Cohen, 2018-06-05 Is globalization leading us toward a world of fewer and fewer currencies and consequently simplified monetary management Many specialists believe this is the case as the territorial monopolies national governments have long claimed over money appears to be eroding In *The Future of Money* Benjamin Cohen argues that this view which he calls the Contraction Contention is wrong Rigorously argued written with extraordinary clarity and thoroughly up to date this book demonstrates that the global population of currencies is set to expand greatly not contract making monetary governance more difficult not less At the book's core is an innovative theoretical model for understanding the strategic preferences of states in monetary management Should governments defend their traditional monetary sovereignty or should they seek some kind of regional consolidation of currencies The model offers two broad advances First whereas most scholarly work evaluates strategic options individually or in comparison to just one other alternative this model emphasizes the three dimensional nature of the decisions involved Second the model emphasizes degrees of currency regionalization as a central determinant of state preferences Cohen also systematically explores the role of the private sector as an alternative source of money The book concludes with two key policy proposals First fiscal policy should be resurrected as a tool of macroeconomic management to offset the present day erosion in the effectiveness of monetary policy Second the International Monetary Fund should more actively help coordinate the decentralized strategic decision making of governments The future of money will be perilous But by mapping out the alternative policies countries can follow *The Future of Money* shows it need not be chaotic

perspective of developing countries emerging markets and transition economies Russia And Eastern Europe After Communism Michael Kraus, Ron Liebowitz, 2019-06-04 The conference on Russia and East Europe in Transition held at Middlebury College in May 1994 under the auspices of the Center for Russian and East European Studies provided the impetus for this volume The two day gathering was made possible by a Title VI grant from the U S Department of Education and the Jessica Swift Endowed Lecture Fund of Middlebury College for which we are most grateful Apart from the contributors to this volume the conference participants included George Bellerose Raymond E Benson Valery Chalidze Michael Claudon David Colander Guntram H Herb Lars Lib Tamar Mayer Noah M J Pickus Sunder Ramaswamy David A Rosenberg and Mitchell Smith Acting as discussants panel chairs or interested participants their efforts individually and collectively have made this a better book and their contribution to this project is gratefully acknowledged *The Economic History of Central, East and South-East Europe* Matthias Morys, 2020-12-29 The collapse of communism in Central East and South East Europe CESEE led to great hopes for the region and for Europe A quarter of a century on the picture is mixed in many CESEE countries the transformation process is incomplete and the economic catch up has taken longer than anticipated The current situation has highlighted the need for a better understanding of the long term political and economic implications of the Central East and South East European historical experience This thematically organised text offers a clear and comprehensive guide to the economic history of CESEE from 1800 to the present day Bringing together authors from both East and West the book also draws on the cutting edge research of a new generation of scholars from the CESEE region Presenting a thoroughly modern overview of the history of the region the text will be invaluable to students of economic history and CESEE area studies **The Last Shall Be the First: The East European Financial Crisis** Anders Åslund, 2010 The Political Economy of the Eurozone in Central and Eastern Europe Krisztina Arató, Boglarka Koller, Anita Pelle, 2021-06-30 The idea for this volume came from the enigma that some Central and Eastern European CEE European Union EU member states have been keen to join the Eurozone while others have shown persistent reluctance Moreover the attitudes towards joining have seemingly not correlated with either the level of economic development or the time spent as part of the EU nor with any other rational reason such as the level of integration into the EU real economy or the level of trust in the EU on the part of the public Therefore at first sight the answer to the question why in why out remains rather unclear The attractiveness of the currency union has nevertheless not disappeared for the CEE countries Despite the Eurozone crisis of 2010 13 it was during that time that the Baltic states introduced the euro Then after a few years of inactivity Croatia and Bulgaria successfully applied for membership of the exchange rate mechanism in July 2020 amid the economic crisis caused by the coronavirus COVID 19 pandemic At the same time the three Visegrad countries still using their national currencies Poland Czechia and Hungary no longer have a target date to join the monetary union This volume aims to discuss these issues from horizontal aspects and through country studies with contributions from expert authors from or
