Eric Johnson, 2009-04-05 Security has been a human concern since the dawn of time With the rise of the digital society information security has rapidly grown to an area of serious study and ongoing research While much research has focused on the technical aspects of computer security far less attention has been given to the management issues of information risk and the economic concerns facing firms and nations Managing Information Risk and the Economics of Security provides leading edge thinking on the security issues facing managers policy makers and individuals Many of the chapters of this volume were presented and debated at the 2008 Workshop on the Economics of Information Security WEIS hosted by the Tuck School of Business at Dartmouth College Sponsored by Tuck's Center for Digital Strategies and the Institute for Information Infrastructure Protection I3P the conference brought together over one hundred information security experts researchers academics reporters corporate executives government officials cyber crime investigators and prosecutors The group represented the global nature of information security with participants from China Italy Germany Canada Australia Denmark Japan Sweden Switzerland the United Kingdom and the US This volume would not be possible without the dedicated work Xia Zhao of Dartmouth College

Grady, Francesco Parisi, 2006 Cybersecurity is an increasing problem for which the market may fail to produce a solution The ultimate source is that computer owners lack adequate incentives to invest in security because they bear fully the costs of their security precautions but share the benefits with their network partners In a world of positive transaction costs individuals often select less than optimal security levels The problem is compounded because the insecure networks extend far beyond the regulatory jurisdiction of any one nation or even coalition of nations This book brings together the views of leading law and economics scholars on the nature of the cybersecurity problem and possible solutions to it Many of these solutions are market based but they need some help either from government or industry groups or both Indeed the cybersecurity problem prefigures a host of 21st century problems created by information technology and the globalization of markets **Information security economics** Saèd El Aoufi, Stationery Office, 2011-07-29 This new title Information Security Economics explores the economic aspects of information security whilst explaining how best to work with them in order to achieve an optimized ROI on security investments It considers ways in which information security metrics can be utilized to support security initiatives and how requirements can be prioritized by organizations in order to maximize returns within a commercial environment which may have limited resources The author establishes a foundation for understanding the broader field of information security economics identifies key challenges that organisations face as regards the ever increasing threat profiles involved in information security illustrates the importance of linking information security with risk management explores the economics of information security from a cost benefit perspective demonstrates how information security metrics can identify where security performance is weakest assist management to support security initiatives and allow performance targets to be achieved establishes ways in which organisations need to prioritise information security requirements and controls in order to maintain cost effective deployment in a business environment which may have limited resources and gives practical recommendations to help organisations to proceed with the economic evaluation of information security **Human Aspects of Information Security and Assurance** Steven Furnell, Nathan Clarke, 2023-07-25 This book constitutes the proceedings of the 17th IFIP WG 11 12 International Symposium on Human Aspects of Information Security and Assurance HAISA 2023 held in Kent United Kingdom in July 2023 The 37 full papers presented in this volume were carefully reviewed and selected from 54 submissions They are organized in the following
