role of credit, which functions as a critical building block for developing greater national and individual wealth. This volume examines the evolution of credit in the Western world and its relationship to power. Spanning several centuries of human endeavor, it focuses on Western Europe and the United States and also considers how the Western system became the global credit system. Now available in paperback, *A History of Credit and Power in the Western World* is a highly accessible, innovative and well-written volume that will engage historians and economists alike. *Democracy and Domination* Andrew M. Koch, Amanda Gail Zeddy, 2009-01-01

Drawing on the genealogical tradition developed by Friedrich Nietzsche and Michel Foucault, *Democracy and Domination* argues that from the time of Ancient Greece to the present, the collective and centralizing aspects of power have been expanding in the Western world. Modern democracy should be seen as a system of domination that assists in the coordination and expansion of collective power. *Zecca* Alan M. Stahl, 2003-04-01. Winner of the Professional Scholarly Publishing Award in Economics from the Association of American Publishers. Within a few months of assuming the position of curator of medieval coins at the American Numismatic Society in 1980, Alan M. Stahl was presented with a plastic bag containing a hoard of 5,000 recently discovered coins, most of which turned out to be from medieval Venice. The course of study of that hoard and a later one containing more than 14,000 coins led him to the Venetian archives where he examined thousands of unpublished manuscripts. To provide an even more accurate account of how the Zecca mint operated in Venice in the

thirteenth through fifteenth centuries Stahl commissioned scientific analyses of the coins using a variety of modern techniques uncovering information about their content and how they had been manufactured The resulting book Zecca The Mint of Venice in the Middle Ages is the first to examine the workings of a premodern mint using extensive research in original documents as well as detailed study of the coins themselves The first of the book's three sections traces the coinage of Venice from its origins in the ninth century as a minor and unofficial regional Italian coinage to its position at the dawn of the Renaissance as the dominant currency of Mediterranean trade The second section entitled The Mint in the Life of Medieval Venice illustrates the mechanisms of the control of bullion and the strategies for mint profit and explores the mint's role in Venetian trade and the emergence of a bureaucratized government The third section Within the Mint examines the physical operations that transformed raw bullion into coins and identifies the personnel of the mint situating the holders of each position in the context of their social and professional backgrounds Illustrated with photos of Venetian coinage from the world's major collections Zecca also includes a listing of all holders of offices related to the medieval Venetian mint and summaries of all major finds of medieval Venetian coins

Crises and Transformation in the Mediterranean World Jordi Catalan Vidal, 2023-08-16 This edited collection presents an economic history of Catalonia and its economic crises from Roman times to the political difficulties of the present day It considers how the strong identity of the Catalan people has been reinforced in critical episodes such as the commercial revolution of the Late Medieval Age the 1640 rebellion the Succession War of 1705 1714 the industrial revolution of the eighteenth and nineteenth centuries and the strong repression during early Francoism The book also explores how historical parallels from Catalonia's past might shed light on the long term consequences of the Great Recession of 2007-9 and recovery in the EU showing how the typical Mediterranean approach of adjusting to crises by depreciating currencies and expanding public deficits has been less straightforward during the most recent financial crisis A particularly deep slump has contributed to fostering the claim for independence of Catalonia in recent times echoing larger dissatisfaction with EU monetary policy With a comprehensive overview of major events in Catalanian economic history and their broader implications to European political economy and development this book will be of interest to students and academics in economic history social history and monetary economics

