**Behavioural Foundations of Economics** J. Baxter,2016-07-27 In recent years work on what may broadly be described as behavioural economics has expanded rapidly and is now attracting the attention of leading figures in economics such as Kenneth Arrow Much of the work however has concentrated on particular aspects of individual and aggregate behaviour The book attempts to construct a unified framework showing both how behavioural variables form the basis of economic activity and how behavioural and economic variables interact to determine individual and aggregate behaviour

**International Trade, Capital Flows and Economic Development in East Asia** Anthony Bende-Nabende,2017-03-02 The book provides an understanding of how international trade and capital flows have engineered the development process in East Asia and examines the real and potential challenges that the region is expect to encounter in the twenty first century It integrates four topics i e capital flows East Asia globalization and economic development that are at the centre of the social political and economic debate The text highlights the region s growing strategic importance in the twenty first century globalizing world where transnational corporations are playing an increasingly decisive role in the global distribution of production and trade It blends generalised regional analyses with country specific case studies in the world s most dynamic region It is so well designed that each of the seventeen countries that comprise the region gets some space for discussion Thus the text is a valuable contribution to the social science and business literature with a special focus on the now strategic region of East Asia

Hogarth, 1990-04-18 How do people make decisions How can we help people make better decisions How can we best study the processes of decision making The growing field of behavioral decision research which seeks to link observed decision behavior to underlying psychological mechanisms may provide the answers to these questions The volume is based on a recent conference held to honor the work and memory of the late Hillel J Einhorn a pioneering scholar in behavioral decision research Composed of contributions by leading researchers *Insights in Decision Making* provides a state of the art image of work in this field The range of topics covered includes conceptual and technical issues the bridge the gap between theory and the practical concern of improving decision making difficulties in statistical thinking experimental studies of processes of judgment and choice and the emergence of new paradigms for studying decision behavior Providing many avenues for future research *Insights in Decision Making* will be essential reading for students of the psychology of decision making and will prove valuable to readers in psychology economics statistics and management      *The Limits of Rationality* Karen Schweers Cook, Margaret Levi, 2008-10-03 Prevailing economic theory presumes that agents act rationally when they make decisions striving to maximize the efficient use of their resources Psychology has repeatedly challenged the rational choice paradigm with persuasive evidence that people do not always make the optimal choice Yet the paradigm has proven so successful a predictor that its use continues to flourish fueled by debate across the social sciences over why it works so well Intended to introduce novices to rational choice theory this accessible interdisciplinary book collects writings by leading researchers The
