finance Local Engagement with International Economic Law and Human Rights Ljiljana Biukovic, Pitman B. Potter, 2017-05-26 Providing an analysis of global regulation and the impact of international organizations on domestic laws this collection grew out of a central objective to explore methods of domestic engagement with international trade and human rights norms and the inherent difficulties in establishing balanced links between these two international law regimes The common thread of the papers in this collection is a focus on the application of socio legal normative paradigms in building knowledge and policy support for coordinating local performance with international trade and human rights standards in ways that are mutually sustaining **Principles of International Economic Law** Matthias Herdegen, 2024-05-07 Herdegen's Principles of International Economic Law has established itself as a leading textbook in the field This fully updated third edition covers areas of growing relevance in international economic law including corporate social responsibility challenges for WTO law the impact of human rights and environmental law and cryptocurrencies *The Financial Crisis in Constitutional Perspective* Poul F Kjaer, Gunther Teubner, Alberto Febbrajo, 2011-07-27 This volume presents the first thorough sociologically informed legal analysis of the financial crisis which unfolded in 2008 It combines a multitude of theoretically informed analyses of the causes dynamics and reactions to the crisis and contextualises these within the general structural transformations characterising contemporary society It furthermore explores the constitutional implications of the crisis and suggests concrete changes to the constitutional set up of contemporary society Although the question of individual responsibility is of crucial importance the central idea animating the volume is that the crisis cannot be reduced to a mere failure of risk perception and management for which individual and collective actors within and outside of financial organisations are responsible The 2008 crisis should rather be understood as a symptom of far deeper structural transformations For example contemporary society is characterised by massive accelerations in the speed with which societal processes are reproduced as well as radical expansions in the level of globalisation These transformations have however been asymmetrical in nature insofar as the economic system has outpaced its legal and political counterparts The future capability of legal and political systems to influence economic reproduction processes is therefore conditioned by equally radical transformations of their respective operational forms and self understanding Potentially the 2008 crisis therefore has far reaching constitutional implications **Economic Constitutionalism in a Turbulent World** Achilles Skordas, Gábor Halmai, Lisa Mardikian, 2023-05-09 This insightful and timely book explores the complexity and resilience of the discourse on economic constitutionalism over a period of heightened economic and political turbulence since the economic crisis of 2008 and Brexit and its continuous relevance despite the Covid 19 public health crisis and the Russian invasion of Ukraine Providing a sustained and comprehensive analysis of the concept of economic constitutionalism in European and global governance this book evaluates the origins functions and normative elements of economic constitutionalism and places the discussion within contemporary theoretical frameworks *Economic and Political Institutions in Economic Policy* Vitantonio

Muscatelli,1996 Bringing together leading names from different economic disciplines the volume includes chapters on elections and the economy distributional policies and constitutional design and government and the market Legal, Political and Economic Strategies of Subsidies within the World Trade Organization Juliana Marteli Fais Feriato,2024-11-01 From the Law and Economics perspective the book reveals the gaps of the trade multilateral system that allows governments to draw upon subsidies strategies according to their unilateral interests The book suggests that failures in WTO mechanisms has become great challenge for the multilateral system to restrain trade diversion Due to their character as public expenditures since they are granted by governments through tax incentives or direct financial investment granting subsidies are directly linked to the economic power of the countries For this reason some subsidies constitute a serious unfair trade practice that needs to be fought multilaterally depending on global cooperation so that all countries can have access to international trade Poor countries are severely affected by theses practices meanwhile not all developing countries are impacted the same way because there are considerable levels of development Based on this the book proposes a preventive mechanism to discourage subterfuge and opportunism of rich countries in search of efficiency In order to do so firstly it will be addressed the economic theories that underlie free trade and the subsidies influence over international economy Next the Law and Economics approach will be presented by which the problematic economic and political subsidy strategies of member countries will be analyzed Based on these premises the book shows how subsidies and countervailing measures are regulated within the WTO and it points out the failures of the WTO mechanisms to combat specific subsidies which accentuate the differences between rich and poor countries Finally the book proposes preventive measures to hinder harmful effects of subsidies from materializing New Economic Constitutionalism in Europe George Gerapetritis,2019-10-31 New Economic Constitutionalism in Europe focuses on the institutional mutation of constitutionalism following the major economic crisis in the Eurozone and globally The main axis is that a new economic constitutionalism has arisen which trespasses on the conventional conceptual foundations and needs to be addressed with novel institutional vehicles The author proposes an original and searching analysis of the significant constitutional evolutions that have taken place in member states in response to the global financial crisis The book combines a sophisticated theoretical model of a new form of economic constitutionalism with detailed practical argumentation This important new work provides a valuable addition to the understanding of this hugely important topic **Chintrepreneurship or Shanzhai Model** Jiangning Zhao,2023-04-18 Theoretically the formational and developmental mechanism of Shanzhai Model the Chintrepreneurship the China way of Doing Business theorized in this text in addition to complying with the traditionally Western dominated frameworks of risk taking oriented technology oriented resource oriented and speculation oriented also creates the peculiar or updated characteristics complementary and supplementary to the existing theories of entrepreneurship and strategic management The peculiar characteristics of Shanzhai Model may be attributed to the government policy guidance from macroeconomic
