Civil Service Reform in Francophone Africa 'Ladipo Adamolekun, Guy de Lusignan, Armand Atomate, 1997-01-01 The world s financial markets are rapidly integrating into a single global marketplace and developing countries are being drawn into this process starting from different points and moving at various speeds Those with adequate institutions and sound policies in place may proceed smoothly along the road toward financial integration and gain the many benefits that integration can bring Most of the developing economies lack many of the necessary prerequisites for such a move a few are so unprepared that integration may do them more harm than good Developing countries may have little choice about whether to follow this path advances in communications and new developments in finance have made the course inevitable but they may still choose the ways in which they proceed choosing the policies that benefit the economy and averting potential shocks This World Bank report looks at the important challenges both sets of countries face in a new age of global capital The book presents new and compelling evidence that while low interest rates in industrial countries provided an initial impetus to the surge in private capital flows during 1989-93 these flows have entered a new phase driven by increased financial integration The report analyzes the causes and effects of integration with a particular emphasis on how developing countries in the nascent stages of integration can learn from the experiences of the more rapidly integrating developing countries

Democracy and Development R.C. Bhardwaj, K. in Eastern Europe led to considerable rethinking in political circles on the efficacy of the economic policies pursued in those countries and the long term viability of political systems prevalent there Elsewhere several newly industrialized countries are striving to consolidate their gains though there are differing perceptions of whether their politics conform to the classical framework of democracy or not In a remarkable turn around some other countries have initiated measures for economic reforms and structural adjustment setting aside their earlier approaches towards economic management In short the last decades of this millennium have witnessed meaningful efforts worldwide on forging a new partnership between democracy and development In February 1996 the Commonwealth Parliamentary Association jointly organized a conference entitled Parliamentary Democracy and Development Allies or Adversaries with the Wilton Park an international agency of the British Commonwealth and Foreign Office in Wilton House West Sussex United Kingdom The week long conference brought together parliamentarians diplomats administrators political scientists economists and specialists from all over the world The participants shared their views and experiences on diverse aspects of the main theme This publication presents an essentially parliamentary perspective on the correlation between democracy and development based on the discussions at the Wilton Park conference and in the light of current thinking on the subject matter *Democratization and Bureaucratic Neutrality* Haile K. Reis, 2016-07-27 The book focuses on the mutual implications of bureaucratic neutrality and democracy from the perspective of societies formerly under authoritarian regimes It explores the impact of democratization on bureaucratic neutrality as well as the implications of neutral bureaucracies for democracy Theoretical and conceptual dimensions of the subject are spelled out and specialists discuss case studies from Eastern Europe Africa Latin America and Asia therefore compounding a broad panel of the challenges and opportunities confronting the democratization process throughout the world *Decentralizing Governance* G. Shabbir Cheema, Dennis A. Rondinelli, 2007-08-01 The trend toward greater decentralization of governance activities now accepted as commonplace in the West has become a worldwide movement This international development largely a product of globalization and democratization is clearly one of the key factors reshaping economic political and social conditions throughout the world Rather than the top down centralized decisionmaking that characterized communist economies and Third World dictatorships in the twentieth century today s world demands flexibility adaptability and the autonomy to bring those qualities to bear In this thought provoking book the first in a new series on Innovations in Governance experts in government and public management trace the evolution and performance of decentralization concepts from the transfer of authority within government to the sharing of power authority and responsibilities among broader governance institutions This movement is not limited to national government it also affects subnational governments NGOs private corporations and even civil associations The contributors assess the emerging concepts of decentralization e g devolution empowerment capacity building and democratic governance They detail the factors driving the movement including political changes such as the fall of the Iron Curtain and the ascendance of

democracy economic factors such as globalization and outsourcing and technological advances e g increased information technology and electronic commerce Their analysis covers many different contexts and regions For example William Ascher of Claremont McKenna College chronicles how decentralization concepts are playing out in natural resources policy while Kadmeil Wekwete United Nations outlines the specific challenges to decentralizing governance in sub Saharan Africa In each case contributors explore the objectives of a decentralizing strategy as well as the benefits and difficulties that will likely result *Tanzanian Economic Trends* ,1992 *The Journal of Developing Areas* ,1990 **Periodica Islamica** ,1992
