[Sex Tourism in Africa](#) Wanjohi Kibicho, 2016-04-01. Illustrated by in depth empirical research from Kenya, one of the most popular country destinations in Africa for sex tourism, this book gathers much needed statistics and data and then critically examines the features of tourism and the sex trade contextualizing this in relation to tourism development. It addresses the conditions which generate this social problem and while not taking a potentially problematic moralistic stance, it questions whether this trade is exploitative in nature, particularly in cases of child sex tourism. It then critically evaluates the current policies in place to regulate the sex tourism industry and provides suggestions for future direction.

The series is designed to help the general reader understand a variety of complex factors, social, political, and economic, that will bear on a region's economic growth. Each volume closes with a series of appendices that include a detailed chronology of events in the region, a glossary of terms, biographical entries on key personalities, an annotated bibliography of further reading, and an index.

*Chinese Economy in Disequilibrium* Yining Li, 2013-11-25. Known internationally as Mr Shareholding economist, Li Yining has had a transformative impact on China's economic transition, most notably as an early advocate of ownership reform and in his promotion of shareholding theory. By examining the interrelationship between the government enterprises and the market, *Chinese Economy in Disequilibrium* presents an in depth discussion on the issues of resource allocation, industrial structure, institutional innovation, and economic fluctuation in the current Chinese economy under the condition of disequilibrium. Credited with developing the theory of economic disequilibrium, Professor Li distinguishes two types of disequilibrium on the basis of whether or not the majority of

firms in the economy are viable profit makers In Chinese Economy in Disequilibrium Professor Li points out that not only has China's economy been in a state of disequilibrium but it also has issues with enterprises not being under budget constraint Given the limitations of market regulation under economic disequilibrium Professor Li advocates the reform of the enterprise system and upholds the government's leading role in the establishment of order in the socialist commodity economy A number of measures are also proposed with the aim of facilitating the transition of China's economy from disequilibrium to equilibrium The central theme is that the reform and transition are means to serve economic growth and social development which would eventually benefit the ordinary citizens in society Yining Li is a Professor of Economics and Emeritus Dean of Peking University's Guanghua School of Management He is one of China's foremost economists and the author of twenty books and numerous articles on a wide range of economic subjects including reform and development in China He has received a number of prestigious awards and honours for his research As the leading proponent of a market economy in China Professor Li has had a tremendous influence on China's economic reform policy over the last three decades He has served on the Standing Committee of the National People's Congress of China and is currently Vice Chairman of the Economic Committee of the Chinese People's Political Consultative Conference
