Ecology And Historical Materialism:

Ecology and Historical Materialism Jonathan Hughes, 2000-07-03 This book challenges the widely held view that Marxism is unable to deal adequately with environmental problems Jonathan Hughes considers the nature of environmental problems and the evaluative perspectives that may be brought to bear on them He examines Marx's critique of Malthus his method and his materialism interpreting the latter as a recognition of human dependence on nature Central to the book's argument is an interpretation of the development of the productive forces which takes account of the differing ecological impacts of different productive technologies while remaining consistent with the normative and explanatory roles that this concept plays within Marx's theory Turning finally to Marx's vision of a society founded on the communist principle to each according to his needs the author concludes that the underlying notion of human need is one whose satisfaction presupposes only a modest and ecologically feasible expansion of productive output Marx and the Earth John Bellamy Foster, Paul Burkett, 2016-01-12 A decade and a half ago John Bellamy Foster and Paul Burkett introduced a new revolutionary understanding of the ecological foundations of Marx's thought demonstrating that Marx's concepts of the universal metabolism of nature social metabolism and metabolic rift prefigured much of modern systems ecology Ecological relations were shown to be central to Marx's critique of capitalism including his value analysis Now in Marx and the Earth Foster and Burkett expand on this analysis in the process of responding to recent ecosocialist criticisms of Marx The result is a full fledged anti critique pointing to the crucial roles that dialectics open system thermodynamics intrinsic value and aesthetic understandings played in the original Marxian critique holding out the possibility of a new red green synthesis Marx and Nature P. Burkett, 1999-02-14 With Marx and Nature Paul Burkett reconstructs Marx's approach to nature society and environmental crisis While recognizing that production is structured by historically developed relations among producers Marx also insists that production as a social and material process is shaped and constrained by natural conditions including the natural condition of human bodily existence Marx's value analysis places him squarely in the camp of the growing number of ecological theorists questioning the ability of monetary and market based calculations to adequately represent the natural conditions of human production and development **Introduction to Ecological Aesthetics** Fanren Zeng, 2019-08-26 This book explores in detail the issues of ecological civilization development ecological philosophy ecological criticism environmental aesthetics and the ecological wisdom of traditional Chinese culture related to ecological aesthetics Drawing on Western philosophy and aesthetics it proposes and demonstrates a unique aesthetic view of ecological ontology in the field of aesthetics under the direct influence of Marxism which is based on the modern economic social cultural development and the modern values of traditional Chinese culture This book embodies the innovative interpretation of Chinese traditional culture in the Chinese academic community The author discusses the philosophical and cultural resources that can be used for reference in Chinese and Western cultural tradition focusing on traditional Chinese

Confucianism Taoism Buddhism and painting art Western modern ecological philosophy Heidegger's ontology ecological aesthetics and British and American environmental aesthetics In short the book comprehensively discusses the author's concept of ecological ontology aesthetics as an integration and unification of ontology aesthetics and ecological aesthetics This generalized ecological aesthetics explores the relationship between humans and nature society and itself guided by the brand new ecological worldview in the post modern context It also changes the non beauty state of human existence and establishes an aesthetic existence state that conforms to ecological laws

Victorian Literature, Energy, and the Ecological Imagination Allen MacDuffie, 2014-05-29 This book explores how Victorian fiction helped create an environmental consciousness by articulating questions about sustainable energy use

Marxism and Ecological Economics Paul Burkett, 2006-03-01 This book undertakes the first general assessment of ecological economics from a Marxist point of view and shows how Marxist political economy can make a substantial contribution to ecological economics The analysis is developed in terms of four basic issues 1 nature and economic value 2 the treatment of nature as capital 3 the significance of the entropy law for economic systems 4 the concept of sustainable development In each case it is shown that Marxism can help ecological economics fulfill its commitments to multi disciplinarity methodological pluralism and historical openness In this way a foundation is constructed for a substantive dialogue between Marxists and ecological economists

Marxism, the Millennium and Beyond M. Cowling, P. Reynolds, 2000-10-31 This collection investigates the state of play in studies informed by Marxism Among other contributions it includes an essay on state theory by Bob Jessop a discussion of fundamental socialist values using analytical Marxism by Alan Carling

Environment and Social Theory John Barry, 2007-01-24 Written in an engaging and accessible manner by one of the leading scholars in his field *Environment and Social Theory* completed revised and updated with two new chapters is an indispensable guide to the way in which the environment and social theory relate to one another This popular text outlines the complex interlinking of the environment nature and social theory from ancient and pre modern thinking to contemporary social theorizing John Barry examines the ways major religions such as Judaeo Christianity have and continue to conceptualize the environment analyzes the way the non human environment features in Western thinking from Marx and Darwin to Freud and Horkheimer explores the relationship between gender and the environment postmodernism and risk society schools of thought and the contemporary ideology of orthodox economic thinking in social theorising about the environment How humans value use and think about the environment is an increasingly central and important aspect of recent social theory It has become clear that the present generation is faced with a series of unique environmental dilemmas largely unprecedented in human history With summary points illustrative examples glossary and further reading sections this invaluable resource will benefit anyone with an interest in environmentalism politics sociology geography development studies and environmental and ecological economics

