Racial Classification and History E. Nathaniel Gates, 1997 Explores the concept of race The term race which originally denoted genealogical or class identity has in the comparatively brief span of 300 years taken on an entirely new meaning In the wake of the Enlightenment it came to be applied to social groups This ideological transformation coupled with a dogmatic insistence that the groups so designated were natural and not socially created gave birth to the modern notion of races as genetically distinct entities The results of this view were the encoding of race and racial hierarchies in law literature and culture How racial categories facilitate social control The articles in the series demonstrate that the classification of humans according to selected physical characteristics was an arbitrary decision that was not based on valid scientific method They also examine the impact of colonialism on the propagation of the concept and note that racial categorization is a powerful social force that is often used to promote the interests of dominant social groups Finally the collection surveys how laws based on race have been enacted around the world to deny power to minority groups A multidisciplinary resource This collection of outstanding articles brings multiple perspectives to bear on race theory and draws on a wider range of periodicals than even the largest library usually holds Even if all the articles were available on campus chances are that a student would have to track them down in several libraries and microfilm collections Providing of course that no journals were reserved for graduate students out for binding or simply missing This convenient set saves students substantial time and effort by making available all the key articles in one reliable source Authoritative commentary The series editor has put together a balanced selection of the most significant works accompanied by expert commentary A general introduction gives important background information and outlines fundamental issues current scholarship and

Routledge Handbook of Modern Economic History Robert Whaples, Randall E. Parker, 2013. Employment & Unemployment in the Black & Hispanic Communities in the United States, 1983. *Subterranean Fire* Sharon Smith, 2018-07-17. A concise, well-written history of U.S. working class struggle and radicalism from the author of *Women and Socialism: Class, Race, and Capital Solidarity*. Smith explores how the connection between the U.S. labor movement and the Democratic Party, with its extensive corporate ties, has repeatedly held back working class struggles. And she closely examines the role of the labor movement in the 2004 presidential election, tracing the shrinking electoral influence of organized labor and the failure of labor management cooperation, business unionism, and reliance on the Democrats to deliver any real gains. Sharon Smith brings that history to life once again, blasting through the myths of the working class that Trump-era narratives cling to in order to connect us once again to the possibility of building broad solidarity.

Sarah Jaffe, author of *Work Won't Love You Back*. A veteran worker intellectual brilliantly addresses the crisis of the labor movement, skewering those who believe that renewal can come from the top down and encouraging those who are fighting to rebuild it from the bottom up.

Mike Davis, author of *Planet of Slums*.
