the Developing World Peter J. Burnell,Lise Rakner,Vicky Randall,2017 This textbook deals with central political themes and issues in the developing world including globalisation inequality identity religion the military democracy the environment and

policy development Politics and Culture in the Developing World Richard J. Payne, Jamal R. Nassar, 2015-10-15 From decolonization and democratization to religion and gender Politics and Culture in the Developing World is a comprehensive survey of the global context of development With in depth and current examples from Asia Africa Latin America and the Middle East this text examines the central political themes in the developing world Throughout Politics and Culture in the Developing World demonstrates how globalization both accelerates change and increases interdependence between developing and developed countries Shaping the Developing World Andy Baker, 2021-01-22 Why are some countries rich and others poor Colonialism globalization bad government gender inequality geography and environmental degradation are just some of the potential answers to this complex question Using a threefold framework of the West the South and the natural world Shaping the Developing World provides a logical and intuitive structure for categorizing and evaluating the causes of underdevelopment This interdisciplinary book also describes the social political and economic aspects of development and is relevant to students in political science international studies geography sociology economics gender studies and anthropology The Second Edition has been updated to include the most recent development statistics and to incorporate new research on topics like climate change democratization religion and prosperity the resource curse and more This second edition also contains expanded discussions of gender financial inclusion crime and police killings and the Middle East including the Syrian Civil War The Agronomy and Economy of Important Tree Crops of the Developing World K.P. Prabhakaran Nair, 2010-04-22 Major tree crops contribute substantially to the economy of many developing countries on the Asian African and Latin American continents For example coffee is the main revenue earner for Kenya This book provides a comprehensive review of the agronomy botany taxonomy genetics chemistry economics and future global prospects of a range of crops that have great food industrial and economic value such as cocoa coffee cashew oil palm and natural rubber Discusses the major tree crops of great economic value to the developing world The author is an eminent scientist who has won numerous awards for his work in this area *The Oxford Handbook of Urban Economics and Planning* Nancy Brooks, Kieran Donaghy, Gerrit-Jan Knaap, 2012-01-12 This volume embodies a problem driven and theoretically informed approach to bridging frontier research in urban economics and urban regional planning The authors focus on the interface between these two subdisciplines that have historically had an uneasy relationship Although economists were among the early contributors to the literature on urban planning many economists have been dismissive of a discipline whose leading scholars frequently favor regulations over market institutions equity over efficiency and normative prescriptions over positive analysis Planners meanwhile even as they draw upon economic principles often view the work of economists as abstract not sensitive to institutional contexts and communicated in a formal language spoken by few with decision making authority Not surprisingly papers in the leading economic journals rarely cite clearly pertinent papers in planning journals and vice versa Despite the historical divergence in perspectives and methods urban economics and urban planning share an intense interest

in many topic areas the nature of cities the prosperity of urban economies the efficient provision of urban services efficient systems of transportation and the proper allocation of land between urban and environmental uses In bridging this gap the book highlights the best scholarship in planning and economics that address the most pressing urban problems of our day and stimulates further dialog between scholars in urban planning and urban economics