Approaches to History Sabyasachi Bhattacharya, 2011 History as a social science is arguably more self reflective than associated disciplines in that family Other social scientists seem to see little reason to look beyond the paradigm they are developing in the present times Historians on the other hand tend to depend on the cumulative process of the development of their craft and the fund of accumulated knowledge Yet while this is acknowledged in the practice of research Historiography in itself as a subject of study has rarely found its place in the syllabi of Indian universities Knowledge of Historiography is taken for granted when a scholar plunges into research In an attempt to address this lacuna the Indian Council of Historical Research ICHR has planned a series of volumes on Historiography comprising articles by subject specialists commissioned by the ICHR The first volume in the series Approaches to History Essays in Indian Historiography brings to the readers the first fruits of that endeavour While the essays encompass areas of research presently at the frontiers of new research scholars will also find the bibliographies accompanying the essays of significant appeal

Handbook of Environmental Political Theory in the Anthropocene Amanda Machin, Marcel Wissenburg, 2025-03-12 This Handbook provides a comprehensive overview of the transforming landscape of environmental political theory Embracing both classical and marginalised approaches in the field it demonstrates the central role of political theory in rethinking the strategies discourses and imaginaries of the Anthropocene epoch This title contains one or more Open Access chapters

New Directions in Uneven and Combined Development Justin Rosenberg, Jack Brake, Tatiana Pignon, Lucas de Oliveira Paes, 2021-11-28 This book introduces Uneven and Combined Development as an approach in international studies and showcases some of the latest and most innovative research in this field The theory of Uneven and Combined Development originated in the writings of Leon Trotsky However in recent years it has become the subject of flourishing literature in the discipline of International Relations due to its unique ability to reintegrate social and international theory The first and second generations of this literature were focused upon retrieving the idea expanding it into a social theory of the international and applying it to numerous empirical cases such as the rise of political Islam the causes of the First World War and the Bolshevik Revolution and even the origins of capitalism as a world system In the present volume a third generation has arrived which further extends the reach of UCD connecting it in new and exciting ways to such subjects as ecology macro economic policy culture Science and Technology Studies Comparative Literature and even science fiction The chapters in this book were originally published in the journal the Cambridge Review of International Affairs

The Dialectics of Ecology John Bellamy Foster, 2024-04 Today the fate of the earth as a home for humanity is in question and yet contends John Bellamy Foster the reunification of humanity and the earth remains possible if we are prepared to make revolutionary changes As with his prior books The Dialectics of Ecology is grounded in the contention that we are now faced with a concrete choice between ecological socialism and capitalist exterminism and rooted in insights drawn from the classical historical materialist tradition In this latest work Foster explores the complex theoretical debates that have arisen historically with respect to the dialectics of nature and society He then goes

on to examine the current contradictions associated with the confrontation between capitalist extractivism and the financialization of nature on the one hand and the radical challenges to these represented by emergent visions of ecological civilization and planned degrowth on the other **Handbook of Archaeological Theories** R. Alexander Bentley, Herbert D. G. Maschner, Christopher Chippindale, 2009-09-16 This handbook a companion to the authoritative Handbook of Archaeological Methods gathers original authoritative articles from leading archaeologists on all aspects of the latest thinking about archaeological theory It is the definitive resource for understanding how to think about archaeology

Biological Environmental Science William V Dashek, 2019-04-29 Biological Environmental Science is an introductory textbook for undergraduate students who desire a one semester course or alternatively a springboard course for advanced environmental offerings This book features timely issues such as global warming air ground and water pollutions population growth species extinction and environmental poli **Marx and We** Sun Zhengyu, 2024-08-01 Marxist ideology is the only fully scientific ideology the only one able to guide mankind toward the settlement of fundamental social problems and to point out the royal road for the proletariat to take in its march toward socialism and communism Without Marxism modern people cannot establish true social ideals nor can they engage in the rational pursuit of values Without Marxism modern people cannot choose the correct path of development nor can they build up new forms of civilizations Without Marxism modern people would never base their commitments to schedule the consensus building effort and support the consensus building process on any irrefutably and sufficiently sound theoretical foundations **The Sutra** Yutong, In exploring the essence function and role of religion in human societies we have to confront a complex and multifaceted issue Religion as an enduring cultural phenomenon has evolved in its connotations and denotations over time This profound exploration into religion reveals the secrets behind the enduring vitality of religious practices and the invisible ecological nature of religion itself It presents the power of enlightenment transcending the realms of monks and nuns making us realize that all beings possess Buddha nature and the potential to attain enlightenment Enlightenment is the foundation of faith and a pivotal moment in the course of scientifically disciplined spiritual practice In the vast river of the universe humanity is but a node with an enlightened society being its ultimate destination Through the right knowledge and insight we ensure the absolute authority of the Sutra approaching the original intent of the Buddha infinitely and materialistically Employing a scientific materialist perspective to understand Buddhism is the essential path to enlightenment and mastery of objective laws The reason religion continues to captivate people lies not only in its provision of spiritual solace but more importantly in fulfilling the pursuit of ultimate meaning Through its unique belief system religion offers believers a way to interpret the world and life often surpassing everyday experiences and logic Moreover religion plays a social function by propagating specific alues thereby influencing society and maintaining social order to some extent The essence of religion can be regarded as an objectively existing invisible ecology This view considers religion as a manifestation of a special relationship between humans

