wisdom has supposed Chris Nyland from Monash University A Research Annual Jeff E. Biddle, Ross B. Emmett, Marianne Johnson, 2013-11-01 Research in the History of Economic Thought and Methodology is an annual series which presents research materials in the fields of the history of economic thought and the methodology of economics *Adam Smith and the Virtues of Enlightenment* Charles L. Griswold, 1999 Charles Griswold has written a comprehensive philosophical study of Smith's moral and political thought Griswold sets Smith's work in the context of the Enlightenment and relates it to current discussions in moral and political philosophy Smith's appropriation as well as criticism of ancient philosophy and his carefully balanced defence of a liberal and humane moral and political outlook are also explored This 1999 book is a major philosophical and historical reassessment of a key figure in the Enlightenment that will be of particular interest to philosophers and political and legal theorists as well as historians of ideas rhetoric and political economy Essays on Classical and Marxian Political Economy Samuel Hollander, 2013-02-11 Samuel Hollander's work has been provoking debate for over four decades This book brings together key contributions of recent years in addition to some brand new pieces The essays are introduced by a Preface in which Hollander reflects on his past work and reactions to it Highlights include two issues of particular current relevance Conspicuous is an extensive chapter regarding Adam Smith's often neglected arguments for government intervention in the economy to correct market failures and his critical view of the business class as an anti social force Important economists considered in relation to Adam Smith's position on the role of the state include Jeremy Bentham and the Scottish Canadian John Rae Similarly of high present day interest is a re examination of Karl Marx's theory of exploitation or the notion of profits as embezzlement demonstrating Marx's effective abandonment of this perspective in the case of the small active businessman as distinct from the major joint stock corporation Other papers demonstrate the close intellectual relationship between David Ricardo and Thomas Robert Malthus the extensive common ground between the British school and the French under the leadership of Jean Baptiste Say the failure of a so called anti Ricardian opposition in Britain represented by Samuel Bailey and the denial of a sharp discontinuity between classical and later neo classical economics Finally several biographical essays are included as well as an extension of the autobiographical account appearing in *Collected Essays II* **Reflections on the Classical Canon in Economics** Evelyn L. Prasch, Falguni A. Sheth, 2006-11-27 Explores how economic reasoning relates to the broader concepts of liberalism and racism *Inframarginal Contributions To Development Economics* Christis G Tombazos, Xiaokai Yang, 2006-10-09 The core of

classical economic analysis represented by William Petty and Adam Smith concentrated on the field of development economics This classical footing of the study of development is different from the neoclassical perspective in two important respects a it focuses on division of labor as the driving force of development and b it emphasizes the role of the market the invisible hand in exploiting productivity gains that are derived from division of labor However these aspects have received little attention in the body of literature that represents the modern field of development economics which largely represents the neoclassical application of marginalism A notable exception is research that utilizes inframarginal analysis of individuals networking decisions in an attempt to formalize the classical mechanisms that drive division of labor This book is a first attempt to collect relevant key contributions and is intended for active researchers in the field of development economics
