critically examined the status of ecological stress in agroecosystems and address the issue of ecological intensification for natural resources management Drawing upon research and examples from around the world the book is offering an up to date account and insight into the approaches that can be put in practice for poly cropping systems and landscape scale management to increase the stability of agricultural production systems to achieve Ecological resilience It further discusses the role of farmer communities and the importance of their awareness about the issues This book will be of interest to teachers researchers climate change scientists capacity builders and policymakers Also the book serves as additional reading material for undergraduate and graduate students of agriculture forestry ecology agronomy soil science and environmental sciences National and international agricultural scientists policymakers will also find this to be a useful read for green future

ECotoxicology: Ecological Dimensions D.J. Baird,P.E. Douben,P. Greig-Smith,L. Maltby,2013-03-13 Ecotoxicology is a relatively new scientific discipline Indeed it might be argued that it is only during the last 5 10 years that it has come to merit being regarded as a true science rather than a collection of procedures for protecting the environment through management and monitoring of pollutant discharges into the environment The term ecotoxicology was first coined in the late sixties by Prof Truhaut a toxicologist who had the vision to recognize the importance of investigating the fate and effects of chemicals in ecosystems At that time ecotoxicology was considered a sub discipline of medical toxicology Subsequently several attempts have been made to portray ecotoxicology in a more realistic light Notably both Moriarty 1988 and F Ramade 1987 emphasized in their books the broad basis of ecotoxicology encompassing chemical and radiation effects on all components of ecosystems In doing so they and others have shifted concern from direct chemical toxicity to humans to the far more subtle effects that pollutant chemicals exert on natural biota Such effects potentially threaten the existence of all life on earth Although I have identified the sixties as the era when ecotoxicology was first conceived as a coherent subject area it is important to acknowledge that studies that would now be regarded as ecotoxicological are much older

Agroecological Footprints Management for Sustainable Food System Arnab Banerjee,Ram Swaroop Meena,Manoj Kumar Jhariya,Dhiraj Kumar Yadav,2020-12-16 Agroecological footprints are a unique and popular concept for sustainable food system Measuring and keeping a tab on the agroecological footprints of various human activities has gained remarkable interest in the past decade From a range of human activities food production and agriculture are most essential as well as extremely dependent on the agroecosystems It is therefore crucial to understand the interaction of agroecosystem constituents with the extensive agricultural practices The environmental impact measured in terms of agroecological footprints for a healthy for the sustainable food system The editors critically examine the status of agroecological footprints and how it can be maintained within sustainable limits Drawing upon research and examples from around the world the book is offering an up to date account and insight into how agroecology can be implemented as a solution in the form of eco friendly practices that would boost up the production curbs the environmental impacts improves the bio capacity and reduces the agroecological footprints

It further discusses the changing status of the agroecological footprints and the growth of other footprint tools and types such as land water carbon nitrogen etc This book will be of interest to teachers researchers government planners climate change scientists capacity builders and policymakers Also the book serves as additional reading material for undergraduate and graduate students of agriculture agroforestry agroecology soil science and environmental sciences National and international agricultural scientists policymakers will also find this to be useful to achieve the Sustainable Development Goals
