Economic Science And Political Economy:

Economic Science and Political Economy Lionel Robbins,1997-08-04 Lionel Robbins Professor of Economics at the London School of Economics 1929 61 was the foremost British economist of his generation as well as being an influential public figure Although he wrote many articles and books on economic theory on contemporary issues of economic policy and in the history of economics many of his academic articles especially his early ones have not been reprinted This volume contains a selection of his major and most influential articles in theory policy and history **Conversations on Political Economy** Mrs. Jane (Haldimand) Marcet,1828 The Science Of Political Economy Henry George,2020 Henry George died fighting one of the most corrupt political organizations of the civilized world a sufficient epitaph for any worthy man But he has larger claims to respect and consideration He made a creditable attempt to solve the root problem of material life poverty and his just published posthumous book The Science of Political Economy excites that pathetic interest which attaches to the memory of one who tried to aid his fellowman He was eloquent but he was free from the hysteria of demagoguery His sympathies born of bitter vicissitude were acute but they were tempered with reason He believed in the equality of opportunity but he believed also as an American and an individualist in the natural inequality of capacity When he saw the industrial evils of the Old World reappear in one of the richest and fairest parts of the New commercial depression involuntary idleness wasting capital pecuniary distress want suffering anxiety he was startled and he set about to discover the cause We value him for what he tried to do Progress and Poverty was an immensely interesting and attractive book on a seemingly sapless science It struck fire from flint and lifted the author from obscurity to world wide celebrity Emerson says that every man is eloquent in that which he understands It would be perhaps truer to say that every man is eloquent in that in which he fervently believes and George believed that he had given a message To quote his own words On the night on which I finished the final chapter of Progress and Poverty I felt that the talent entrusted to me had been accounted for was more fully satisfied more deeply grateful than if all the Kingdoms of the earth had been laid at my feet No one doubts his sincerity his intellectual integrity the cleanliness of his soul His expectations were infinite his faith simple The poverty of the world lay not in Nature but in a vicious economic system and he thought that he had found a sovereign remedy which would raise wages increase the earnings of capital extirpate pauperism abolish poverty give remunerative employment to whoever wishes it afford free scope to human powers lessen crime elevate morals and taste and intelligence purify government and carry civilization to yet nobler heights **Political Economy, Political Science and Sociology** Richard Theodore Ely,1899

Conversations on Political Economy Mrs. Marcet (Jane Haldimand),1828 **The Present Condition of Economic Science and the Demand for a Radical Change in Its Methods and Aims** Edward Clark Lunt,1888 **The Elements of Political Economy** Henry Dunning Macleod,1858 **Conversations on Political Economy** Mrs. Marcet (Jane Haldimand),1819 *Conversations on Political Economy ; in which the Elements of that Science are Familiarly Explained.*

By the Author of "Conversations on Chemistry." Mrs Jane Haldimand Marcet, 1816 *What is so Austrian about Austrian Economics?* Steven Horwitz, Pierre Desrochers, Roger Koppl, 2010-08-12 The volume gathers together papers presented at the second biennial Wirth conference on Austrian economics held in October 2008 when the crisis of Fall 2008 was still new and shocking This coincidence of timing makes policy issues and crisis management a kind of leitmotif of the volume The Palgrave Companion to LSE Economics Robert A. Cord, 2019-01-18 The London School of Economics LSE has been and continues to be one of the most important global centres for economics With six chapters on themes in LSE economics and 29 chapters on the lives and work of LSE economists this volume shows how economics became established at the School how it produced some of the world's best known economists including Lionel Robbins and Bill Phillips plus Nobel Prize winners such as Friedrich Hayek John Hicks and Christopher Pissarides and how it remains a global force for the very best in teaching and research in economics With original contributions from a stellar cast this volume provides economists especially those interested in macroeconomics and the history of economic thought with the first in depth analysis of LSE economics

Cyclopædia of Political Science, Political Economy, and of the Political History of the United States, by the Best American and European Writers John Joseph Lalor, 1899 The Rise of Political Economy as a Science Deborah A Redman, 2003-01-01 Reviews the epistemological ideas that inspired the classical economists the methodological principles of Bacon Descartes Hobbes Newton Locke Hume Stewart Herschel and Whewell The classical age of economics was marked by an intense interest in scientific methodology It was moreover an age when science and philosophy were not yet distinct disciplines and the educated were polymaths The classical economists were acutely aware that suitable methods had to be developed before a body of knowledge could be deemed philosophical or scientific They did not formulate their methodological views in a vacuum but drew on a rich collection of philosophical ideas Consequently issues of methodology were at the heart of political economy's rise as a science The classical era of economics opened under Adam Smith with political economy understood as an integral part of a broader system of social philosophy by the end it had emerged via J S Mill as a separate science albeit one still inextricably tied to the other social sciences and to ethics The Rise of Political Economy as a Science opens with a review of the epistemological ideas that inspired the classical economists the methodological principles of Bacon Descartes Hobbes Newton Locke Hume Stewart Herschel and Whewell These principles were influential not just in the development of political economy but in the rise of social science in general The author then examines science in eighteenth and nineteenth century Britain with a particular emphasis on the all important concept of induction Having laid the necessary groundwork she proceeds to a history and analysis of the methodologies of four economist philosophers Adam Smith Robert Malthus David Ricardo and J S Mill selected for their historical importance as founders of economics and for their common Scottish intellectual lineage Concluding remarks put classical methodology into a broader historical perspective The Chicago School of Political Economy Warren Samuels, 2021-12-16 The Chicago

School of Economics is arguably the most successful and influential since World War II This volume provides an interpretation of the Chicago school through constructive critique of its doctrines It is an inquiry into the nature role and significance of the school and its doctrines within both the economics profession and the larger world of ideas and action This volume offers a deeper understanding of the school of its strengths and weaknesses and of the tasks of any body of thought that hopes to comprise an alternative

Conversations on Political Economy Jane Marcet,1821

Evolutionary Foundations of Economic Science Yuji Aruka,2014-10-04 This book aims to discern and distinguish the essential features of basic economic theories and compare them with new theories that have arisen in recent years The book focuses on seminal economic ideas and theories developed mainly in the 1930s to 1950s because their emergence eventually led to new branches of economics The book describes an alternative analytical framework spreading through the interdisciplinary fields of socioeconophysics and sociodynamics The focus is on a set of branching or critical points that separate what has gone before from what has followed W Brian Arthur used the term redomaining when he referred to technological innovation In the present volume the author aims to re domain economic theories suited for a new social order Major technological innovations accompany not only changes in the economy and the market but changes in their meaning as well In particular the evolution of trading technology has changed the meaning of the invisible hand At the end of the last century the advent of socioeconophysics became a decisive factor in the emergence of a new economic science This emergence has coincided with changes in the implications of the economy and the market which consequently require a redomaining of economic science In this new enterprise the joint efforts of many scientists outside traditional economics have brought brilliant achievements such as power law distribution and network analysis among others However the more diverse the backgrounds of economic scientists the less integrated the common views among them may be resulting in a sometimes perplexing potpourri of economic terminology This book helps to mitigate those differences shedding light on current alternative economic theories and how they have evolved