Equity Capital Geoffrey Poitras, 2016-04-20 Capitalism is historically pervasive Despite attempts through the centuries to suppress or control the private ownership of commercial assets production and trade for profit has survived and ultimately flourished Against this backdrop accounting

provides a fundamental insight the value of physical and intangible capital assets that are used in production is identically equal to the sum of the debt liabilities and equity capital that are used to finance those assets In modern times this appears as the balance sheet relationship In determining the value of items on the balance sheet equity capital appears as a residual calculated as the difference between the value of assets and liabilities Through the centuries the organization of capitalist activities has changed considerably dramatically impacting the methods used to value trade and organize equity capital To reflect these changes this book is divided into four parts that roughly correspond to major historical changes in equity capital organization The first part of this book examines the rudimentary commercial ventures that characterized trading for profit from ancient times until the contributions of the medieval scholastics that affirmed the moral value of equity capital The second part deals with the evolution of equity capital organization used in seaborne trade of the medieval and Renaissance Italian city states and in the early colonization ventures of western European powers and ends with the emergence in the market for tradeable equity capital shares during the 17th century The third part begins with the 1719 1720 Mississippi scheme and South Sea bubbles in northern Europe and continues to cover the transition from joint stock companies to limited liability corporations with autonomous shares in England America and France during the 19th century This part ends with a fundamental transition in the social conception of equity capital from a concern with equity capital organization to the problem of determining value The final part is concerned with the evolving valuation and management of equity capital from the 1920s to the present This period includes the improvement corporate accounting for publicly traded shares engendered by the Great Depression that has facilitated the use of value investing techniques and the conflicting emergence of portfolio management methods of modern Finance Equity Capital is aimed at providing material relevant for academic presentations of equity valuation history and methods and is targeted at researchers academics students and professionals alike **An**

Powers George Modelski, William R. Thompson, 1996 The idea that political and economic power moves in coordinated cycles has long intrigued political scientists and political economists for if a pattern exists in the rise and fall of international political power a model explaining this pattern gains predictive qualities In *Leading Sectors and World Powers* George Modelski and William R Thompson venture beyond previous attempts to explain why major powers rise fall and fight about their changing status to establish an explicit connection between war economic innovation and world leadership They argue

that surges in economic innovation which in turn are tied to global war determine leadership in the global system Modelski and Thompson base their theory on the coordination of long cycles phases of world order and decay punctuated by intensive bouts of global war and K waves cycles delineating the wax and wane of leading industrial sectors They contend that K waves appear in paired sets correlated to long cycle shifts in political power Modelski and Thompson conclude by discussing the nature and timing of the next K wave long cycle peak commenting on the relevance of it for U S industrial policy and speculating on the possibility of evolving away from this pattern in the near future Structures and Assertions Thomas Allan Brady, Heiko Augustinus Oberman, James D. Tracy, 1993-12-31 Vol 1 **English Law in the Age of the Black Death, 1348-1381** Robert C. Palmer, 2001-02-01 Robert Palmer's pathbreaking study shows how the Black Death triggered massive changes in both governance and law in fourteenth century England establishing the mechanisms by which the law adapted to social needs for centuries thereafter The Black Death **Historical Archaeology** Pedro Paulo A. Funari, Martin Hall, Sian Jones, 2013-03-07 Historical Archaeology demonstrates the potential of adopting a flexible encompassing definition of historical archaeology which involves the study of all societies with documentary evidence It encourages research that goes beyond the boundaries between prehistory and history Ranging in subject matter from Roman Britain and Classical Greece to colonial Africa Brazil and the United States the contributors present a much broader range of perspectives than is currently the trend The Long Twentieth Century Giovanni Arrighi, 1994 Winner of the American Sociological Association PEWS Award 1995 for Distinguished Scholarship The Long Twentieth Century traces the epochal shifts in the relationship between capital accumulation and state formation over a 700 year period Giovanni Arrighi masterfully synthesizes social theory comparative history and historical narrative in this account of the structures and agencies which have shaped the course of world history over the millennium Borrowing from Braudel Arrighi argues that the history of capitalism has unfolded as a succession of long centuries ages during which a hegemonic power deploying a novel combination of economic and political networks secured control over an expanding world economic space The modest beginnings rise and violent unraveling of the links forged between capital state power and geopolitics by hegemonic classes and states are explored with dramatic intensity From this perspective Arrighi explains the changing fortunes of Florentine Venetian Genoese Dutch English and finally American capitalism The book concludes with an examination of the forces which have shaped and are now poised to undermine America's world power
