

# DEMOCRACY AND ECONOMIC RESULTS

## A REGRESSION ANALYSIS

By Charles G. Mast, Naiser University

### INTRODUCTION

Since the late 20th century, there has been a popular perception that democracy is in decline worldwide. Autocratic regimes generally present propaganda claiming that the reason is that democracies tend to be disorganized and chaotic, which (they claim) makes them both ungovernable and unproductive. Liberal democracies, on the other hand, claim that their systems, while (admittedly) more difficult to manage, provide vastly superior qualitative and quantitative results for their citizens. This study aimed to test the economic results of liberal democracies with that for other regimes by comparing a measure of economic performance per capita to a measure of democratic national governance.

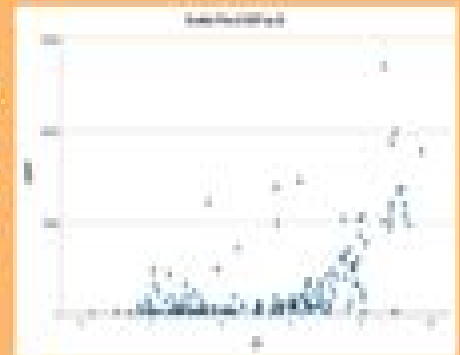

### THE DATA

The author combined publicly available gross domestic product per capita (GDP) data compiled by the World Bank with democracy index (DI) data compiled by the Economist Intelligence Unit for 164 countries in the year 2021 into a single Excel spreadsheet. GDP ranged over three orders of magnitude and DI ranged from 0.32 to 9.75.

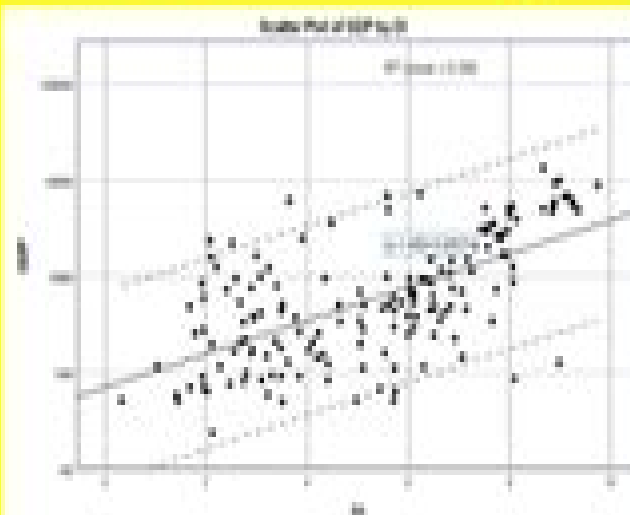

### LINEAR REGRESSION

The two measures showed a highly non-linear correlation, necessitating a non-linear regression model using SPSS statistical software.

### EXPONENTIAL REGRESSION

The data fit an exponential regression model with a positive slope of  $5.66 \times 10^4$ . Pearson's  $R^2$ , however, was a relatively weak 0.390. Thus, more democratic governance clearly provided vastly superior economic performance, but there were significant confounding factors.

### FUTURE RESEARCH

Future research will be needed to identify the confounding factors and quantify their significance for national economic performance. Another avenue for future research will be longitudinal studies to correlate economic development with democratic governance over time. Finally, GDP per capita is not the only, and arguably not the most important, measure of citizens' welfare. It is just the most convenient to measure.

Holcombe, 1985 Democratic decisions determine the allocation of resources through the public sector Holcombe uses the median voter model as a base but goes on to develop a more general multidimensional model of democratic decision making that incorporates many theoretical developments of the past decade He focuses upon the representative body of government and the fact that representatives can profit more from passing legislation to benefit special interests than from passing legislation in the general public interest Using these insights Holcombe develops a model that describes the allocative effects of making economic decisions by majority rule The model describes a stable equilibrium outcome for majority rule decisions made in a multidimensional setting it is a logical extension of the framework established in his well received *Public Finance and the Political Process*
