**Entrepreneurship in the Informal Sector** Colin C. Williams, 2017-09-22 How many businesses start ups conduct some or all of their trade off the books And how many enterprises continue to do some of their work off the books once they are more established What should be done about them Should governments adopt ever more punitive measures to eradicate them Or should we recognise this hidden enterprise culture and attempt to harness it If so how can this be done What measures can be taken to ensure that businesses start up in a proper manner And what can be done to help those enterprises and entrepreneurs currently working

off the books to legitimise their businesses The aim of this book is to advance a new way of answering these questions Drawing inspiration from institutional theory informal sector entrepreneurship is explained as resulting from the asymmetry between the codified laws and regulations of a society's formal institutions and the norms values and beliefs that comprise a society's informal institutions The argument is that if the norms values and beliefs of entrepreneurs i.e. their individual morality were wholly aligned with the codified laws and regulations i.e. state morality there would be no informal sector entrepreneurship However because the individual morality of entrepreneurs differs from state morality such as due to their lack of trust in government and the rule of law the result is the prevalence of informal sector entrepreneurship The greater the degree of institutional asymmetry the higher is the propensity to engage in informal sector entrepreneurship This book provides evidence to show that this is the case both at the individual and country level and then discusses how this can be overcome Routledge Handbook of Entrepreneurship in Developing Economies Colin C. Williams, Anjula

Gurtoo, 2016-07-22 The Routledge Handbook of Entrepreneurship in Developing Economies is a landmark volume that offers a uniquely comprehensive overview of entrepreneurship in developing countries Addressing the multi-faceted nature of entrepreneurship chapters explore a vast range of subject areas including education economic policy gender and the prevalence and nature of informal sector entrepreneurship In order to understand the process of new venture creation in developing economies what it means to be engaged in entrepreneurship in a developing world context must be addressed This handbook does so by exploring the difficulties risks and rewards associated with being an entrepreneur and evaluates the impacts of the environment relationships performance and policy dynamics on small and entrepreneurial firms in developing economies The handbook brings together a unique collection of over forty international researchers who are all actively engaged in studying entrepreneurship in a developing world context The chapters offer concise but detailed perspectives and explanations on key aspects of the subject across a diverse array of developing economies spanning Africa Asia Latin America and Eastern Europe In doing so the chapters highlight the heterogeneity of entrepreneurship in developed economies and contribute to the on-going policy discourses for managing and promoting entrepreneurial growth in the developing world The book will be of great interest to scholars students and policymakers in the areas of development economics business and management public policy and development studies **Visitor Attractions and Events** Adi

Weidenfeld, Richard Butler, Allan M. Williams, 2016-04-28 Both visitor attractions and events play pivotal roles in the appeal of tourism destination regions to visitors by virtue of being the main motivator of tourist trips and determining consumers' choices However more recently visitor attractions have become more multifaceted have proliferated and fragmented in terms of form location scale and style and their role is undergoing major changes in a post-modern world as a result of consumer demands and competitive innovations Visitor Attractions and Events for the first time theoretically and empirically explores the relations between events and attractions to offer new thinking of the role of space and place in shaping development

management practices and strategies in the sector as well as future implications The book reveals how location is pivotal in the development planning and management of visitor attractions and events Whereas the location of natural attractions is relatively fixed in space and their locations cannot be predetermined or relocated human made or contrived attractions are more influenced by the planning process in the context of the locational decision making process Competition and cooperation between visitor attractions and the aspects which shape these relations including complementarities compatibility knowledge spill overs and diffusion of innovations product similarities and spatial proximity remain largely ignored in the visitor attraction sector and thus are major elements in the focus of this book Comparative examples ranging from small to major attractions in a wide variety of locations are included This significant volume will appeal widely to all those interested in the visitor sector such as tourism events leisure studies destination management and sociology

**Measuring the Global Shadow Economy** Colin C. Williams,Friedrich Schneider,2016-01-29 This book brings together two leading researchers in the field to provide a comprehensive overview of the shadow economy from a global perspective Reviewing the advantages and disadvantages of different ways of measuring the informal sector the authors evaluate its size and key determinants across the world Williams and Schneider clearly establish the persistence and prevalence of the shadow economy analysing the narrowness of existing policy approaches and explaining how these fail to address the key factors for its existence and may even exacerbate the problem Proposing an alternative way forward the authors argue that little headway will ever be made in reducing the shadow economy until there are changes not only to the character of formal institutions but also informal institutions the values beliefs and norms of citizens through the introduction of macro level structural changes This timely cutting edge review of the global shadow economy and how it can be measured and tackled is an invaluable resource for postgraduate students researchers and policy makers particularly those with a interest in tax evasion and informal labour

**Peripheralization** Matthias Naumann,Andrea Fischer-Tahir,2013-01-12 Peripheries emerge as a result of shifts in economic and political decision making at various scales Therefore peripheral spaces are not a natural phenomenon but an outcome of the intrinsic logic of uneven geographical development in capitalist societies Discussing examples from Germany Eastern Europe Turkey

Iraqi Kurdistan Pakistan India and Brazil the volume describes the social production of peripheries from different theoretical and methodological perspectives In so doing it argues in favour of a re politicization of the recent debate on peripheralization
