Barnett, Jeffrey Zimmerman, Steven Walfish, 2014 Mental health professionals in private practice strive for clinical and financial success Yet there are myriad ethical issues and dilemmas awaiting every practitioner that serve as challenges to being successful for even the most clinically competent and savvy business persons Some ethics issues are obvious while others are more subtle and can undermine the best intentions of practitioners who have not prepared for these challenges Graduate training programs in the mental health professions offer courses in ethics for their students but few offer practical training in the application of ethics to the business of practice A resource focusing specifically on these challenges has been sorely needed The Ethics of Private Practice helps mental health professionals understand the essential ethical issues related to many of the challenges of being in independent mental health practice Seasoned clinicians Barnett Zimmerman and Walfish offer readers astute insight to help them build a practice that is designed to minimize unintended ethical violations and reduce associated risks Each chapter focuses on a major aspect of the business of practice and incorporates relevant standards from the ethics codes of four mental health professions Topics addressed include planning one's private practice successfully running and managing one's practice documentation and

**A Resident's Guide to Psychiatric Education** M. Thompson, 2012-12-06 This is the inaugural volume of the new series Critical Issues in Psychiatry An Educational Series for Residents and Clinicians It is an appropriate beginning for this book represents a milestone in the evolution of psychiatric education For the first time there will now be a single place where one can find a comprehensive collection of educational goals and objectives to define the broad spectrum of knowledge and skills essential for general and child psychiatry This collection does not represent the bias of a single educator or program Rather it consists of a consensually validated ranking of relative importance for each educational goal and objective as determined by a large and international sampling of experienced psychiatric educators as well as an editorial board with some of the most distinguished names in psychiatric education It is even possible to tell at a glance whether the ranked level of importance is the same or different within several national groups for example Canadians vs Americans This book is intended for all students of psychiatry It is particularly valuable to residents in training but equally so for experienced clinicians preparing for Board examination or simply attending to the process of continuing education and intellectual renewal While it might well be used by an institution to delineate the dimensions of a training program in psychiatry it is intended primarily for the self evaluation and self monitoring of one's growth as a psychiatrist

Kaplan, 2013-03-08 Entering a full time private practice and forsaking the comforts of a regular paycheck was a difficult decision for me Fortunately I was able to begin my practice on a part time basis in space rented from two physician friends By using my behavior skills for self management and organization I was then able to help my practice grow so that with some trepidation I moved into a full time practice I have continued to maintain my practice according to the same ethical professional and business assumptions discussed in this book One of the reasons for my writing this book is that at the time I was beginning my practice there was no one text that helped me begin or to explain what nuts and bolts issues I needed to consider As my practice has grown I continued to see a need for a resource text to help the beginning therapist get started I decided to describe the assumptions methods and issues that I have used so as to present a discussion of timely issues relevant to the practice of behavior therapy
