Economic Policies In Canada:

Economic Policies in Canada Ingrid A. Bryan, 1982 *Capital Transfers and Economic Policy: Canada, 1951-1962* Richard E. Caves, Grant L. Reuber, 1971 Between 1951 and 1962 nearly ten billion dollars in long term capital both direct investment and purchase of securities flowed into Canada This massive amount represented one third of all long term capital moving among industrial nations Its transfer marked the first time since before World War I that the world witnessed such a large scale international movement of capital motivated primarily by a prospect of higher rates of return In *Capital Transfers and Economic Policy* the authors test the theory of the causes and effects of international capital movements against the evidence drawn from Canada's experience They explore Canada's adjustment to capital flows and show how the operation of her economic policy is affected by the sensitivity of capital flows to the country's interest rates and foreign exchange rate Their brilliant analysis is particularly valuable in light of current trends in capital flows among industrial nations and the June 1970 return of the Canadian dollar to a flexible exchange rate which put the economy in a working situation similar to that of the fifties

National Economic Policies D. Salvatore, 2014-06-28 This book presents an overview of national economic policies in the world's most important countries or groupings of countries The purpose of the volume is to examine and compare the policies followed by different types of countries and study their effects Although numerous studies have been published on how individual countries conduct economic policies few if any comparative studies such as the present one have been issued This volume will be of great use to students of comparative economic systems in general and to economists policymakers and the general informed public as a source of reference and comparison

Canadian Economic Policy and the Impact of International Capital Flows Richard E. Caves, Grant L. Reuber, 1969-12-15 The object of this study is to investigate the effects that complete and formal integration of the Canadian with the American capital market would have on the Canadian economy It is based largely on recent trade statistics particularly those of the period when the exchange rate floated In summary the short and long run effects could both be beneficial to Canada This study is a convenient summary of a longer work by the same authors to be published in 1970

Macroeconomic Policy in the Canadian Economy Panos Afxentiou, Apostolos Serletis, 2012-12-06 Macroeconomic Policy in the Canadian Economy investigates developments in Canada over the last forty years using recent advances in the field of applied econometrics In particular the book analyzes the theoretical foundations of public sector activities and evaluates the several theories of government growth Issues of convergence are also investigated as they manifest themselves in per capita income across Canadian provinces and as to how successful government income equalization policies have been in furthering such convergence Moreover the openness of the Canadian economy is investigated in terms of the importance of exports on GDP growth and of its participation in the world of an internationally integrated capital market The book also analyzes monetary policy issues and investigates the role of monetary aggregates and the effectiveness of monetary policy Finally it

addresses the issue of the existence or not of electoral and partisan cycles in Canada by incorporating both fiscal and monetary principles and applying them to the lively world of Canadian politics Canada in a Wider Economic Community H. Eastman, 1972-12-15 The Private Planning Association of Canada initiated the Atlantic Economic Studies Program to study the implications for Canada of trade liberalization and closer economic integration among the nations bordering the North Atlantic Over twenty studies by leading economists which point out the significance of international trade for the structure and growth of the Canadian economy have been published in a series of thirteen volumes This is the last in the series and it summarizes the conclusions expressed in the previous studies in chapters dealing with such topics as the growth of world markets and changing trade patterns free trade alternatives for Canada and the structure of the Canadian economy **Country Reports on Economic Policy and Trade Practices**, 1995 Country Reports on Economic Policy and Trade Practices United States. Rugman, 2013-03-09 Multinational enterprises have become one of the distinctive institutions of our times Controversy over their economic and political effects and over appropriate public policy responses has become common in home and host countries and in international agencies Much of this debate is reminiscent of the role of large corporations generally particularly in their interregional and intergroup effects The multinational setting however would have raised distinctive issues even apart from the strong surges of nationalism and anti imperialism which have marked recent history Canada has a long and unusual experience with such enterprises Foreign control of capital in the nonfinancial industries manufacturing petroleum and gas other mining and smelting utilities merchandising was already 20 percent in 1930 and 25 percent in 1948 It rose to 36 percent by the late 1960s but has since receded to about 30 percent In 1975 fully 55 percent of the capital in manufacturing was controlled outside Canada as was 72 per cent of that in petroleum and gas and 58 percent in other mining These figures exceed those of other developed countries although there have been striking increases in recent decades About 80 percent of the direct investment capital in Canada is from the United States Recently Canadians have become aware of a surge of Canadian direct investment abroad which on a flow basis has exceeded inflows exclusive of retained earnings for most of the 1970s Canadian Foreign Policy and International Economic Regimes A. Claire Cutler, 2011-11-01 As the world economy is becoming increasingly global in nature the future of Canada's welfare will directly depend on the country's response and reaction to a wide range of economic regimes which govern the international economy This volume is an important and timely analysis of past and current Canadian policies toward both the formal and less formal arrangements which regulate such areas as international trade and financial transactions international service industries fisheries resources and the environment Often influenced by domestic political concerns and its relations with the United States Canada has as the authors point out exhibited a high degree of variation in its responses to these regimes Canadian Foreign Policy and International Economic Regimes addresses a broad range of foreign economic policies not generally considered in the foreign policy literature Interdisciplinary in its approach it will be of interest to those in political science and public policy economics and law as well as to those involved in international business The New Practical Guide to Canadian Political Economy Daniel Drache, Wallace Clement, 1985-01-01 The New Practical Guide to Canadian Political Economy is a handy reference to the vast range of research and writing that political economists in Canada have completed to the date of publication The book is divided into twenty five subject bibliographies each one compiled and introduced by an expert in the field The overall range of subjects includes economic development in Canada Canada's external economic relations regional disparities and regional development social and economic classes women Native peoples politics and the Canadian state nationalism culture and political thought The book is indexed by author and includes a helpful shortlist of the staples in Canadian political economy

Published in 1985 The New Practical Guide to Canadian Political Economy remains a useful reference to some of the classic literature of the discipline **OECD Economic Surveys: Canada 1975** OECD,1975-06-01 OECD s 1975 Economic Survey of Canada examines recent economic developments economic policy and economic prospects before drawing a series of policy conclusions The Economics of the Third Way Philip Arestis,Malcolm C.
