Data Analysis V Michael R. Berthold, Hans-Joachim Lenz, Elizabeth Bradley, Rudolf Kruse, Christian Borgelt, 2011-03-16 We are glad to present the proceedings of the 5th biennial conference in the Intelligent Data Analysis series The conference took place in Berlin Germany August 28 30 2003 IDA has by now clearly grown up Started as a small si symposium of a larger

conference in 1995 in Baden Baden Germany it quickly attracted more interest both submission and attendance wise and moved from London 1997 to Amsterdam 1999 and two years ago to Lisbon Submission rates along with the ever improving quality of papers have enabled the organizers to assemble increasingly consistent and high quality programs This year we were again overwhelmed by yet another record breaking submission rate of 180 papers At the Program Chairs meeting we were based on roughly 500 reviews in the lucky position of carefully selecting 17 papers for oral and 42 for poster presentation Poster presenters were given the opportunity to summarize their papers in 3 minute spotlight presentations The oral spotlight and poster presentations were then scheduled in a single track 2 5 day conference program summarized in this book In accordance with the goal of IDA to bring together researchers from diverse disciplines we achieved a nice balance of presentations from the more theoretical side both statistics and computer science as well as more application oriented areas that illustrate how these techniques can be used in practice Work presented in these proceedings ranges from theoretical contributions dealing for example with data cleaning and compression all the way to papers addressing practical problems in the areas of text classification and sales rate predictions A considerable number of papers also center around the currently so popular applications in bioinformatics
