Wildlife Review ,1990 Ecological Planning Forster Ndubisi,2003-04-30 Chosen by Choice Magazine as an Outstanding Academic Title for 2003 Ecological planning is the process of understanding evaluating and providing options for the use of landscape to ensure a better fit with human habitation In this ambitious analysis Forster Ndubisi provides a succinct historical and comparative account of the various approaches to this process He then reveals how each of these approaches offers different and uniquely useful perspectives for understanding the dialogue between human and environmental processes Ndubisi begins by examining the philosophies behind and major contributors to ecological thinking during the past 150 years as well as the paradigm shift in planning that occurred in recent decades as a result of a growing global ecological awareness He then turns to landscape suitability analysis and discusses alternative approaches to ecological planning such as applied human ecology applied landscape ecology and others Finally he offers a comparative synthesis of the approaches in order to reveal the theoretical and methodological assumptions inherent when planners choose one approach over the other Ndubisi concludes that no one approach can by itself adequately address the whole spectrum of ecological planning issues For this reason he offers guidance as to when it may be appropriate for landscape architects and planners to emphasize one approach rather than another *Ecotherapy* Howard Clinebell,2013-12-19 Here is a trailblazing book on issues of vital interest to the future of humankind *Ecotherapy Healing Ourselves Healing the Earth* sheds light on humankind s most serious health challenge ever how to save our precious planet as a clean viable habitat As a guide for therapists health professionals pastoral counselors teachers medical healers and especially parents *Ecotherapy Healing Ourselves Healing the Earth* highlights readers strategic opportunities to help our endangered human species cope constructively with the unprecedented challenge of saving a healthful planet for future generations *Ecotherapy Healing Ourselves Healing the Earth* introduces readers to an innovative approach to ecologically grounded personality theory spirituality ecotherapy and education The book shares the author s well developed theories and methods of ecological diagnosis treatment and education so professionals and parents our most influential teachers can rise to the challenge of saving our planet Readers will find that the book helps them accomplish this goal as it explores an expanded ecologically grounded theory of personality development the missing dimension in understanding human identity formation outlines a model for doing ecologically oriented psychotherapy counseling medical healing teaching and parenting describes life saving perspectives for making one s lifestyle more earth caring demonstrates the importance of hope humor and love suggests how these earthy approaches may be utilized in a variety of social contexts and cultures A systematic theory and practice guidebook *Ecotherapy Healing Ourselves Healing the Earth* fills a wide gap in both the counseling and therapy literature and the ecology literature It offers an innovative model for fulfilling the ecological circle between humans and nature with three action dimensions These are

self care by being intentionally nurtured by nature spiritual enrichment by enjoying the transcendent Spirit in nature and responding by nurturing nature more responsibly and lovingly The theories and practical applications presented in the book come together to explore long overlooked issues at the boundary between human health and the health of the natural environment Psychotherapists health professionals and teachers pastoral counselors and other clergy who counsel and teach laypersons who are parents and grandparents and individuals and groups interested in environmental issues will find Ecotherapy Healing Ourselves Healing the Earth essential for approaching the long neglected earthy roots of the total human mind body spirit organism

Planetary Accounting Kate Meyer, Peter Newman, 2020-03-10 This book presents a novel way to enable people regardless of their scale of influence to take responsibility for global environmental problems including climate change It introduces a new framework called Planetary Accounting which allows the Planetary Boundaries non negotiable limits for the environment to be translated into limits for human activity It shows how such limits can be broken down into chunks that can be managed at different levels from individual and community to business and sector levels to cities and regions and at any level of government The book begins by summarising the science of climate change and introducing the notion of the Anthropocene the human age It highlights the importance of returning to and remaining within the Planetary Boundaries but shows that we can't realistically do so unless we have a new approach to environmental accounting The book then outlines how Planetary Accounting furnishes this new approach by combining sustainability science change theory and environmental accounting to create a scalable framework for environmental management that encourages systemic and individual change The details of the science of and our human contribution to ten critical human pressures are then presented and the book concludes with a guide for those seeking to apply Planetary Accounting in practice Planetary Accounting could form the scientific underpinning of behaviour change programs guide the development of policy and regulations and provide both the basis for environmental laws and the foundation of future global environmental agreements It has been 50 years since the first views from space showed a blue planet alone in our solar system This book is an historic opportunity to provide humanity for the first time with sufficient information to begin implementing Planetary Accounting

Ecological Engineering Design Marty D. Matlock, Robert A. Morgan, 2011-03-29 Ecologically sensitive building and landscape design is a broad intrinsically interdisciplinary field Existing books independently cover narrow aspects of ecological design in depth hydrology ecosystems soils flora and fauna etc but none of these books can boast of the integrated approach taken by this one Drawing on the experience of the authors this book begins to define explicit design methods for integrating consideration of ecosystem processes and services into every facet of land use design management and policy The approach is to provide a prescriptive approach to ecosystem design based upon ecological engineering principles and practices This book will include a novel collection of design methods for the non built and built environments linking landscape design explicitly to ecosystem services