and nature and the universe representing humanity's attempt to understand and master the world. The sacred reality in religion provides people with a spiritual refuge beyond reality, enabling them to find strength and hope when facing difficulties and challenges in life. Third, enlightenment is the essence of Buddha nature; it is not confined to monks or nuns. This view highlights the importance of self-awakening in Buddhism. Every individual has the potential to become enlightened. It is not limited to monks or nuns but open to anyone willing and able to follow the correct practices. This perspective encourages personal spiritual enhancement and self-improvement through inner cultivation and practice. The belief that all beings possess Buddha nature signifies everyone's potential for enlightenment. Grounded in a fundamental doctrine of Buddhism, it suggests that all living beings inherently possess supreme Buddha nature, which can be gradually unveiled by the correct practice, removing ignorance and delusion, ultimately achieving enlightenment. This highlights Buddhism's affirmation of individual potential and the possibility of self-transcendence through practice. In summary, religion as a complex cultural phenomenon extends far beyond mere superstition or spiritual reliance. It influences the development and future of human societies with correct knowledge and insight. Religion serves both as an individual's spiritual pursuit and a societal value system. Through a deep understanding and study of religion, we can better recognize its significant status in human history and culture, as well as its positive contributions to individual and societal development. This journey of exploration is not only a reflection on religion itself but also an inquiry into human civilization transcending traditional religious boundaries. Integrating science and faith and opening a path to enlightenment. In this era of challenge and transformation, this book offers a guiding light leading us towards a deeper reflection and cognition. Illuminating a promising path for humanity's future.

The SAGE Handbook of Human Geography, 2v Roger Lee, Noel Castree, Rob Kitchin, Vicky Lawson, Anssi Paasi, Chris Philo, Sarah Radcliffe, Susan M. Roberts, Charles Withers, 2014-05-22. Superb! How refreshing to see a Handbook that eschews convention and explores the richness and diversity of the geographical imagination in such stimulating and challenging ways. Peter Dicken, University of Manchester. Stands out as an innovative and exciting contribution that exceeds the genre. Sallie A. Marston, University of Arizona. Captures wonderfully the richness and complexity of the worlds that human beings inhabit. This is a stand-out among handbooks. Lily Kong, National University of Singapore. This wonderfully unconventional book demonstrates human geography's character and significance not by marching through traditional themes but by presenting a set of geographical essays on basic ideas, practices, and concerns. Alexander B. Murphy, University of Oregon. This SAGE Handbook stands out for its capacity to provoke the reader to think anew about human geography essays that offer some profoundly original insights into what it means to engage geographically with the world. Eric Sheppard, UCLA. Published in association with the journal *Progress in Human Geography*, edited and written by the principal scholars in the discipline, this Handbook demonstrates the difference that thinking about the world geographically makes. Each section considers how human geography shapes the world, interrogates it, and intervenes in it. It includes a major

retrospective and prospective introductory essay with three substantive sections on Imagining Human Geographies
Practising Human Geographies Living Human Geographies The Handbook also has an innovative multimedia component of conversations about key issues in human geography as well as an overview of human geography from the Editors A key reference for any scholar interested in questions about what difference it makes to think spatially or geographically about the world this Handbook is a rich and textured statement about the geographical imagination

The American Worker and the Absurd Truth about Marxism Alan Johnson, 2023-03-20 In 1906 Werner Sombart famously quipped that the ship of American socialism had crashed on the reefs of roast beef and apple pie Why did socialism never take ground in the USA This volume opens with the first English translation of Karl Kautsky's 1906 long essay The American Worker an extended response published in Die Neue Zeit to Sombart's 1905 essay Why Is There No Socialism in the United States Other essays and reviews are each marked by an effort to come to terms with the fact that Friedrich Engels's optimism that History would take care of class consciousness in the USA has been proven misplaced Originally published as issue 4 of Volume 11 2003 of Brill's journal Historical Materialism For more details on this journal please [click here](#)
