James Sperling, 1999 The sudden transformation of the Cold War security order in 1989 altered the structure of the European state system and necessitates the striking of a new balance between the economic political and military requirements of security This volume focuses on the most important institutions of European security the European Union and NATO Both institutions are expanding especially eastwards in terms of their respective roles and membership This double expansion raises many questions most crucially whether Europe will be a two speed security order which suggests openness inclusiveness and the emergence of an anarchical society or a two tiered security order which suggests a continued hierachical security system with all of its associated historical liabilities

Library of Congress. Processing Department,1954 **Household Savings in Selected Southern European Countries**
Evidence from Cross-Country Micro-Level Data Mr. Kamil Dybczak,Shiqing Hua,Mariusz Jarmuzek,Ruifeng Zhang,Yipei
Zhang,2023-07-21 The paper looks into the puzzle of low household savings in three Southern European SE3 countries
Cyprus Greece and Portugal Building on the household saving drivers literature we employ cross country micro level data
and investigate the key saving patterns examining their heterogeneity across households in SE3 countries relative to the EA
average The results confirm the prominent role of income along with interest rate inflation fiscal balance and debt in shaping
household savings in SE3 countries Quantile regressions employed to analyze saving behavior across the distribution of
households suggest that households with lower savings tend to see their savings dip or dissavings rise more than
proportionately with shocks to income interest rate inflation and government balance Our policy simulations across the
distribution of households suggest that targeted rather than universal policy intervention could improve household savings
especially of the most vulnerable ones *The Political Economy and Media Coverage of the European Economic Crisis* Julien
Mercille,2014-08-27 The European economic crisis has been ongoing since 2008 and while austerity has spread over the
continent it has failed to revive economies The media have played an important ideological role in presenting the policies of
economic and political elites in a favourable light even if the latter s aim has been to shift the burden of adjustment onto
citizens This book explains how and why using a critical political economic perspective and focusing on the case of Ireland
Throughout Ireland is compared with contemporary and historical examples to contextualise the arguments made The book
covers the housing bubble that led to the crash the rescue of financial institutions by the state the role of the European
institutions and the International Monetary Fund austerity and the possibility of leaving the eurozone for Europe s peripheral
countries Through a systematic analysis of Ireland s main newspapers it is argued that the media reflect elite views and
interests and downplay alternative policies that could lead to more progressive responses to the crisis **Evaluation of**
Belgium's COVID-19 Responses Fostering Trust for a More Resilient Society OECD,2023-12-14 This report builds on
the OECD work on government evaluations of COVID 19 responses It evaluates Belgium s responses to the pandemic in
terms of risk preparedness crisis management as well as public health education economic and fiscal and social and labour
market policies **Consolidated Review of Current Information** United States. Department of the Treasury.
