Ecology In Education:

Environmental Education and Advocacy Edward A. Johnson, Michael J. Mappin, 2005-03-03 Environmental education has often blurred the distinction between ecological science and environmental advocacy Growing public awareness of environmental problems and desire for action may be contributing to this blurring There is a need to clarify the distinction between the role of ecological science and the role of social and political values for the environment within environmental education This book addresses this need by examining the changing perspectives of ecology in education and the changing perspectives of education in environmental education Guidelines are provided for assessing the science and education perspectives within environmental education along with suggested frameworks for development of programs and resources that integrate current science education and action This book will be of interest to environmental educators ecologists interested in environmental education and curriculum and resource developers The Ecology of the School John

Eggleston, 2012-05-04 Within a single educational system that of England and Wales the nature of schooling available to a child can be dramatically different Even between residential areas the differences in educational climate can be striking Apart from differences in the organization of schools and the availability of buildings teachers and resources there are also significant ideological variations between local education authorities This book considers the evidence of such differences some of the environmental factors political social and economic that may account for their distribution and the consequences that appear to spring from them **Ecology in Education** Monica Hale, 1995-09-28 Ecological and environmental

education in schools and institutes of further and higher education has gained increasing importance in recent years both as an area of study in its own right and as a component of other disciplines There is now a requirement in many countries to include the environment in both formal and informal curricula This volume presents a long overdue account of the status progress and underlying concepts of ecological education It explores areas of recent development and debate in ecological and environmental education describes the evolution and development of environmental education in different countries and examines the importance and provision for fieldwork Case studies illustrate how ecological studies are undertaken in several culturally different settings This book will interest teachers and research workers in ecology environmental science and education The Ecology of Educational Systems Bruce D. Baker, Craig E. Richards, 2004 This informative interesting book

addresses those who need to understand educational data and its place in school leadership and decision making It provides a set of practical tools for data analysis and decision making using spreadsheet software and system dynamic models Examples of the use of the popular Microsoft Excel several system dynamic models created by ITHINK6.0 and an introduction to the development of dynamic simulations all contribute to the reader's understanding of the concepts presented The use of real data ensures that readers receive a realistic feel for handling and manipulating information guaranteeing an understanding of the broad diversity of financial demographic and economic situations that occur Topics

include information sharing in schools organizing and manipulating data system linkages system dynamics applied systems thinking and structured improvisation An excellent resource for all school administrators especially those who plan budgets and need to report to school boards and their communities

Social Ecology and Education David Wright, Stuart B. Hill, 2020-09 Social Ecology and Education addresses ecological understanding as a transformative educational issue a learning response to emerging insights into social ecological relationships and the future of life on our planet In the face of the existential threats posed by climate change loss of biodiversity pandemics and the associated ecological and social challenges there is a need to extend our responses beyond scientific inquiry and technological initiatives This book seeks to move the dialogue towards a deeper and broader understanding of the complexities of the issues involved To achieve this the book discusses issues rarely addressed through programs in Education for Sustainability and Environmental Education such as student defined knowledge systems deep engagement with the implications of indigenous understandings climate change as symptomatic of broad epistemological problems social disengagement and differentiated barriers to meaningful change This work is enriched by its focus on the learning and the learning systems that have led to our current predicament This book seeks to initiate considerations of this kind to invigorate education for sustainable equitable healthy and meaningful futures As such this book will be of great interest to undergraduate and postgraduate students in a range of education and environmental courses

Environmental Education Trilochan S. Bakshi, Zev Naveh, 2012-06-15 The environmental movement of the 1960s made educationists in some parts of the world aware of the significance and importance of ecology in curricula at all levels of education from kindergarten to post secondary A great deal of progress was made in the early 1970s in incorporating environmental awareness programs into educational systems so that what was once considered a fad was gradually becoming a part of formal education in a number of institutions especially in Canada and the U S A It was therefore appropriate that an international scientific body devote some time to the issue of ecology in education Early in 1976 I suggested to the International Association for Ecology Inteco1 that a symposium on Environmental Education be included in the program of the Second International Congress of Ecology scheduled to be held in Jerusalem in September 1978 In the first draft program of the Congress the topic was included as a poster session I considered this inadequate and appealed to the Congress Steering Committee to focus greater attention on environmental education The first draft program contained phrases like utilization of resources conservation problems environmental monitoring and irreversible changes These phrases more or less assumed that people in general understood ecological principles Literature on environmental education seems to suggest that a wide gap separated most of the professional ecologists from a large portion of mankind primarily because we the ecologists have paid scant attention to the ecological education of world's citizens

Universities Robert A. Ellis, Peter Goodyear, 2019-03-26 Many universities around the world are finding that the structures and processes they have put in place to further their educational missions are being tested by rapidly changing circumstances. These changes involve new pedagogies, new course designs, new technologies, and updating of the physical campus reflecting diversifying student needs, growing student numbers, increasing competition, and more demanding stakeholder expectations. *The Education Ecology of Universities* examines these issues starting with the challenges identified by university leaders who have responsibility for education, digital, and campus planning. Sharing an analysis of in-depth interviews with more than 50 leaders, it identifies a range of conceptual and procedural gaps that undermine the full development and alignment of education, digital, and campus strategies. The second half of the book provides practical ideas for taking a more holistic, indeed ecological, approach to understanding and improving university learning environments. Setting out a case for a new applied science of educational ecology, this book offers foundational concepts and theoretical perspectives, introducing methods for analysing and evaluating teaching and learning ecosystems. It will be of interest to anyone who wants better ways of understanding how local systems function and can be improved. It is a must-read text for all leaders and researchers in education and indeed for anyone concerned with the future of higher education.

The Ecology of School David Zandvliet, 2013 This book describes and documents one school's experiences in achieving their environmental literacy goals through the development of a place-based learning environment. Through this initiative, a longitudinal descriptive case study began at the Bowen Island Community School to both support and advocate for ecological literacy while helping the school realize its broad environmental learning goals. Conceptualised as an intensive case study of a learning environment with an environmental education focus, the program was part of a larger ecological literacy project conducted in association with preservice and graduate education programs at a nearby university and research centre. Following both empirical learning environments and participatory ethnographic research methods, the project is described from a variety of perspectives: students, teachers, teacher educators, researchers, and administrators. The volume describes a variety of forms of place-based education that teachers devised and implemented at the school while giving evidence of the development of a supportive and positive place-based learning environment. The programs and initiatives described in this volume provide the reader with insights for the development of place-based programming more generally. The final chapter outlines participatory methods and action research efforts used to evaluate the success of the project and recounts the development and validation of a learning environment instrument to assist with this process. The new instrument, coupled with qualitative descriptions of the learning environment experienced by many at the school, give unique insights into the various ways the study of learning environments as a methodology may be explored.
