Historical Dictionary of the World Bank Sarah Tenney, Anne C. Salda, 2013-10-30. When it was founded back in 1944 no one could possibly have foreseen how the World Bank known more formally as the International Bank for Reconstruction and Development IBRD would flourish. Today with 188 members it is by far the largest lender for projects in agriculture health infrastructure and many other fields in developing countries around the world with a budget of billions of dollars and a staff of more than 9 000 and its advice is usually heeded by both the developing countries which borrow from it and the advanced ones which contribute. This second edition of the Historical Dictionary of the World Bank shows the substantial progress the Bank has made this mainly through the dictionary section with concise entries on its component institutions related organizations its achievements in various fields some of the major projects and member countries and its various presidents. The introduction explains how the Bank works while the chronology traces the major events over nearly 70 years. Meanwhile the list of acronyms reminds us just who the main players are. And the bibliography directs readers to useful internal documentation and outside studies.

Cleaner Transport Fuels for Cleaner Air in Central Asia and the Caucasus Masami Kojima, 2000. Urban air pollution is a matter of concern in many of the newly independent states of Central Asia and the Caucasus. The poor quality of the fuel used by the largely poorly maintained vehicle stock just worsens emissions problems. It is estimated that nearly 40 000 people die prematurely and about 100 000 people fall ill every year in the big cities of the region as a result of exposure to excessive air pollution. The projections for the next 10 to 15 years are for higher vehicle numbers and increased vehicle use leading to a steady rise of damaging pollutants if current policies regarding fuel specifications and vehicle standards are not addressed quickly. This report gives the World Bank's assessment of the problem faced by the countries in the region. It puts forward a framework for short and medium term measures for improving fuel quality and vehicle emissions performance.

Environmental Problems in East-Central Europe Frank Carter, David Turnock, 2002-09-26. In this new edition the progress made in the last decade to solve the environmental problems described in the first edition is assessed. The attempts to bring environmental legislation into line with West European norms is also described. Environmental Problems of East Central Europe looks at air and water pollution modern farming water supplies waste management and landscape protection. These topics are placed within economic social and political profiles as spending on a clean environment must be reconciled with welfare spending and the safeguarding of jobs. European Union assistance civil society and the work of environmental NGOs are also discussed. All of

these matters are considered within the context of the wider geographical area and then by each individual country including the previously communist states lying to the west of the Soviet Union now with the former federal states of Czechoslovakia and Yugoslavia broken up into seven different entities and a review of the former Soviet Union with particular reference to the Baltic States Environmental Problems in East Central Europe provides a wealth of up to date reference material with a vast amount of supporting literature on environmental conditions and the functioning of civil society and a map of each country The environment is being taken seriously by them all such is the influence of the Rio sustainability agenda in general and the EU environmental acquis in particular The book reveals that Eastern Europe is not a blighted area but in some respects has a higher biodiversity than Western Europe Although there is enormous waste and inefficiency in energy use people actually consume relatively little and the East therefore has some lessons for the West in terms of managing on the bases of fair share of the earth s resources
